## TRAINING PATHWAYS FOR SUCCESS

### PARTNERING FOR SUCCESS

#### THE CATERPILLAR TRAINING PATHWAY THAT'S BUILT ON SUCCESS

**eLearning** is the pre-requisite for all Office based course offerings and provides a solid foundational base knowledge of the course material that will be covered in the instructor lead course.

This is also the source for MineStar Office upgrade information.

Employees have unlimited access to review all previously completed eLearning modules as they require to refresh their memory.

**Autonomous Operating Zone (AOZ)** is the foundational safety concepts required to work in and around and autonomous mining operation using Caterpillars global best practices.

**Sim Lite** is for employees who won't need to use the system itself but requires an understanding of the MineStar suite for their job roles.

**Pit Technician** training covers aspects of the equipment required to make a haul truck run autonomously and the skillsets to build portions of an autonomous mine with key concepts focusing on in-field production efficiencies.

**Fleet Office** provides an in-depth learning experience utilizing the MineStar Fleet Management System to track, manage, and assign all haul trucks on your site.

**Terrain Office** provides the skills to interact with files used for production operations. Ideally suited to Controllers, Builders, and departments responsible for creating, modifying, and uploading designs and mining blocks.

**Command for Hauling Office** starts with the foundational knowledge and skills to build and monitor an autonomous mine site including the assignment of AMT's. The course then builds on the foundational core concepts and further expands the user's knowledge via additional complex planning scenarios, troubleshooting, working with the advanced settings to encourage high throughput productivity and team building skills by developing each learner to an intermediate level user.

#### Ongoing Development of Staff – Continuous Improvement

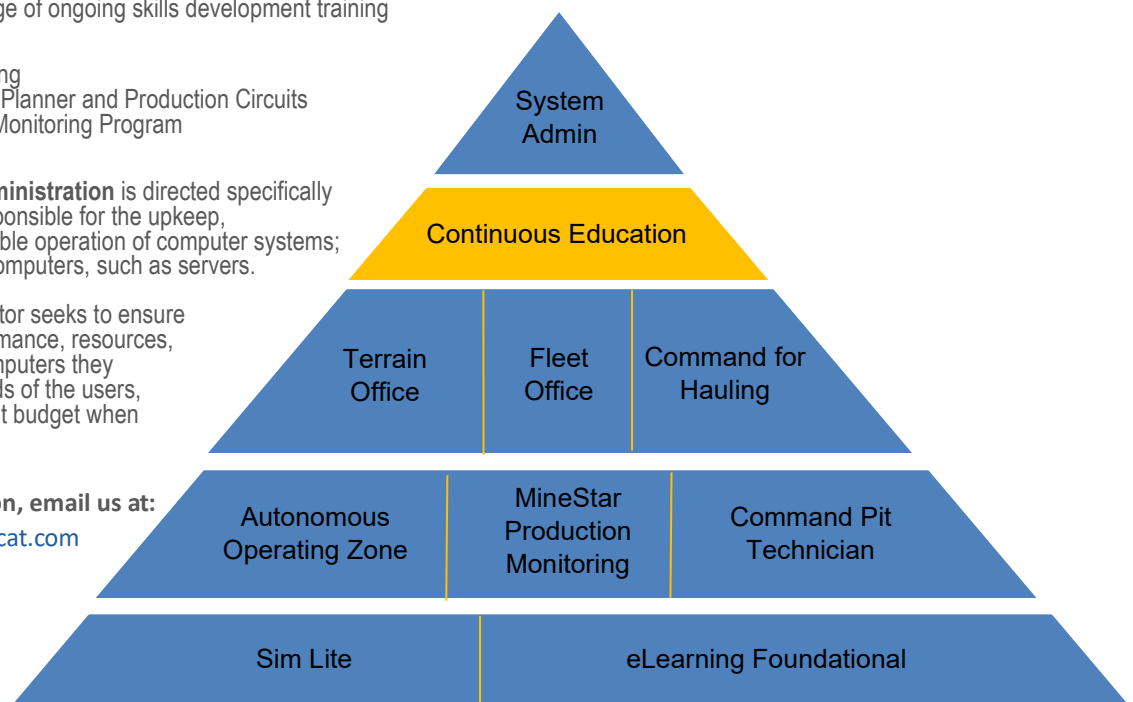

Caterpillar have a range of ongoing skills development training programs such as:

- MCUI Training
- Assignment Planner and Production Circuits
- Production Monitoring Program

**MineStar System Administration** is directed specifically to a person who is responsible for the upkeep, configuration, and reliable operation of computer systems; especially multi-user computers, such as servers.

The system administrator seeks to ensure that the uptime, performance, resources, and security of the computers they manage meet the needs of the users, without exceeding a set budget when doing so.

Fleet Office	Caterpillar	5 days						
Fleet Office Onboard	Site L&D	OJT - AOZ						
Terrain Office (AHS/staffed)	Caterpillar	4 days						
Terrain Onboard	Site L&D	OJT - AOZ						
Pit Technician	Caterpillar	5 days						
<b>Service</b>								
Terrain Service Foundational	Dealer		Required		Optional	Required	Required	Optional
Terrain Service Intermediate	Dealer		Required					Optional
Command Service Foundational	Dealer			Required	Optional	Required	Required	Optional
Command Service Intermediate	Dealer			Required	Optional	Required	Required	Optional
Onboard Practical Training	Caterpillar	5 days	Optional	Optional	Optional	Optional	Optional	Optional

## In-Pit Operations

Course Name:	Delivered by:	Classroom Hrs/Days	Drill & Blast	Wheeled & Track Dozer	Production Loading Tool	Ancillary	AOZ Light Vehicle	Emergency Services
<b>AOZ Onboard</b>								
AOZ Module 1: Introduction	Site L&D	2 Hrs	Required	Required	Required	Required	Required	Required
AOZ Module 2: Operate in AOZ	Site L&D	2 Hrs	Required	Required	Required	Required	Required	Required
AOZ Module 3: Terrain Dozing	Site L&D	2 Hrs		Required				
AOZ Module 4: Terrain Loading	Site L&D	2 Hrs			Required			
AOZ Module 6: Maintenance and Refueling	Site L&D	2 Hrs					Optional	
<b>MineStar Operation</b>								
Sim Lite	Caterpillar	3 days	Optional	Optional	Optional	Optional	Optional	Optional
Command Office Sim School Foundations	Caterpillar	5 days						
Command Office Sim School Intermediate	Caterpillar	5 days						
Fleet Office	Caterpillar	5 days						
Fleet Office Onboard	Site L&D	OJT - AOZ						
Terrain Office (AHS/staffed)	Caterpillar	4 days						
Terrain Onboard	Site L&D	OJT - AOZ	Required	Required	Required			
Pit Technician	Caterpillar	5 days						
Command for Dozing Line of Sight	Caterpillar /Dealer	1 Day		Optional				
Command for Dozing Non-Line of Sight	Caterpillar /Dealer	1 Day		Optional				
Command for Dozing Semi-Autonomous Tractor System (SATS)	Caterpillar	4 Days		Optional				
Command Practical Training	Caterpillar	5 days	Optional	Optional	Optional	Optional	Optional	Optional

# CATERPILLAR MINESTAR COURSE OUTLINES

# CAT MINESTAR

MINING TECHNOLOGY ACADEMY (MTA) ELEARNING

## PROGRAM OVERVIEW

### BENEFITS OF THE CATERPILLAR ELEARNING TRAINING PROGRAM

Investing in Cat® MineStar™ products is just the first step in building business value at your site. Utilizing Cat MineStar to its full potential can help enhance:

- + safety
- + reduce costs
- + improve productivity
- + boost efficiency

That's why the MineStar team provides a comprehensive suite of training opportunities that allows users to build and enhance their skills from the comfort of their own office or home.

