

SPM™ PRESSURE CONTROL SOLUTIONS

**SAVE TIME & PROTECT
YOUR BOTTOM LINE**

At SPM, your success is our bottom line. That's why SPM Pressure Control Solutions are designed with your time, efficiency, and reputation in mind. We have everything covered from the pump to the wellhead with our total site solution. Instead of going through the process of working with multiple providers, keep the parts, service, and unparalleled productivity you need with one team.

TOGETHER, YOUR SUCCESS IS UNSTOPPABLE

ONE TEAM. ONE SUPPLIER. ONE SERVICE PROVIDER.

When your operation is bolstered by SPM, you get the convenience of one team providing the support and service capabilities you need for maximum uptime.

SUCCESSFUL WORKSITES START HERE

Pressure control performance relies on people and processes as much as iron and valves, which is why SPM Oil & Gas' single-source capabilities make a difference in the field. The approach combines engineering, rental, and field management support to streamline communication, transparency, and logistics. Here's what you can expect:

RAPID TURNAROUND

- Turnaround time between pads is typically completed within 24–48 hours

ENHANCED DURABILITY

- Engineered products that exceed standard API requirements and increases operational life and reliability

OPERATIONAL EXCELLENCE

- Pre-planning & advanced installation
- Single connection, quick pumping
- Preventative maintenance per OEM engineering guidelines
- Reduced downtime, seamless transitions
- Rapid field support

PRODUCTS DESIGNED TO WORK TOGETHER.

The industry, just like your operation, is constantly evolving. Experience seamless product innovation with technology designed to work together with future iterations and advancements.

SPM SIMPLIFIED FRAC IRON: ENGINEERED FOR PERFORMANCE AND LONGEVITY

Purpose-built to meet the growing demands of modern frac operations, SPM Simplified Frac Iron delivers higher throughput and optimizes asset life.

HIGH-RATE CAPABILITY

- Rated for up to 123 bbl/min
- Paired with linear flow path for efficient delivery of high-rate frac fluid
- Reduced pressure drop across the system

EXTENDED OPERATIONAL LIFE

- Increased erosion allowance
- Minimized turbulence zones
- Reduced material loss
- Extended equipment life compared to traditional piping

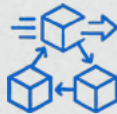

OPERATIONAL EFFICIENCY THAT DRIVES ROI

The SPM large bore system streamlines pumping operations with faster rig-up and pad transitions to help crews maximize pump time and minimize downtime.

MODULAR DESIGN FOR SPEED

- Pre-staged modular skids
- Enable crews for faster rig up times
- Seamless back in and hook up
- Accelerated pad-move cycles
- Increased pump time

SIMPLIFIED SITE LAYOUT

- Streamlined flow line design
- Reduced site complexity
- Minimized failure points
- Enhanced operational safety for a more productive environment

WITH YOU THROUGH AND THROUGH

UNMATCHED SERVICE EXECUTION

**BACKED BY
CATERPILLAR,
SPM DELIVERS
EXCEPTIONAL
QUALITY AROUND
THE WORLD.**

SPM's ability to consistently deliver high-quality service helps ensure success no matter the challenge. With solutions for the ever-evolving global oil & gas industry, SPM is ready to support.
