

» **CAT® FILTERS & FLUIDS FOR CAT ON-HIGHWAY TRUCK ENGINES**

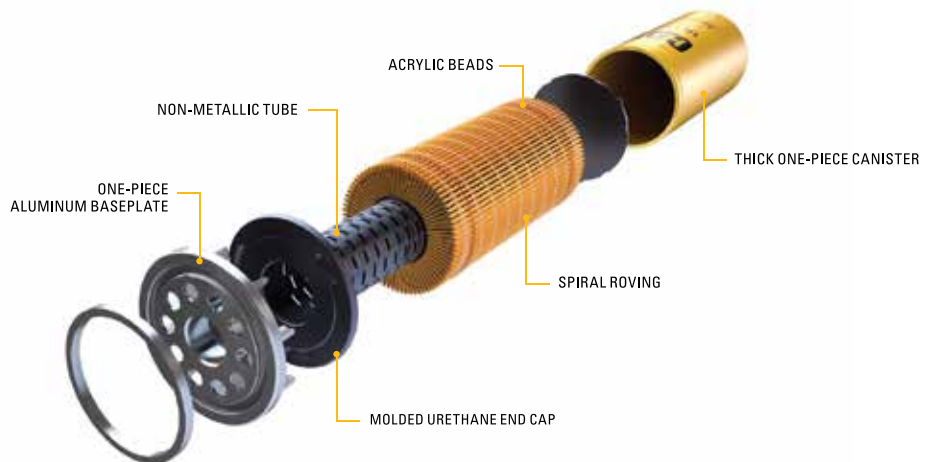

THE PROOF IS IN THE PERFORMANCE

Cat® filters are essential to keeping your truck engine running smoothly and efficiently. The filters capture harmful particles and maintain system cleanliness. By choosing high-quality Cat filters, you safeguard your engine's performance.

BETTER FILTRATION MEANS FEWER REPAIRS AND MORE TIME ON THE ROAD

With their durable design, Cat filters provide preferred filtration and help remove contaminants before they reach critical components in the engine.

CAT FILTERS ARE DESIGNED WITH ROBUST ENGINEERING

ALUMINUM TOP PLATE

- Non-ferrous metal
- Reduces harmful contaminants
- More thread engagement

CANISTER

- Thick can
- One-piece design
- Improves structural strength
- Reduces potential leaks

ACRYLIC BEADING

- Protects against bunching
- Enhances media surface area for higher capacity

URETHANE END CAPS

- One-piece design
- Media molded into urethane
- Reduces possible leak paths

SPIRAL ROVING

- Reduces pleat flex and fatigue
- Improves media surface utilization
- Increases contaminant retention

NON-METALLIC CENTER TUBE

- Stronger than metal
- Removes the possibility of metal debris flowing into clean oil

PROTECT YOUR ENGINE WITH CAT FLUIDS

Cat fluids provide improved performance and reliability for your Cat on-highway truck engine. With rigorous standards, quality testing, and experts in the field weighing in on the fluid designs, Cat fluids last longer and extend drain intervals. This means that your engine performs better and your components last longer.

CAT FLUIDS

CAT DIESEL ENGINE OILS

CAT DEO™	CAT DEO-ULS™	CAT DEO™ COLD WEATHER
Engine oil technology from a leader in the industry that provides exceptional engine protection and oil life. Trusted by Caterpillar and Cat engine customers to keep engines running.	Advanced Cat engine oil technology. Compatible with the latest engine aftertreatment technology while delivering a high level of engine protection.	Similar performance as DEO-ULS, but the fully synthetic formulation keeps engine oil flowing even in severe cold weather conditions.

WHEN TO USE		
The engine has no aftertreatment system or when aftertreatment does not include a Diesel Particulate Filter (DPF).	The engine is equipped with a Diesel Particulate Filter (DPF).	The low temperature performance of Cat DEO Cold Weather makes starting your engine easier when the thermometer dips below freezing.

CAT COOLANTS

CAT ELC™	CAT ELC ADVANCED™
Cat® Extended Life Coolant (ELC) offers an impressive 12,000-hour/6-year drain interval with no fluid sampling required.	Cat® Extended Life Coolant (ELC) Advanced is a uniquely patented formula which offers better performance and longer life while providing superior component protection.

WHEN TO USE	
Cat ELC requires less frequent changes, fewer drain intervals and only requires one coolant additive for simplified maintenance of your engine.	Cat ELC Advanced has the potential to extended service beyond 12,000 hours in certain applications and provide fluid sampling beyond 12,000 hours.

Get more from your investment with Cat filters and fluids. Talk to an authorized Cat dealer about Cat S-O-SSM Fluid Analysis. Set a sampling schedule tailored to your needs, and integrate it into a robust engine maintenance program.

* We offer a range of specialty oils like DEO-ULS SYN, MAEO 10W-40 and more. Contact your local authorized Cat dealer for more information.

CAT FILTERS AND FLUIDS WORK TOGETHER TO SAVE YOU MONEY

Clean fuel has a big impact on truck performance and your overall engine costs. Formulated with premium base stocks and additives — we've got you covered with a high quality product, dealer support and helpful resources.

Drive mile after mile with the confidence that your truck's essential systems are protected by quality Cat filters and fluids.