### TARGETED TRAINING

MineStar Training is made up of multiple individual courses. The courses contain the high-level objectives, goals, and system information to ensure your staff are equipped with the knowledge they require.

The eLearning course modules are organized by Product:

- + Fleet
- + Command
- + Terrain
- + Detect
- + Health

### LEARNING EXPERIENCE

Once you decide on which course offering you would like to take, simply self-enroll, or contact the MineStar Training team for advice and assistance.

All eLearning modules are cross platform compatible so you can even learn while travelling on the train to your office via your mobile phone.

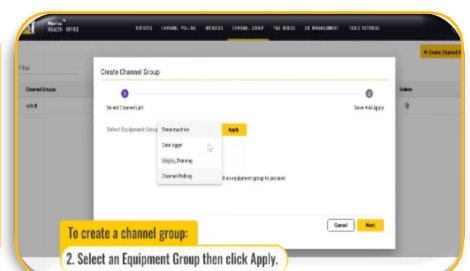

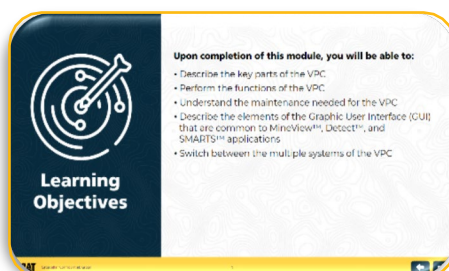

### INCLUDED COURSE TOPICS:

All eLearning training is optional for self-enrolment or will be assigned as part of any Instructor Led Training program scheduled by your Caterpillar Training Department partners, learners will:

- + Have the ability for continuous review of new and previously completed course modules
- + Have the ability to download certificates of completion as evidence of training completed
- + Have unlimited access to all Caterpillar eLearning course material (subscription status required)

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## COMMAND FOR HAULING SIM LITE

### PROGRAM OVERVIEW

#### BENEFITS OF THE CATERPILLAR COMMAND FOR HAULING SIM LITE TRAINING PROGRAM

The MineStar Command for Hauling SIM Lite program provides the learner with a foundational understanding of the following areas:

- + Introduction to MineStar Office Client
- + Command for Hauling Safety Concepts including Layers of Protection
- + Adopting autonomy within the overall mine site
- + Basic components of a Mine Model
- + Introduction to Fleet Management with MineStar

#### TARGETED TRAINING

This training course is designed for those individuals who are already involved with autonomous operations, particularly in supporting roles, or who will be supporting the deployment of autonomy at their mine site.

#### LEARNING EXPERIENCE

- + Day 1 – Introduction to MineStar and autonomy
- + Day 2 – Mine Model basics
- + Day 3 – Introduction to Fleet Management

Trainees will be given an overview of core MineStar Command for Hauling features and benefits. They will have the opportunity to complete hands-on exercises with guidance from an instructor, including the construction of different aspects of a virtual mine model and managing a fleet of autonomous trucks.

#### INCLUDED COURSE TOPICS:

During the 3 days of extensive hands-on Caterpillar instructor-led practical training, learners will cover:

- + Introduction to the MineStar system
- + Command for Hauling Safety systems
- + Foundational Mine Model building
- + Managing autonomous trucks

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

#### CAT MINESTAR SYSTEM

# CAT MINESTAR

## COMMAND FOR HAULING AOS

## PROGRAM OVERVIEW

### BENEFITS OF THE AUTONOMOUS OPERATING ZONE (AOZ) TRAINING PROGRAM

- + Ensure your site personnel at all levels understand the safety concepts of working on an Autonomous Mine Site
- + Learning how to drive and operate safely around Autonomous Mining Trucks
- + Learn how the Dozer Operator can take control over their dumping locations by creating their own dump points for floor maintenance and assist in validation of new Dump Plans
- + Learn how your Production Operator can take charge and control their immediate Load Plan area and enhance their production throughput efficiencies
- + Learn how to Mode Change the Autonomous Mining Trucks and work safely in and around Station Plans such as Go Lines, Fuel Bays, Break Down Bays, and Transfer Bays
- + Complete the Caterpillar Mine Star Qualified Trainer program to further enhance your projects capabilities for training on demand

### TARGETED TRAINING

The AOS program places a high emphasis on safety controls and production management and is designed to be a cost-effective training program for the customer to own and manage themselves.

By partnering with the Caterpillar MineStar Training Team, your selected on-site training staff will be taken through an in-depth Train the Trainer course known as the MineStar Qualified Trainer program.

During this program, each authorized trainer will learn how to present each module of the AOS program, have the opportunity to provide teach back' sessions to the Caterpillar Instructor to ensure mastery of the topic and then be trained and assessed on site each practical task associated with those modules.

This in turn empowers you, our partner, in taking control of your own on-site training logistics.

### LEARNING EXPERIENCE

All training is supported by eLearning and Instructor Led coaching and mentoring. On completion of the MineStar Qualified Trainer program, the training staff will then be issued all the required Caterpillar documentation to reformat into your own templates and have the ability to facilitate this training within their own training schedules.

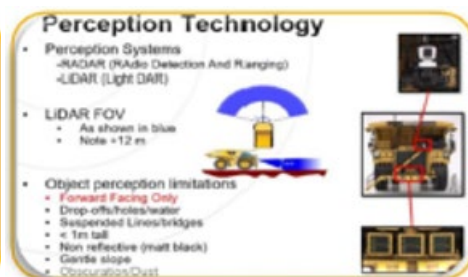

### INCLUDED COURSE TOPICS:

During the 10 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Receive 'train the trainer' level coaching and mentoring from an authorized Caterpillar subject matter expert
- + Have the opportunity to present back to the Caterpillar instructors to underpin their knowledge and determine any knowledge gaps
- + All editable training documentation required to facilitate the five AOS training modules
- + Trainees receive mentoring and coaching from an authorized Caterpillar subject matter expert when first delivering this training to their own training groups

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## COMMAND FOR HAULING PIT TECHNICIAN

### PROGRAM OVERVIEW

#### BENEFITS OF THE MINESTAR COMMAND PIT TECHNICIAN PROGRAM

The MineStar Command Pit Technician program promotes job efficiency by:

- + Understanding in-field best practices
- + Real world versus virtual world mine inspections and auditing
- + Understanding key principals of mine model building
- + Production throughput efficiency improvements
- + Providing the skills and understanding required for Pit Technicians, Mine Supervisors, and Mine Planners

#### TARGETED TRAINING

This course was designed specifically for those in the Command Pit Technician role, focusing on developing the skills needed to maintain efficient operations of the MineStar system. Key topics include:

- + Principles of proactive onsite monitoring
- + Developing the foundational skills required to assist in building components of the virtual mine model
- + Developing a higher level of understanding of Fleet efficiencies at dump locations
- + Using real-world examples of possible situations the Pit Technician may find themselves in and how to manage these situations to ensure production is maintained

#### LEARNING EXPERIENCE

Core to the Command Pit Technician training program is learning to understand the importance of productivity efficiencies and material throughput.

