

RELEASE NOTES

CAT® INSPECT

April 2024

CAT®

INSPECT
v4.3.26 (821)

Cat Inspect: Accurate inspection data as well as a **single location** to capture and store all data, leading to enhancements in Equipment management, Condition Monitoring, CVA delivery and lead generation. It also **seamlessly integrates** with other Cat data systems to aid dealers in **generating leads** while both **improving customer productivity** in the field and **extending** the life of their equipment.

FEATURE UPDATES

Mobile *(release on April 30, 2024)*

- + 1 – Ability to multi-select In-Progress or Assigned inspections to bulk delete
- + 2 – Ability to upload videos from the gallery

Web *(release on April 23, 2024)*

- + 1 – Ability to set who can view and access a form

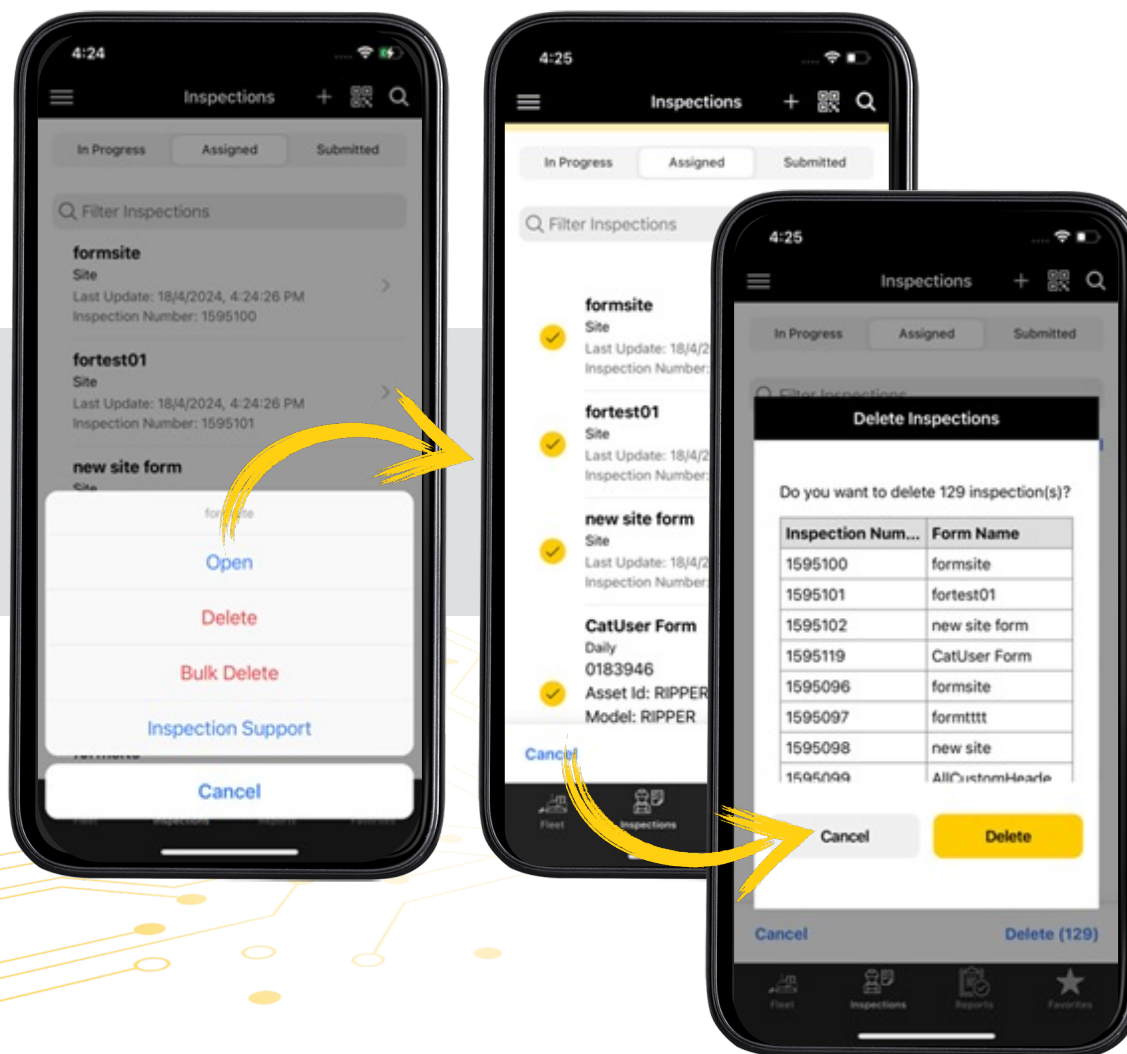

Users can now multi-select and delete inspections.

