

3" CHECK VALVE

SPM's 3 inch check valve assembly and kit redefines the standard for check valve life. This innovative product reduces the total cost of ownership by the end user through the extended product life and minimizes maintenance needs. Its superior design and performance make it the ideal choice for applications demanding reliability and efficiency and helps reduce the amount of operator touch points during operations, reducing non-production time.

PRODUCT BENEFITS

- Achieves effective performance for 600-800 pumping hours.
- Demonstrates consistent life for better maintenance planning.
- Retrofittable into existing valve installed base.
- Corrosion resistant material, which helps to extend valve body life in produced water applications.

PRODUCT FEATURES

- Locking pin increases robustness of product.
- Domed face features ensure activation of the hanger and clapper locking mechanism.
- 3-piece clapper provides improved urethane seal retention.