All training is conducted in a safe virtual simulated environment requiring the trainee candidate to create an evidence portfolio that demonstrates their understanding and capability in working within the MineStar Client.

#### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Learning the fundamentals of Fleet Office and Command for Hauling Office systems
- + Learning the importance of mine modelling and building principals to ensure safe and efficient operations
- + Planning, preparing, and validating new work locations on site
- + Assessing equipment recoveries
- + Learning the importance of safe working procedures in and around Station Plans

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## COMMAND FOR HAULING OFFICE

## PROGRAM OVERVIEW

### BENEFITS OF THE CATERPILLAR COMMAND FOR HAULING TRAINING PROGRAM

The MineStar Command for Hauling program provides the learner with best practices and processes and offers an in-depth overview in the following areas:

- + Introduction to MineStar Office Client
- + Command for Hauling Safety Concepts including Layers of Protection
- + Maintaining an Accurate Surface File
- + Foundational to Intermediate Mine Model Building
- + Throughput Efficiencies
- + Introduction to Fleet Management
- + Use of production plans and ensuring that daily targets and goals are achieved

### TARGETED TRAINING

This training course is designed for those individuals who are currently working with the MineStar Office system or who are looking at taking that next step in advancing into a Controller, Builder, or Application Specialist job role. The content has been created in a way to allow the learner to easily absorb the new information so they can transfer that knowledge into the workplace.

### LEARNING EXPERIENCE

- + Week 1 – MineStar Office functionalities and foundational mine model building
- + Week 2 – Intermediate mine model building
- + Week 3 – Builder or Controller team week

Trainees are to build out a fully functional mine model using the latest technology with our training simulators and will use real life scenarios within in the training room. This unique opportunity allows the learners to start with the Command for Hauling fundamentals and work through to achieve that intermediate level benchmark which also includes the last week being Controller or Builder week, in which the learners will be given a production plan each day that they must follow to achieve daily targets and goals.

### INCLUDED COURSE TOPICS:

During the 15 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Introduction to the MineStar system
- + Command for Hauling Safety systems
- + Mine Model Building, maintenance and validation, including surface management
- + Troubleshooting and fault finding within the mine model
- + Executing and maintaining a daily production plan achieving the daily requirements

For more information, email us at:  
[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

#### CAT MINESTAR SYSTEM

# CAT MINESTAR

## COMMAND FOR HAULING FLEET OFFICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE FLEET OFFICE (COMMAND) TRAINING PROGRAM

The Caterpillar MineStar Fleet Office program provides the trainee an in-depth overview of system navigation, functionality, and usability of MineStar Command supporting the Autonomous Haulage.

This course provides insight into:

- + Monitoring AMTs and staffed production equipment, and the control process for repositioning machines to another destination.
- + Minimizing operational costs. Utilizing automation processes for refueling and TKPH management.
- + The Material Tracking component of MineStar Fleet Office.
- + Managing machine availability and assignability, restrictions, loading tool preferences, queue tolerance, and scheduling assignments.
- + Time Usage Model. Delay and Cycle data. Managing and correcting data integrity issues.
- + The assignment algorithm, assignment context, efficiencies, and restraints.

#### TARGETED TRAINING

This program focuses heavily on the Controller's role in assigning Autonomous Mining Trucks and the day to day running of a Command fleet. Real world production simulations are provided to ensure the trainee understands the importance of system settings and configurations for executing Production Plans and responding to operational mining needs.

#### LEARNING EXPERIENCE

Trainees will not only learn how to monitor a virtual mine model, but also how to validate it to ensure maximum efficiencies are maintained at all times. Centre to their learning experience and understanding is how assignments work and how changes may impact the overall production outcomes., additionally, how to analyze haul cycles and perform edits where required.

The Fleet Office program culminates in a series of production events where trainees are required to put their learnings into practice to ensure they are work ready for your operation.

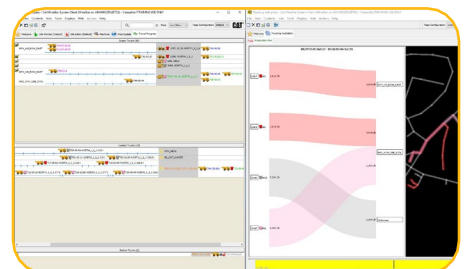

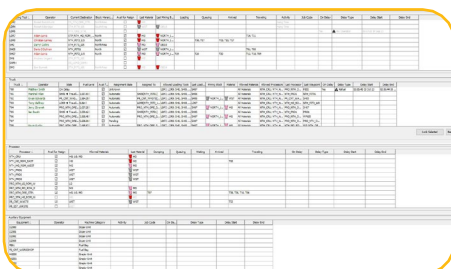

#### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Demonstrate creating, validating, and maintaining an Autonomous Spatial Mine Model.
- + Develop assignment engine logic. Including types of assignments, assignment considerations, restrictions, and components which impact assignments.
- + Identify and troubleshoot failed assignments of AMT's.
- + Manage historical, current, and future delays as well as data integrity issues.
- + Describe the importance and impacts of cycle data. Monitor cycle activities and resolve common cycle issues.

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

FLEET OFFICE CONTROLLER – STAFFED OPERATIONS

## PROGRAM OVERVIEW

### BENEFITS OF THE FLEET CONTROLLER TRAINING PROGRAM

The MineStar Controller program provides the trainee an in-depth overview of system navigation, functionality, and usability of MineStar Fleet Office.

This course provides insight into:

- + Monitoring production equipment and control process for repositioning machines to another destination.
- + Minimizing operational costs. Utilizing automation processes for refueling and TKPH management.
- + The Material Tracking component of MineStar Office
- + Managing machine availability and assignability, restrictions, loading tool preferences, queue tolerance, and scheduling assignments.
- + Time Usage Model. Delay and Cycle data. Managing and correcting data integrity issues.
- + The assignment algorithm, assignment context, efficiencies, and restraints.

### TARGETED TRAINING

This course was designed specifically for those in or entering positions of Fleet management, production monitoring, and end users utilizing the MineStar Fleet Office software. This course covers specific pages, settings, and configurations for executing Production Plans and responding to operational mining needs.

### LEARNING EXPERIENCE

Trainees put Controlling into context and build a baseline of knowledge by utilizing a Production Plan and Controller Checklist along with the simulated Mine Model. Trainees experience hands-on troubleshooting scenarios and exercises to better equip for pressure situations.

By learning, practicing, repeating tasks, self-diagnosing areas of improvement and using best practices in a safe simulated environment, trainees are better prepared for daily operation and KPI's.

