TOWING

Overview

Founded in 1995, ETT is a specialist engineering and manufacturing company delivering world-class specialised support equipment for mining and construction industries. With a global footprint spanning more than 28 countries, ETT engineers innovative, purpose-built solutions that enhance safety, productivity, and operational performance in the world's toughest environments.

CATERPILLAR OEM SOLUTIONS

ETT 150T LOWBED TRAILER / RECOVERY

ETT 150T Lowbed Trailer and R150 Recovery Gooseneck combine to form a versatile combo unit for the safe, efficient recovery and transportation of tracked and wheeled equipment across demanding mining and construction sites.

The interchangeable gooseneck works independently for on-site recovery of large mining trucks or with the lowbed trailer.

Available in rear- and side-loading configurations, ETT Lowbed Trailers feature fast 3-minute rear loading, a 5° continuous ramp angle to prevent rocking, ISO 3450 certified braking, OEM wet disc brakes, and a single axle design for best-in-class turning circle. Robustly built for dependable performance.

Anti-Jackknife System

ETT's Anti-Jackknife System is an integrated automatic safety system designed to prevent a jackknife event from occurring during operation. The system works by measuring the loads exerted on the truck by the lowbed, and then applying a proportional amount of braking to the lowbed axle. Should the system detect that the lowbed is pushing the truck with a force greater than the allowable threshold, the system automatically starts to apply the lowbed brakes to reduce the pushing force from the lowbed.

Rigid Frame Truck Towing

ETT manufactures the 150T lowbed trailer / recovery for Cat rigid frame off-highway bare chassis.

CAT® MODEL COMPATIBILITY:

» Cat 777 through 793 Off-Highway Truck Bare Chassis

OEM CONTENT:

» 150T Lowbed Trailer / R150 Recovery Gooseneck Combo Unit
» ISO 3450 certified braking
» OEM wet disc brakes
» Single axle design
