YOU AND US

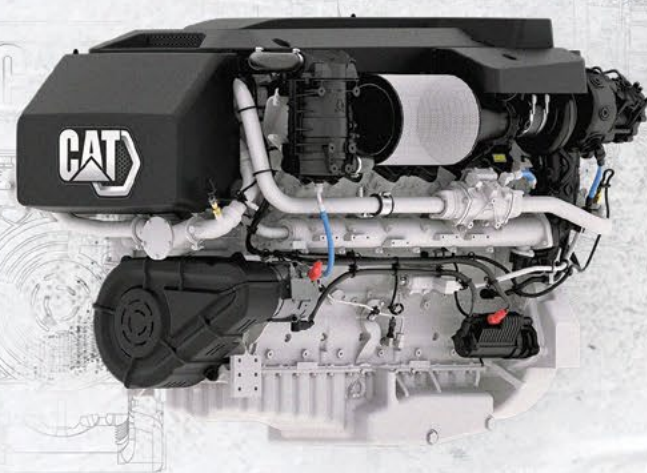

We're proud of our latest engine and we'd love to tell you more about it. To talk C32B, or to discover all the other ways Caterpillar could help you get more from your boat, contact your Cat® dealer today.

DRIVEN BY TORQUE AND DETERMINATION

Hours spent battling a big blue fish in the ocean. You fight for it. You sweat for it. You even bleed for it. This is the moment you live for. With the Cat® C32B, you'll have the performance of one of the most powerful 12-cylinder engines available to help you get the absolute most out of every moment to come.

The C32B is built on the reliable C32 platform and tested for more than 150,000+ hours, this marine engine isn't just for new builds—it's a repower solution whether you're running an existing C32 or another engine brand entirely.

It's **sequential turbocharging** that enables improved acceleration and maximizes torque.

It's the peak performance of **advanced injection** and the assurance of **extended coverage plus drop-in replacements**.

It's aiming your bow at the horizon and running **faster for longer**.

It's an **extra edge** for sport fishermen and cutting-edge for yacht masters.

When we sat down to make our latest high-performance engine, we kept thinking 'and'.

It needed more power and less noise, to be compact and reliable, to fit in and stand out. While we feel confident in the final product, we invite you to see for yourself what many others are already experiencing with the C32B on the water.

From power and performance to response and reliability, the C32B is made to impress.

WHERE METAL MEETS METTLE

RACE ON

There is no feeling quite like pushing your vessel through the water at full throttle, and with the C32B you can be assured our high-performance engine has been specifically designed to do just that. Leave others in your wake as you head out to conquer the day.

REPOWER

Upgrading to the C32B is simple. The new model fits virtually in the same space in your engine room. It's more muscle with less bulk – perfect for repowers. For those upgrading from a different model, reach out to our experts so they can help you find the best fit for your needs.

FAST, YET QUIET

When you're out on the water fishing, you'll be able to enjoy every experience on your vessel. The C32B enables a quiet ride using our advanced unit injection system. It's built on our proven and reliable technology while incorporating the same benefits as a common rail system (namely split shot injection) to deliver significant noise reduction.

MORE LONGEVITY, LESS WASTE

Built on the reliable C32, the C32B continues a strong tradition of reliability and performance. Enjoy up to 500 hours between oil changes, when supported by regular SOS oil sampling and Cat fluids and filters.