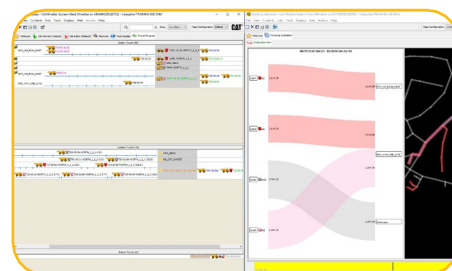

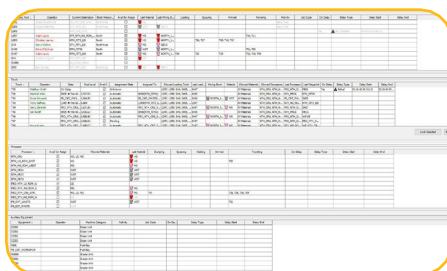

### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Demonstrate creating, validating, and maintaining a Spatial Mine Model.
- + Develop assignment engine logic. Including types of assignments, assignment considerations, restrictions, and components which impact assignments.
- + Identify and troubleshoot failed assignments.
- + Manage historical, current, and future delays, as well as data integrity issues.
- + Describe the importance and impacts of cycle data. Monitor cycle activities and resolve common cycle issues.

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

FLEET OFFICE BUILDER – STAFFED OPERATIONS

## PROGRAM OVERVIEW

### BENEFITS OF THE FLEET OFFICE BUILDER TRAINING PROGRAM

The Fleet Office Builder course enables key production personnel to support the site production objectives by discussing best practices and processes in the following areas:

- + MineStar Office modeling use cases, including main aspects of validation and surface management
- + Monitoring of the core operational performance indicators
- + Operator licensing, including management of the personnel records and pre-start machine inspection checklists
- + Mining block workflow and troubleshooting of the common production failure modes
- + Introduction to the core aspects of the system architecture, administration, and configuration

### TARGETED TRAINING

This course is designed for the Intermediate to Advanced level users of the MineStar Office system, with prior exposure to the Controller, Builder, or Application Specialist job roles. The content is focused on enhancing and refreshing the skills needed to achieve conformance to the daily production plan by utilizing the mine model maintenance and validation best practices.

### LEARNING EXPERIENCE

Core to the learning experience are the following aspects of training:

- + Practical application of the core MineStar Office modeling best practices and validation methodologies
- + Illustration of the key concepts with common failure modes in the mining production environments
- + Baselining of the system administration and configuration skillset to enable effective liaison between the production and support stakeholders

### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will cover:

- + Mine model maintenance and validation, including surface management
- + Personnel and system user management, including Operator licensing
- + Mining block workflow and troubleshooting
- + Introduction to the MineStar system architecture and administration
- + Spatial mine model and Assignment Planner configuration options

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## TERRAIN OFFICE FOR GRADING AND LOADING

### PROGRAM OVERVIEW

#### BENEFITS OF THE TERRAIN OFFICE FOR GRADING AND LOADING TRAINING PROGRAM

The purpose of this course is to introduce users to Terrain Office for Grading and Loading Operations. It discusses the advantages and benefits of using Terrain, explores the many functions and features, investigates the different applications that are used in conjunction with it, and highlights the important system components that make it work.

#### TARGETED TRAINING

This course was designed specifically for those in production or Fleet management and end user roles, or those primarily responsible for Terrain Grading and Loading file creation and management.

Key topics include:

- + Terrain Office for Grading and Loading knowledge and usability
- + Terrain Office overview and requirements
- + Insight into the many functions and features found within Terrain Office and dependent applications
- + End user system inputs and Functionalities

#### LEARNING EXPERIENCE

Core to the learning experience are the following aspects of training:

- + Hands-on application of core Terrain Office functionalities
- + Ability to identify, create, and navigate entities within Terrain Office and Onboard
- + Explore end user inputs and functionalities
- + Safe learning environment with no impact to production

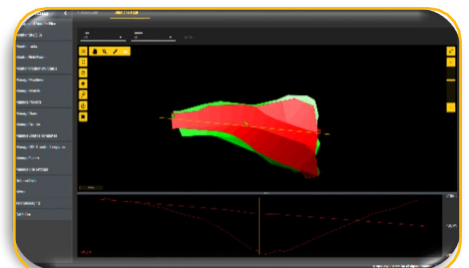

#### INCLUDED COURSE TOPICS:

During the 4 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Focus on highlighting core user interfaces of the Terrain Office for Grading and Loading solution, for the development of skills to navigate and utilize Terrain to perform tasks and manage performance to design.
- + Identify and navigate the components of the Terrain User Interface.
- + Explore and utilize Machine Configuration Utility (MCU).
- + Create and explore Terrain Machines and Onboard Lists.
- + Create and explore Material, Elevation, Display, and Avoidance file functionality.
- + Explore As-build and AOSM files.
- + Create and explore Bounding Regions. Groups. and Projects.

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## TERRAIN OFFICE FOR DRILLING

### PROGRAM OVERVIEW

#### BENEFITS OF THE TERRAIN OFFICE FOR DRILLING TRAINING PROGRAM

The Terrain Office for Drilling training program will provide the knowledge and skills for using applications that will allow the candidate to:

- Manage the use of drilling machines.
- Understand the production information generated by them.

The candidate will be immersed in the system and by carrying out practical exercises, will be able to:

- Achieve a global understanding of the operation of the system.
- Interact with machine operators and their information requirements.

#### TARGETED TRAINING

This training is designed specifically for office personnel who will manage the system and provide drilling information to machines in field by interacting with planning and blasting teams.

- Terrain Office for Drilling Overview and requirements to support the site.
- Insight into Terrain Office functions and features found within the system.
- End user system inputs and Functionalities
- Terrain Office for Drilling Knowledge and usability

#### LEARNING EXPERIENCE

Using the simulators, the candidate will get hands-on exposure to practical exercises that cover daily tasks in the operation of the Office system, gaining confidence and practical knowledge that will help the system function correctly. The ability to identify, create and navigate entities with Terrain Office and Drill Onboard. This is a safe learning environment with no impact to production.

#### INCLUDED COURSE TOPICS:

During the 4 days of hands-on Caterpillar instructor-led training, learners will:

- + Gain an understanding of the different applications of Terrain Office for Drilling software
- + Review best practices in the use and management of Drilling machines, Drilling pattern and production data
- + Understand the interaction between the office system and the drilling operator
- + Identify and troubleshoot common issues with Terrain Office

For more information, email us at:  
[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

COMMAND FOR DOZING LINE OF SIGHT (LOS) OPERATOR

## PROGRAM OVERVIEW

### BENEFITS OF THE CATERPILLAR COMMAND FOR DOZING LINE OF SIGHT OPERATOR TRAINING PROGRAM

The MineStar Command Line of Sight Dozing (LOS) program promotes safety and job efficiency by:

- + Identifying all safety aspects of the Line of Sight technology
- + Understanding and recognizing in-field dozing best practices
- + Production throughput efficiency improvements
- + Providing the skills and understanding required for Line of Sight Dozing

### TARGETED TRAINING

This training course is designed for personnel with previous track dozing experience. The objective is to bring the trainees existing dozer skills, and to be able to execute those skills needed to maintain efficient operations using the MineStar Command Line of Sight technology. Key topics covered include:

- + Overview of the Command for Dozing Technology
- + Command for Dozing Safety Concepts
- + Machine Components
- + Operator Station Features and Functionalities
- + Start-up, Operation, and Shutdown Practices
- + Basic Troubleshooting and Fault Finding

### LEARNING EXPERIENCE

Training is conducted in a controlled environment within the workplace to maximize a real-life training experience. Each learner will be given specific tasks in which they will need to complete and will consider safety, operational best practices, and efficiency. Each learner will be assessed on their performance which will prepare the learner to fully integrate the Line of Sight technology into their daily operations.

