

Prepare for care

Guided Health Advisor

Ways this program can help you and your family

Have an easier transition

Before, during and after your assignment abroad, you and your family can receive the support needed to stay healthy and address any medical conditions along the way.

Our Guided Health Advisor¹ program is designed to help you prepare for care whenever and wherever to avoid medical emergencies and ensure a successful assignment.

Plan for any medical needs

- Will my prescription and over-the-counter medications be readily available, and what is the name in that country?
- Do you or a family member have any medical conditions?
- How do I find care, even on the weekends and what can I expect?

Answers to these questions could impact your health while on assignment. Guided Health Advisor can provide you with valuable information to help build a plan and protect the health of you and your family while abroad.

Be prepared

Health care is not the same in every country – it can vary greatly across the globe. You can learn more about your existing or new location by using the country guides. A nurse can help you plan ahead and give you information about accessing health care, whether medications are available in your assignment country or if alternatives may be necessary, as well as how to find a doctor.

No two people are alike. That is why it is vital that you receive information specific to your condition. Our qualified Cigna Healthcare nurses can give you personalized feedback and advice based on your specific needs and health history.

We help your family too

Whether your family is coming with you or staying back home, they can also be included in the program and even speak with a nurse regarding any medical or medication concerns.

It only takes 10 minutes!

If you are identified as having a medical condition, a Cigna Healthcare nurse may reach out to you to offer confidential assistance on how best to be prepared before or during your international assignment and answer any medical questions you may have.¹

Global Health Benefits

Case study

Julia³, on assignment in the UAE

After completing our Guided Health Advisor program, Julia was identified with a medical condition and would require assistance obtaining her medication in the UAE. A Cigna Healthcare nurse contacted her to help her create a plan for obtaining her medication while on assignment.

The nurse assisted by:

- Researching the availability of Julia's medication in the UAE
- Identifying doctors in the UAE for consultation
- Liaising between the doctor in her home country and the doctor in the UAE to facilitate medical records
- Coordinating with our medical team in the UAE for alternative options

The medication and the medical specialist needed were not available in the UAE. The nurse communicated with Julia's doctor in her home country to arrange for telehealth sessions⁴, the first of which would be soon after her arrival at her destination to support her during transition. They also helped by providing information on medication shipment and customs.

Thanks to the support of Guided Health Advisor, Julia was able to continue seeing her doctor and receive her medication, avoiding any issues. Her nurse also helped with planning her next doctor's visit and medication refill upon her return.

1. Please note that Guided Health Advisor is not linked to your insurance coverage and we are therefore unable to confirm what specific benefits may or may not be covered under your policy. Once you have your Cigna Healthcare global ID number you will be able to verify specific benefit coverage by simply contacting Cigna Healthcare at the number located on your Cigna Healthcare global Identification card. 2. Please note that this is a U.S. number. If members who are abroad utilize this option, then they may incur messaging and data rates. 3. This example is for illustrative purposes only. It is not an actual Cigna Healthcare customer experience. 4. Telehealth services are provided by an independent third party company/entity and not by Cigna Healthcare. Providers are solely responsible for their treatment and services. This service does not replace the advice of their personal doctor. Not all providers have video chat capabilities and services may not be available in all areas.
