CATERPILLAR'S PRIORITY ISSUES

Caterpillar participates in the public policy process, advocating for a range of issues that support our corporate strategy and business objectives. The policy priorities below are driven by our enterprise strategy for profitable growth and reflect the value we provide to shareholders, customers and other stakeholders.

ENERGY

Our commitment to our customers' success includes navigating the evolving energy landscape and increasing energy demand worldwide. We continue investing in new products, technologies and services that facilitate fuel flexibility, increased operational efficiency and reduced emissions. Our advocacy efforts support policies that enhance power supply, bolster energy innovation and infrastructure and provide reliable and affordable energy. We are increasing our investments in autonomy, alternative fuels, connectivity and digital and electrification (AACE) technologies.

INFRASTRUCTURE

Our customers around the world use our equipment to build and strengthen communities, supporting safer access to water, electricity, food, healthcare and education. A more modern and reliable infrastructure system is also crucial to economic growth and job creation. We support initiatives that provide funding and efficient processes and permitting reform for building, repairing and upgrading infrastructure networks – from roads, rail and waterways to airports and broadband internet infrastructure. Caterpillar also supports the protection and restoration of natural infrastructure and local ecosystems.

WORKFORCE DEVELOPMENT

A top priority of ours is supporting policies that help to identify, attract and develop the skilled talent to support current and future needs for manufacturing, equipment dealers and customers. We work closely with several trade associations to advocate for workforce development policies that address the future of work, including the service technician shortage, STEM education and digital skills. All of which will help foster a skilled workforce for long-term growth.

COMPETITIVENESS

Legislation and regulations can significantly impact companies and their ability to compete, which is why we work closely with lawmakers and regulators to implement pro-growth policies that help ensure our company remains competitive both at home and abroad. We will continue to advocate for globally competitive tax policies and trade policies that eliminate tariffs, expand market access for our products and services and allow us to compete globally as a U.S. net exporter.