### INCLUDED COURSE TOPICS:

During the 1 day of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Have unlimited access to eLearning training modules the learner can utilize for continuous review and refresher training
- + Complete classroom-based training to learn the fundamentals of the Command for Dozing Technology and safety concepts
- + Extensive infield practical 1on1 training with a Caterpillar certified trainer familiarizing with the Line of Sight Operator Console and completing set tasks using best practices
- + Practical assessment and Summary given on each of the individuals performance

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

COMMAND FOR DOZING

NON-LINE OF SIGHT (NLOS) OPERATOR

## PROGRAM OVERVIEW

### BENEFITS OF THE CATERPILLAR COMMAND FOR DOZING NON-LINE OF SIGHT TRAINING PROGRAM

The MineStar Command Non-Line of Sight Dozing (NLOS) program promotes safety and job efficiency by:

- + Identifying all safety aspects of the Non-Line of Sight technology
- + Understanding and recognizing in-field dozing best practices
- + Production throughput efficiency improvements
- + Providing the skills and understanding required for Non-Line of Sight Dozing

### TARGETED TRAINING

This training course is designed for personnel with previous track dozing experience. The objective is to bring the trainees existing dozer skills, and to be able to execute those skills needed to maintain efficient operations using the MineStar Command Non-Line of Sight technology. Key topics covered include:

- + Overview of the Command for Dozing Technology
- + Command for Dozing Safety Concepts
- + Machine Components
- + Operator Station Features and Functionalities
- + Start-up, Operation, and Shutdown Practices
- + Basic Troubleshooting and Fault Finding

### LEARNING EXPERIENCE

Training is conducted in a controlled environment within the workplace to maximize a real-life training experience. Each learner will be given specific tasks in which they will need to complete and will consider safety, operational best practices, and efficiency. Each learner will be assessed on their performance which will prepare the learner to fully integrate the Non-Line of Sight technology into their daily operations.

### INCLUDED COURSE TOPICS:

During the 1 day of Caterpillar instructor-led practical training, learners will:

- + Have unlimited access to eLearning training modules the learner can utilize for continuous review and refresher training
- + Complete classroom-based training to learn the fundamentals of the Command for Dozing Technology and safety concepts
- + Extensive infield practical 1on1 training with a Caterpillar certified trainer familiarizing with the Non-Line of Sight Operator Console and completing set tasks using best practices
- + Practical assessment and Summary given on each of the individuals performance

## COMMAND FOR DOZING SEMI-AUTONOMOUS TRACTOR SYSTEM (SATS) OPERATOR

### PROGRAM OVERVIEW

#### BENEFITS OF THE CATERPILLAR COMMAND FOR DOZING SEMI-AUTONOMOUS TRACTOR SYSTEM (SATS) OPERATOR TRAINING PROGRAM

The MineStar Command Dozing (SATS) program promotes safety and job efficiency by:

- + Identifying all safety aspects of the Non-Line of Sight technology
- + Remote operation of multiple dozers
- + High utilization and reduce costs, 1 Operator or up to 4 machines
- + Providing the skills and understanding required for SATS machine management

#### TARGETED TRAINING

This training course is designed for personnel with previous track dozing experience. The objective is to bring the trainees existing dozer skills, and to be able to execute those skills needed to maintain efficient operations using the MineStar Command SATS technology. Key topics covered include:

- + Overview of the Command for Dozing Technology
- + Command for Dozing Safety Concepts
- + Machine Components along with Office Components
- + Operator Station Features Along with Office Features
- + Work Block and Slot Design Setup, Operation, and Shutdown Practices
- + Basic Troubleshooting and Fault Finding

#### LEARNING EXPERIENCE

Training is conducted in a controlled environment within the workplace to maximize a real-life training experience. Each learner will be given specific tasks in which they will need to complete and will consider safety, operational best practices, and efficiency. Each learner will be assessed on their performance which will prepare the learner to fully integrate the SATS and Multi Machine Technology into their daily operations.

#### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Have unlimited access to eLearning training modules the learner can utilize for continuous review and refresher training
- + Complete classroom-based training to learn the fundamentals of the SATS Multi Machine Technology and safety concepts
- + Extensive infield practical 1on1 training with a Caterpillar certified trainer familiarizing with SATS Work Block, Slot design, and Multi Machine Management
- + Practical assessment and Summary given on each of the individuals performance

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

## COMMAND FOR DOZING LOS SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE COMMAND FOR DOZING LOS SERVICE TRAINING PROGRAM

- + Increase in quality by understanding the proper installation and maintenance practices.
- + Deeper understanding of how the LOS system is incorporated with the other Command for Dozing technology layers.
- + Reduce customer downtime by being able to troubleshoot and resolve issues quickly and effectively.

#### TARGETED TRAINING

This training is designed to provide Technicians with the necessary knowledge and skills needed to install, service, and troubleshoot the Command for Dozing LOS system.

#### LEARNING EXPERIENCE

The learning is a combination of classroom theory and hands-on experience. Learners will have the opportunity to perform hardware installation activities, software installation and configuration as well as troubleshooting activities.

#### INCLUDED COURSE TOPICS:

During the 2 days of Caterpillar instructor-led practical training, learners will:

- + Understand the installation of the LOS system components
- + Perform configuration and calibration activities
- + Learn the foundational operation of the system
- + Troubleshoot common issues with the LOS system

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## COMMAND FOR DOZING NLOS SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE COMMAND FOR DOZING NLOS SERVICE TRAINING PROGRAM

The service training will provide the knowledge and skills a candidate must demonstrate to be deemed competent to:

- + Understand the proper installation and maintenance practices for.
- + Deeper understanding of how the NLOS system is incorporated with the other Command for Dozing technology layers.
- + Reduce customer downtime by being able to troubleshoot and resolve issues quickly and effectively.

#### TARGETED TRAINING

This training is designed to provide technicians with the necessary knowledge and skills needed to install, service, and troubleshoot the Command for Dozing NLOS system.

#### LEARNING EXPERIENCE

The learning is a combination of theory and hands-on experience. Learners will be led through classroom instruction where they will be given an overview of each topic before having the opportunity to perform hands on activities using actual machines and components.

#### INCLUDED COURSE TOPICS:

During the 3 days of Caterpillar instructor-led practical training, learners will:

- + Understand the installation of the NLOS system components
- + Perform configuration and calibration activities
- + Learn the foundational operation of the system
- + Troubleshoot common issues with the NLOS system

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

## COMMAND FOR DOZING SATS SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE COMMAND FOR DOZING SATS SERVICE TRAINING PROGRAM

Increase in quality by understanding the proper installation and maintenance practices.

Deeper understanding of how the SATS system is incorporated with the other Command for Dozing technology layers.

Reduce customer downtime by being able to troubleshoot and resolve issues quickly and effectively.

#### TARGETED TRAINING

This training is designed to provide Technicians with the necessary knowledge and skills needed to install, service, and troubleshoot the Command for Dozing SATS system.

#### LEARNING EXPERIENCE

The learning is a combination of classroom theory and hands-on experience. Learners will have the opportunity to perform hardware installation activities, software installation and configuration as well as troubleshooting activities.

