THE NEST TABLE SERIES

THE NEST TABLE SERIES

Designed by Todd Bracher, Nest is a comprehensive collection comprised of functional occasional tables created to enhance social connection and nurture collaboration. Nest guest and lounge seating enhance the versatility of these tables; the combination offers a refined solution easily adaptable to many environments. Functional tables are available in two heights and feature an exquisite polished stainless steel metal base. Satellite tables are standard with a metal or maple wood base.

The coffee table, on 20", and collaborative table, on 28", may be specified with 42" or 48" diameter maple, solid surface or laminate top surfaces.

When used in groups, Nest seating and tables are shaped to allow a strong relationship with other participants. The combination of Nest seating with the tables expand the usefulness of this collaborative area.

03

"Nest is about relationships...relationships we have to each other, technology and communication"...Todd Bracher

02

The generous seat proportions of Nest seating accommodate the user in various situations, from relaxed postures to working positions. The metal base satellite table, when "nested" into the seating area, creates an impromptu personal space or a functional collaborative arena.