When a user long presses on any inspection, the option to bulk delete is seen in the modal appearing at the bottom of the page.

This feature is available for the In-progress and Assigned tabs.

BENEFITS FOR YOU

+ Improved workflow

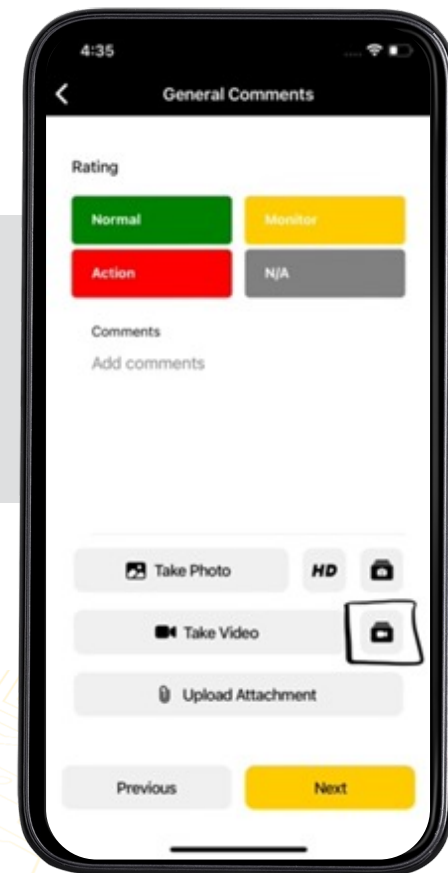

Users can now select videos from the gallery that have been previously taken and upload them to an inspection.

Multiple videos can be uploaded per question, please note that the limit is 6MB. Furthermore, the upload interface (photos, videos, attachments) has been improved.

BENEFITS FOR YOU

- + Easily add additional supporting context / information on inspections without having to re-upload

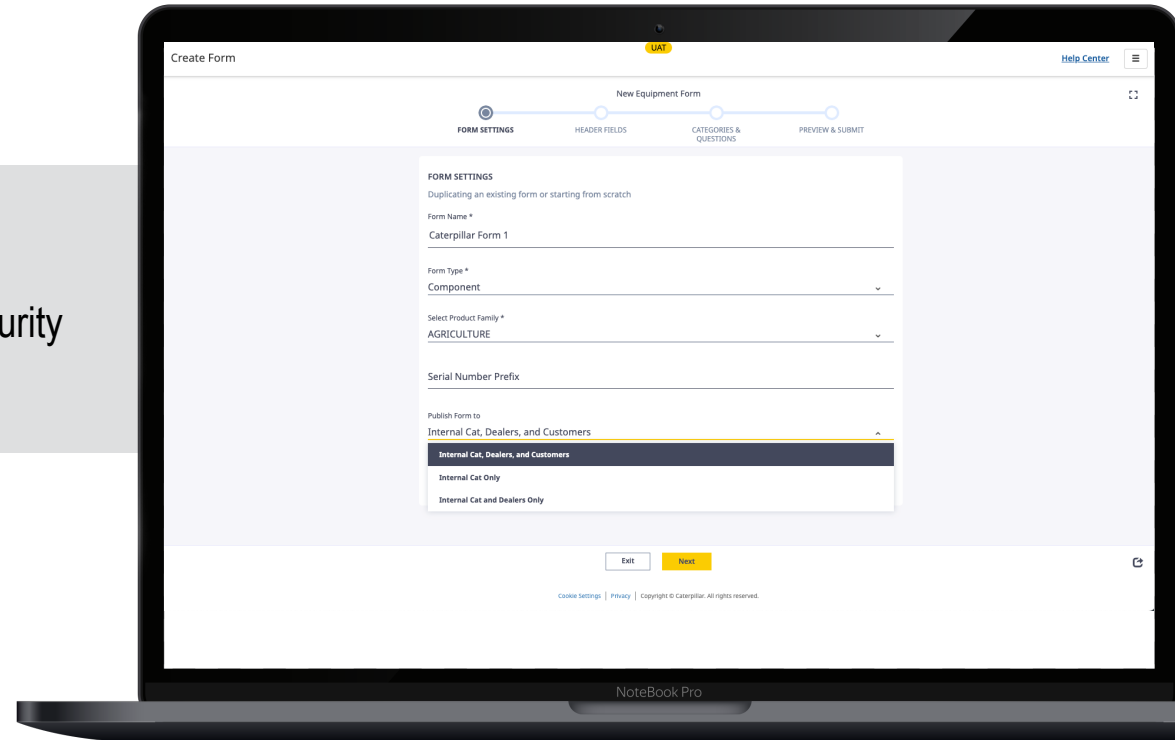

Form Authors can now control who has access (Internal Cat, Dealer, Customer) to the forms they author and publish.