#### INCLUDED COURSE TOPICS:

During the 3 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Understand the installation of the SATS system components
- + Perform configuration and calibration activities
- + Learn the foundational operation of the system
- + Comprehend the theory of the SATS Planning system
- + Troubleshoot common issues with the SATS system

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## FLEET G407 SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE FLEET SERVICE TRAINING PROGRAM

The service training will provide the knowledge and skills a candidate must demonstrate to be deemed competent to:

- + Install the Cat MineStar Fleet system on a range of machine types
- + Serve as a Technician for the Fleet system

This training provides insight into:

- + Identifying the components and system configurations of the system
- + Installation and configuration of the Fleet Onboard software
- + Basic operation of the machine onboard system
- + Diagnosing and repairing faults with the Fleet Onboard system

#### TARGETED TRAINING

This training is designed specifically for those in or entering into positions that will support the installation, maintenance, and ongoing operational functionality of the Fleet Onboard systems.

#### LEARNING EXPERIENCE

Trainees will establish a fundamental knowledge of the Cat MineStar Fleet system while participating in hands-on setup, commissioning, and troubleshooting scenarios and exercises to better prepare for real-world situations.

#### INCLUDED COURSE TOPICS:

During the 5 days of hands-on Caterpillar instructor-led practical training, learners will:

- + Gain an understanding of the hardware components that make up the Cat MineStar Fleet Onboard system
- + Demonstrate the hardware and software installation procedures for the system
- + Practice configuration and commissioning of the system
- + Identify and troubleshoot common issues with Fleet Onboard on site and remotely

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## FLEET WITH D6:C10 DISPLAY SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE FLEET (D6:C10) SERVICE TRAINING PROGRAM

The service training will provide the knowledge and skills a candidate must demonstrate to be deemed competent to:

- + Install the Cat MineStar Fleet system with a D6:C10 display on a select range of machine types
- + Serve as a Technician for the Fleet system fitted with a D6:C10 display

This training is designed specifically for those in or entering into positions that will support the installation, maintenance, and ongoing operational functionality of the Fleet Onboard systems.

#### TARGETED TRAINING

This training provides insight into:

- + Identifying the components and system configurations of the system
- + Installation and configuration of the Fleet Onboard software
- + Basic operation of the machine onboard system
- + Diagnosing and repairing faults with the Fleet Onboard system

#### LEARNING EXPERIENCE

Trainees will establish a fundamental knowledge of the Cat MineStar Fleet system while participating in hands-on setup, commissioning, and troubleshooting scenarios and exercises to better prepare for real-world situations.

#### INCLUDED COURSE TOPICS:

During the 3 days of Caterpillar instructor-led practical training, learners will:

- + Gain an understanding of the hardware components that make up the Cat MineStar Fleet Onboard system utilizing the D6:C10 display
- + Demonstrate the hardware and software installation procedures for the system
- + Practice configuration and commissioning of the system
- + Identify and troubleshoot common issues with Fleet Onboard on site and remotely

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## COMMAND FOR HAULING SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE COMMAND SERVICE TRAINING PROGRAM

The service training will provide the knowledge and skills a candidate must demonstrate to be deemed competent to:

- + Install and maintain the Cat Command for Hauling system on a selected machine.
- + Serve as a Command for Hauling Technician

This training is designed specifically for those in or entering into positions that will support the installation, maintenance, and ongoing operational functionality of the Command for Hauling on-board systems.

#### TARGETED TRAINING

This training provides insight into:

- + Identifying the on-machine components of the Command for Hauling system
- + Understanding the functionality of the system and how it integrates with the autonomous operations
- + Diagnosing and repairing faults with the on-board system
- + Performing routine maintenance and calibrations of the on-board system

#### LEARNING EXPERIENCE

Trainees will establish a fundamental knowledge of the Cat Command for Hauling system while participating in operational and troubleshooting scenarios and exercises to prepare for real-world situations

#### INCLUDED COURSE TOPICS:

During this 5-day Caterpillar instructor-led training, learners will:

- + Gain an understanding of the offboard and onboard subsystems that comprise the Cat Command for Hauling system
- + Practice routine calibrations and operational checks of the Command for Hauling system
- + Identify and troubleshoot common issues with Command for Hauling system, both on-site and remotely

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

TERRAIN FOR GRADING AND LOADING SERVICE

## PROGRAM OVERVIEW

### BENEFITS OF THE TERRAIN FOR GRADING AND LOADING SERVICE TRAINING PROGRAM

The Terrain for Grading and Loading Service program provides a Service Technician a complete overview of the components onboard the machine, installation of the hardware, hands on experience configuring the Terrain system, and calibration of the Terrain Onboard system.

Completion of this learning results in:

- + Decreasing the amount of time needed to install and commissioning the technology.
- + Optimization through correct configuration of Terrain Grading and Loading.
- + Increased ability to troubleshoot and correct issues with the Terrain Grading and Loading system.

### TARGETED TRAINING

Understanding how the Terrain components interact with the base machine and Terrain Office. The learner will also deep dive into the process of installing and configuring the system and integrate into the customer production process.

### LEARNING EXPERIENCE

Hands on experience with understanding where to locate all the resources to install and configure the Terrain system. In addition, the learner will have hands on a Terrain simulator to fully understand the system and interact with user interface.

### INCLUDED COURSE TOPICS:

During the 4 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Understand the installation of the Terrain for Grading Loading system
- + Understanding how the Terrain system works, and all the subsystems involved
- + Understand the software installation and configuration of the system components
- + Conduct measure-up, calibration, and validation procedures
- + Perform system specific troubleshooting activities

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## TERRAIN FOR GRADING A5N6 SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE TERRAIN FOR GRADING A5N6 SERVICE TRAINING PROGRAM

The Terrain for Grading A5N6 Service program provides a Service Technician with the knowledge and skills needed to deploy and maintain the Terrain with A5N6 system found on the latest generation of D10 and D11 Dozers.

Completion of this foundational learning results in:

- + Decreasing the amount of time needed to set up and deploy the technology
- + Increased accuracy of the Terrain with Blade Control system
- + Increased ability to troubleshoot and correct issues with the Terrain A5N6 system

#### TARGETED TRAINING

This training is designed to give an in depth understanding of the Terrain system that is unique to the latest generation of D10 and D11 dozers. It is specifically constructed to provide a technician with the relevant information needed to commission and service the system.

#### LEARNING EXPERIENCE

The learning is a combination of theory and hands on experience. Learners will participate in classroom instruction and discussions as well as perform exercises using actual hardware. Activities related to hardware, software, measure-up, and calibration allow the learners to gain real world experience that they can take back to their jobs.

#### INCLUDED COURSE TOPICS:

During the 3 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Identify the factory fit Terrain with A5N6 components.
- + Understand the software installation and configuration of the system components.
- + Conduct measure-up and calibration procedures.
- + Perform system specific troubleshooting activities.

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## TERRAIN FOR DRILLING SERVICE

### PROGRAM OVERVIEW

#### BENEFITS OF THE TERRAIN FOR DRILLING SERVICE TRAINING PROGRAM

The Terrain for Drilling Service Training Program is designed to develop a skilled workforce that teaches technicians the expertise needed to deliver top notch commissioning of the Onboard Terrain for Drilling system. With the knowledge and tools to effectively install the hardware, perform diagnostics, and troubleshoot the onboard system.

