CATERPILLAR®

CATERPILLAR'S PRIORITY ISSUES

Caterpillar participates in the public policy process, advocating for a range of issues that support our corporate strategy and business objectives. The policy priorities below are driven by our enterprise strategy for profitable growth and reflect the value we provide to shareholders, customers and other stakeholders.

ENERGY

Our commitment to our customers' success involves navigating the evolving energy landscape and increasing energy demand worldwide. Our customers rely on our broad portfolio of solutions to produce energy, power AI infrastructure growth, stabilize the grid, support critical minerals mining, and improve efficiency. We advocate for policies that strengthen power supply, advance energy innovation and infrastructure, streamline permitting, and promote reliable, affordable energy.

INFRASTRUCTURE

Our global customers use our equipment to build and strengthen communities, supporting safer access to water, electricity, food, healthcare and education. A more modern and reliable infrastructure system is also crucial to economic growth and job creation. We support initiatives that provide funding, efficient processes, and permitting reform for building, repairing and upgrading infrastructure networks— from roads, rail and waterways to airports and communications and critical infrastructure. Caterpillar also supports the protection and restoration of natural infrastructure and local ecosystems. Work began in 2025 to reauthorize federal surface transportation programs that will expire on September 30, 2026. Through several trade association leadership positions, Caterpillar is well-positioned to support the efforts to reauthorize these critically important programs.

COMPETITIVENESS

Legislation and regulations can significantly impact companies and their ability to compete, which is why we work closely with lawmakers and regulators to implement pro-growth policies that help ensure Caterpillar remains competitive at home and abroad. We will continue advocating for tax and trade policies that remove barriers, expand markets, and strengthen our global competitiveness as a U.S. net exporter.

WORKFORCE DEVELOPMENT

Long-term workforce development is a top priority for the company, and we support policies that help to identify, attract and develop skilled talent to support current and future needs for manufacturers, equipment dealers, and customers. We work closely with several trade associations to advocate for workforce development policies that address the future of work, including the service technician shortage and the need for stronger education in science, technology, engineering and math, as well as digital skills. Recent updates to tax-advantaged savings accounts for education and non-repayable grants for undergraduate students in financial need will also support education and training in workforce programs and trades.
