

CAT® REMAN G3600 CYLINDER HEADS

A DROP-IN READY SOLUTION WITH LIKE-NEW QUALITY

+ A LOOK INSIDE OUR CYLINDER HEAD REMANUFACTURING PROCESS

100% designed and tested to stringent quality specifications

- Completely disassemble, clean and inspect every component for quality and durability.
- Replace 100 percent wear components, including retainer, rotocoil, inner valve spring, outer valve spring, exhaust valve seat, exhaust valve, intake valve and intake valve seat with genuine new Cat® parts.
- Include all critical engineering updates for up-to-date performance standards for your engine.
- Design, test and match as a system for like-new performance and emissions.
- Precision machining, tolerancing and assembly using state-of-the-art machinery and technology to meet stringent Caterpillar specifications, reducing the potential for failure and downtime.
- Conduct multiple quality checks, including an extensive end-of-line leak test.

+ WHY CAT® REMAN CYLINDER HEADS?

Only Caterpillar can remanufacture Cat parts to OEM standards.

QUESTION	CAT® REMAN	OTHER PRODUCTS
Is the cylinder head remanufactured or rebuilt?	Cat Reman remanufactures end-of-life cylinder heads by disassembling to the piece component level. The original part loses its identity. Then we clean, salvage, assemble and test to like-new quality.	May be rebuilt or refurbished, which can include physical and visual inspections, cleaning, part replacements and basic testing.
Is there access to the original prints, specifications and tolerances for reference during remanufacturing?	Cat Reman utilizes the original cylinder head prints, specifications and tolerances when developing remanufacturing processes.	Only Caterpillar has access.
Are genuine Cat parts used in the cylinder head assembly?	Only genuine new and Cat Reman components are used. We replace 100 percent wear components with genuine new Cat parts.	Can have a variety of components.
Do the components meet Caterpillar's strict chemistry & hardness requirements?	All Cat Reman products are designed and tested to meet stringent Caterpillar requirements.	Can have different chemistries and exhibit varying hardness in critical wear areas.
Do the cylinder head assemblies incorporate critical design improvements?	Cat Reman engineers work side-by-side with the new product line to incorporate all critical design improvements.	Only Caterpillar has awareness of all critical design improvements.
Does the cylinder head come with a same-as-new warranty?	Cat Reman parts are backed by a same-as-new Caterpillar Limited Warranty ¹ , protecting against Caterpillar defects in material and/or workmanship.	Warranty coverage can vary.
Is the cylinder head less than the price of a new cylinder head?	Cat Reman cylinder heads are a fraction-of-new cost when you return your end-of-life core and receive a refund of your core deposit.	Pricing can vary.
How long has the provider been remanufacturing Cat products?	Cat Reman was established in 1973, providing remanufactured Cat product solutions for over half a century.	Providers may have different levels of experience in rebuilding or remanufacturing Cat products.

¹Warranty can vary by model and application; limitations apply. For complete details about Caterpillar Limited Warranty, contact an authorized Cat dealer.

+ RECEIVE MORE VALUE FOR YOUR CORE

Our flexible core acceptance criteria² helps you get more for your money. We use simple, visual inspections that don't require special tools or disassembly. That means we can provide a quick decision on core condition and refund, so you don't have to guess about your repair costs.

²Additional requirements apply. Contact your authorized Cat dealer for more information.

+ YOUR DEALER IS STANDING BY

The Cat dealer network stocks a broad line of Cat Reman parts and components. With 21 Global Caterpillar Parts Distribution centers and more than 2,300 authorized Cat locations, Cat Reman components are drop-in-ready solutions, which help you reduce downtime and maintain productivity.