Completion of this foundational learning results in:

- + Increased proficiency performing hardware install
- + Increased accuracy of sensors and GPS positioning
- + Tools to troubleshoot and correct issues onboard

#### TARGETED TRAINING

MineStar Terrain for Drilling Service Training Program is designed to develop a technician's expertise and to maximum uptime of your asset. This program provides a detailed introduction into the hardware components, installation best practices, advance configuration, and proactive troubleshooting techniques.

#### LEARNING EXPERIENCE

Learners will be lead through theoretical in-class instruction followed by hands on practical opportunities. Learners will participate in classroom instruction and discussions. In addition, opportunities will be provided to perform exercises using hardware from the Terrain for Drilling System. The learner will have hands on opportunities with a Terrain simulator of the Graphical User Interface to aid in understanding the layout of the terrain software and user experience.

#### INCLUDED COURSE TOPICS:

During the 3 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Understand the installation of an IO and PLC Drill
- + Understand the calibration of an IO and PLC Drill
- + Identify proper GPS calibrations for centimeter accuracy
- + Validate communications onboard to Terrain Office
- + Recognize necessary troubleshooting steps to resolve issues

For more information, email us at:  
[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CONTINUOUS EDUCATION PROGRAMS

# CAT MINESTAR

COMMAND FOR HAULING OFFICE PRACTICAL TRAINING

## PROGRAM OVERVIEW

### BENEFITS OF THE COMMAND PRACTICAL TRAINING PROGRAM

Classroom learning is taken to the next level by enabling trainees to apply hands-on knowledge gained during Caterpillar's Command for Hauling (CfH) SIM School in an active operating environment.

During this program, trainee's will build an active working area, control an AMT and troubleshoot faults to better prepare them for operational duties back on their respective mine site.

### TARGETED TRAINING

The Practical Training Program tests and reinforces knowledge gained in the classroom by having the participants successfully complete specific tasks as outlined by their instructor.

Key topics include:

- + Create and activate a virtual world that replicates the real-world environment
- + Fault find issues with the mine model
- + Assign a real AMT to perform tasks
- + Troubleshoot instructor-initiated faults
- + Correctly respond to emergency situations

### LEARNING EXPERIENCE

The knowledge and experience your new Controller, Builder, and Pit Technicians gain from this program will rapidly increase their ready for work status.

Core to the Command Practical Training Program is learning to understand the importance of productivity efficiencies via:

- + Evaluating real-world scenarios and executing best practices to ready trainees for day one in operation
- + Be challenged with instructor-initiated faults and learning how to deal with them in a timely manner
- + Hands-on practical skills development
- + Area safety checks
- + Pre-operational checks

### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Learning the importance of mine modelling and building principals to ensure safe and efficient operations are maintained
- + Planning, preparing, and validating new work locations on site
- + Assessing equipment recoveries
- + Learning the importance of safe working procedures in and around Station Plans
- + Learning where to look to determine autonomous haul truck faults and issues that may be impacting production targets

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

COMMAND FOR HAULING AUTONOMOUS WATER TRUCK

## PROGRAM OVERVIEW

### BENEFITS OF THE MINESTAR AUTONOMOUS WATER TRUCK PROGRAM

The MineStar Autonomous Water Truck program promotes job efficiency by:

- + Understanding best practices in mine model configuration
- + Understanding key principals of managing watering operations
- + Providing the skills and understanding required for safe and efficient use of the Autonomous Water Truck

### TARGETED TRAINING

This course was designed specifically for all roles responsible for use of the Autonomous Water Truck, focusing on developing the skills needed to maintain efficient operations of the MineStar system. Key topics include:

- + Machine and system setup and configuration
- + Developing the skills required to build components of the virtual mine model
- + Developing an understanding of watering assignment and interaction with other autonomous machine and operations
- + Using real-world examples to discuss and demonstrate common scenarios to ensure production and safety is maintained

### LEARNING EXPERIENCE

Core to the Autonomous Water Truck training program is learning to understand the importance of proper system use to achieve the required watering operation. All training is conducted in a safe virtual simulated environment requiring the trainee candidate to create an evidence portfolio that demonstrates their understanding and capability in working within the MineStar Client.

### INCLUDED COURSE TOPICS:

During the 2 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Learn the fundamentals of the Autonomous Water Truck requirements and capabilities
- + Learning the importance of mine modelling and building principals to ensure safe and efficient operations
- + Plan, prepare, and validate new work locations within a simulated environment
- + Execute autonomous watering operations within a simulated environment
- + Learn the importance of safe working procedures related to Autonomous Water Truck use

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## MINESTAR CONTROLLER USER INTERFACE

### PROGRAM OVERVIEW

#### BENEFITS OF THE MINESTAR CONTROLLER USER INTERFACE PROGRAM

The MineStar Controller User Interface program provides the trainee an in-depth overview of the system panels and functionality of the user interface:

- + Focusing on where new endpoints are managed from the single location
- + Reducing task loading for the Controller
- + Breaking down the unknowns of learning the new platform
- + Refining production assignment working towards maintaining required KPI's
- + Track production, monitor onsite equipment, and manage site operations from the intuitive one touch environment

#### TARGETED TRAINING

The MineStar Controller User Interface Program tests and reinforces knowledge gained from combining the candidates former Sim School training and current on the job practical experience.

This program is built specifically around the Controllers' job role focusing on the Controller integrations with all training is targeted to prepare learners for the role they will be filling on site.

After completing a full review of the user interface, the trainees will be required to work individually on designated production plans where they must be able to meet hourly production and task target KPI's.

Where task target KPI's are not being met, the trainee must be able to correctly identify the reasonings behind the result and provide recommendations on what would be required to do next time to achieve the expected outcomes.

#### LEARNING EXPERIENCE

Trainees are required to work towards achieving production task targets, scheduled assignments, and manage delays based on the provided Day 1 and Day 2 production plans using the MineStar Controller User Interface Simulator. By learning, practicing, repeating tasks, self-diagnosing areas of improvement, and using best practices in a safe simulated environment, learners are better prepared to adopt and fully integrate the user interface into daily operations.

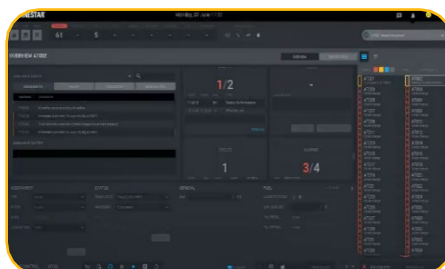

#### INCLUDED COURSE TOPICS:

During the 2 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Learn how to input a production plan into the MineStar Controller User Interface for day-to-day task targets
- + Plan, prepare, and validate information driven from controller checklists
- + Learn production requirements inputs converting from goals to tasks
- + Assess data inputs and outcomes from the assignment engine against system productivity
- + Practice generalized responses to emergency situations
- + Troubleshoot instructor-initiated faults
- + Learn the new practices of calling and sending trucks in and around Stations
- + Learn where to look to determine autonomous haul truck faults

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## MINESTAR PRODUCTION MONITORING PROGRAM

### PROGRAM OVERVIEW

#### BENEFITS OF THE CATERPILLAR MINESTAR PRODUCTION MONITORING (SURFACE) TRAINING PROGRAM

The Caterpillar MineStar Production Monitoring Program (Surface) promotes education and familiarization to aid leaders in monitoring and auditing production key performance indicators, utilizing MineStar system tools to trigger and act upon production and process inefficiencies.

