## ENCOURAGES USE OF MACHINE ASSIST CONTROLS

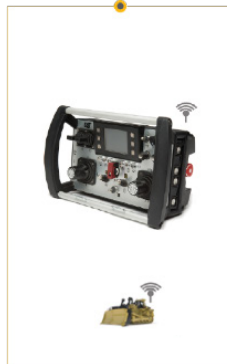

- Automated Blade Assist
- Autocarry
- Automatic Ripper Control

## FEATURES & BENEFITS

- Gives operators full control of the dozer while protecting them from on-site dangers and long-term exposure to dust, noise and vibration.
- Is scalable and flexible with three modes of operation: an over-the-shoulder, portable console; a remote operator station, where the operator can work in a comfortable, seated position with familiar controls; and semi-autonomous operation, which allows a single operator to manage multiple machines.
- Is deeply integrated with Cat machine systems to enable smooth, precise control for greater efficiency and productivity.
- Delivers consistent dozing, improves equipment utilization and increases shift-long operator efficiency.
- Improves productivity and efficiency by making it possible for one operator to control multiple dozers.

## FLEXIBLE, SCALABLE AND CONFIGURABLE TO YOUR NEEDS

### REMOTE CONSOLE

### REMOTE STATION

### SEMI-AUTONOMOUS