This can be done in the Form Setting tab when creating a form.

BENEFITS FOR YOU

- + Control who has access to which forms for added security & improved workflow

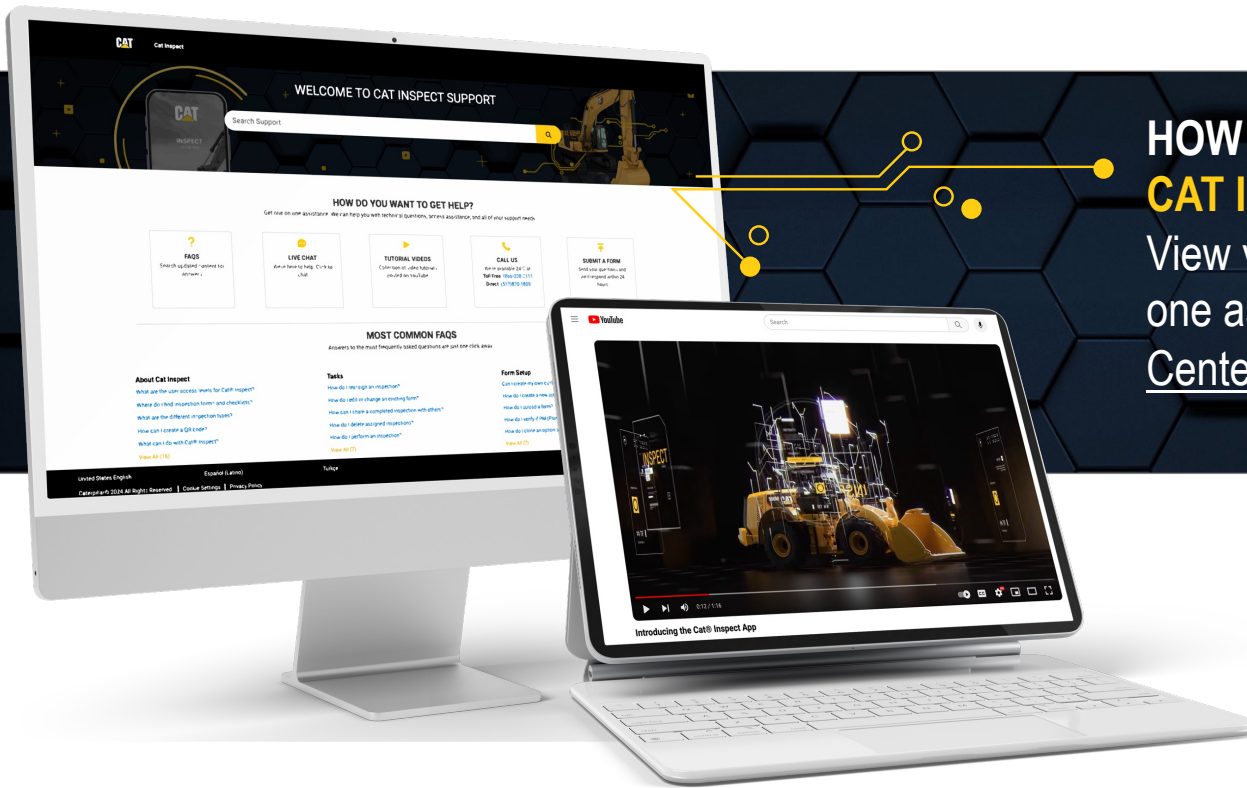

BUG FIXES

Mobile

- + Bug fix applied to handle large customer fleets
- + Bug fix applied to handle Cat PIN scan for data autofill
- + Bug fix applied to properly display warning icon in disconnected mode
- + Bug fix applied to correctly populate Additional Email field when scanning QR code
- + Improvements added to Equipment and Customer history popup screen
- + Bug fix applied to status indicator when uploading supporting documents
- + Bug fix applied to search for forms with a combination of serial number prefix and product family
- + Bug fix applied to Inspections are not getting updated in inspection bundle

Web

- + Bug fix to remove SNP field for Site Form Type