#### TARGETED TRAINING

This course was designed specifically for those in leadership roles, focusing on a high-level overview of the tools needed to monitor efficient operations of the MineStar system. Key topics include:

- + Optimized assignment visualization
- + Optimized page configurations to highlight and troubleshoot production issues
- + Proactive system monitoring and auditing
- + Efficiency improvement
- + Auditing visualization

#### LEARNING EXPERIENCE

Core to the MineStar Leader Program is understanding:

- + Goal validation
- + Assignment logic
- + Trucking indication
- + Correct mine model management
- + Monitoring of operational performance

#### ADDITIONAL APPLICATIONS

- + Enhance staff understanding
- + Refresh skills for previously trained personnel

#### INCLUDED COURSE TOPICS:

During the 2 days of extensive hands-on Caterpillar instructor-led practical training, learners will:

- + Focus to highlight pages within MineStar to aid in auditing and monitoring the mine model for areas of possible process and efficiency improvements
- + Understand how to identify speed and traction restrictions
- + Manage the virtual mine model
- + Monitor Fleet efficiencies
- + Understand how to monitor in real-time Fleet efficiencies against production KPI's
- + Utilizing CAT web pages

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## MINESTAR ASSIGNMENT PLANNER AND PRODUCTION CIRCUITS

### PROGRAM OVERVIEW

#### BENEFITS OF THE ASSIGNMENT PLANNER TRAINING PROGRAM

The Assignment Planner and Production Circuits course discusses the relevant tools, methodologies, and best practices which enable customers to achieve their site production objectives.

Participants explore the Builder, Controller, and Specialist perspectives through a series of practical scenarios within a simulated MineStar environment.

The course includes common troubleshooting use cases and provides an overview of the Assignment Planner phased implementation strategy.

#### TARGETED TRAINING

This course is designed for the Intermediate to Advanced level users of the MineStar Office system, with prior exposure to the Controller, Builder, or Application Specialist job roles.

The content is focused on enhancing and refreshing the skills needed to achieve conformance to the daily plan requirements while lowering the operating costs.

#### LEARNING EXPERIENCE

Core to the Assignment Planner and Production Circuits training experience is:

- + Overview of the key Assignment Planner terms, architecture, and logic
- + Description of the core mine model maintenance tasks to enable efficient operation of the truck assignment algorithm
- + Discussion of the common tools and methodologies used during execution of the Plan-Do-Check-Act control process
- + Overview of the main Assignment Planner and MineStar Office configuration settings to improve efficiency of the system
- + Summary of the troubleshooting tools and methodologies in the context of the common production challenges

Practical exploration of the various scenarios in a MineStar Office simulated environment enables the learners to apply the concepts to own procedures and site best practices.

#### INCLUDED COURSE TOPICS:

During the 2 days of extensive hands-on Caterpillar instructor-led practical training, learners will cover:

- + New features and improvements in Assignment Planner and Production Circuits
- + Assignment Planner Hierarchy and logic for haulage prioritization
- + Mine model maintenance requirements for site Builders
- + Control tools and methodologies, including troubleshooting of common Assignment use cases
- + Best practices for machine priorities and production goals
- + Core Assignment Planner configuration options and the phased implementation process

For more information, email us at:

[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

# CAT MINESTAR

## MINESTAR SYSTEM ADMINISTRATION AND TROUBLESHOOTING

### PROGRAM OVERVIEW

#### BENEFITS OF THE MINESTAR SYSTEM ADMINISTRATION TRAINING PROGRAM

The MineStar System Administration and Troubleshooting program enhances expertise of the key technology support staff by discussing best practices and processes in the following areas:

- + MineStar system architecture and infrastructure components, including design patterns for effective change management in Fleet and Command
- + Core tools and methodologies for troubleshooting of system stability and performance incidents
- + System restoration best practices and validation methodologies after restart
- + Core network communication patterns, including Failure Mode Effects Analysis and common troubleshooting methodologies

#### TARGETED TRAINING

This course is designed for the MineStar Office users who specialize in the system administration, support, and troubleshooting tasks. The content is focused on enhancing the skills needed to effectively contribute to the site production objectives by maximizing application availability and performance.

#### LEARNING EXPERIENCE

Core to the learning experience are the following aspects of training:

- + Hands-on deployment of the MineStar Office training environment with an SQL Server database instance
- + Baselining of the System Administrator's skillset using checklists, procedures, and guidelines
- + Illustration of concepts with common failure modes in mining production environments
- + Overview of the production context, support platforms and procedures, additional sources of information, and documentation

#### INCLUDED COURSE TOPICS:

During the 5 days of extensive hands-on Caterpillar instructor-led practical training, learners will cover:

- + MineStar system architecture and core infrastructure components
- + Proactive system monitoring guidelines and best practices
- + System restoration and validation prior to handover to production
- + Network communication patterns and core troubleshooting methodologies
- + System log review process and performance visualization toolbox

For more information, email us at:  
[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)

## MINESTAR SITE SUPPORT

### PROGRAM OVERVIEW

#### BENEFITS OF MINESTAR SITE SUPPORT

Our Site Support Program is designed to support your project in two main areas:

1. Elevate your staffs training experience by integrating real-world environments, situations, and techniques. This approach ensures that classroom-based learning is seamlessly applied in practical settings, providing ongoing support to reinforce concepts and skills.
2. Provide support to your project by auditing the skillsets of your Control Room and Pit Technician teams. Auditing is aimed to identify strengths and weaknesses of your personnel allowing continuous improvement opportunities ultimately leading towards productivity and efficiency improvements.

#### KEY FEATURES

The program targets:

- **Real-World Applications:** Utilizing actual and familiar work environments to take training beyond simulation and into reality.
- **Post-Training Follow-Up:** Ensures continuous development by offering real-world follow-up to classroom training, enhancing retention and skill transfer.
- **Quality and Efficiency Monitoring:** Maintains high standards through regular assessment of performance and efficiency.
- **Coaching Opportunities:** Provides targeted coaching for both staff and leadership, fostering growth and development.
- **Performance Review and Reporting:** Review and report on site performance, identifying areas for improvement, and ensuring consistent operational success.

#### LEARNING EXPERIENCE

By merging classroom learning with on-site application, we look to ensure your new teams remain engaged, knowledgeable, and prepared for real-world challenges. Auditing your existing experienced personnel highlights and identifies any poor practices that may have crept in and strengthens the teams skillsets by reinforcing areas that have been lost due to dilution of knowledge issues.

#### INCLUDED COURSE TOPICS:

Extensive hands-on Caterpillar mentoring, coaching, and assessing, tailored to suit your needs and rosters:

- + Gain invaluable insight into your Control Room and Pit Technician teams overall understanding of the Command system and procedures
- + Have the ability to clearly identify strengths and weaknesses in teams enabling the opportunity to look at options in strengthening each teams skillsets
- + Gain an insight as to what future training planning may be required to further strengthen your teams with the ultimate goal to improve productivity

For more information, email us at:  
[MineStar\\_Training@cat.com](mailto:MineStar_Training@cat.com)
