## OPTION OVERVIEW

### FSC\* CERTIFICATION

- X = No FSC\*
- F = FSC\* Certified (upcharges apply)

### FSC\* PRODUCT

HBF holds Forest Stewardship Council® (FSC®) Chain-of-Custody Certification® (SCS-COC-002143). This certification agreement allows HBF to offer FSC® certified veneer or core on a project specific basis.

An upcharge of 5% list per unit for conference products, will apply to all FSC® specified units.

### FINISH

See References: Materials & Finishes

### BASE STYLE

- |  |  |
|--|--|
| FPA = Flip Top, Polished Aluminum Base | FXPA = Fixed Top, Polished Aluminum Base |
| FBL = Flip Top, Black Powder Coat Base | FXBL = Fixed Top, Black Powder Coat Base |
| FWI = Flip Top, White Powder Coat Base | FXWI = Fixed Top, White Powder Coat Base |
| FLG = Flip Top, Grey Powder Coat Base  | FXLG = Fixed Top, Grey Powder Coat Base  |

### FOOT

- C = Casters *Note: Base Finish selection dictates caster selection*
- G = Glides

### MODESTY

*Note: Modesty Panel material and finish matches top material and finish*

- MN Modesty Panel - No
- MY Modesty Panel - Yes (upcharges apply)

### GROMMET

*Note: Upcharges apply*

- 72" Cord - "Soft Cord": Standard 3/8" rubber coated power cord with three prong plug.
- 72" Whip - "Hardwired": Flexible metal conduit housing the wires, which are exposed without a plug, to be professionally installed into the buildings power system. *Please check with the local authorities for compliance with the electrical requirements in your market, and always use a certified electrician for the installation.*

- GN = Grommet No
- AGC1 = Costa Alum Hinged Grommet - Standard flip top pass through grommet.
- ABC1 = Costa Corded Dean-Z-72" cord, Black - Dean-Z Black module with soft cord that offers 2 power receptacles & 1 Dual USB outlet
- AWC1 = Costa Corded Dean-Z-72" cord, White - Dean-Z White module with soft cord that offers 2 power receptacles & 1 Dual USB outlet
- ABH1 = Costa Hardwired Dean-Z-72" whip, Black - Dean-Z Black module with hardwire that offers 2 power receptacles & 1 Dual USB outlet
- AWH1 = Costa Hardwired Dean-Z-72" whip, White - Dean-Z White module with hardwire that offers 2 power receptacles & 1 Dual USB outlet
- ABC2 = Costa Corded Axil-Z-72" cord, Black - Axil-Z Black module with Soft Cord that offers 2 power receptacles, 1 Dual USB outlet, & 1 Open Data Port
- AWC2 = Costa Corded Axil-Z-72" cord, White - Axil-Z White module with Soft Cord that offers 2 power receptacles, 1 Dual USB outlet, & 1 Open Data Port
- ABH2 = Costa Hardwired Axil-Z-72" whip, Black - Axil-Z Black module with Hardwire that offers 2 power receptacles, 1 Dual USB outlet, & 1 Open Data Port
- AWH2 = Costa Hardwired Axil-Z-72" whip, White - Axil-Z White module with Hardwire that offers 2 power receptacles, 1 Dual USB outlet, & 1 Open Data Port
- ABL3 = Costa Corded MHO-72" cord, Black - MHO Black retractable module with Soft Cord that offers 2 power receptacles, & 2 Open Data Ports
- ASV3 = Costa Corded MHO-72" cord, Silver - MHO Silver retractable module with Soft Cord that offers 2 power receptacles, & 2 Open Data Ports

**HOW TO SPECIFY**

HBF's Costa Table Series has been designed to address the needs of the constantly changing multi-purpose conference area. This simple, intuitive design enables the user to manage efficiently the everyday demands of setting up and reconfiguring a meeting room. The nesting feature and flip top provide a quick transition to storage and minimization of space. Exquisite polished aluminum legs lend character and distinction to today's conference, meeting and training areas. Costa provides reconfigurable modularity and flexibility of use.

**STEP 1  
SELECT  
SHAPE | SIZE**

Rectangular

24 x 60 30 x 78  
 24 x 66 30 x 84  
 24 x 72 36 x 60  
 24 x 78 36 x 66  
 24 x 84 36 x 72  
 30 x 60 36 x 78  
 30 x 66 36 x 84  
 30 x 72

Radiused Corner

24 x 24  
 30 x 30  
 36 x 36

**STEP 2  
FSC® CERTIFICATION**

FSC® CERTIFICATION

X = No FSC®  
 F = FSC® Certified (upcharges apply)

**STEP 3  
SELECT FINISH**

Costa tables are available in a choice of veneers and finishes or various laminates. Please see Materials & Finishes on pages 4-17 for finish lists and option codes.

*The remainder of this process on the following page does not apply to Radiused Corner Tables.*

**STEP 4  
SELECT  
BASE STYLE**

Costa tables are available with a fixed or flip top. The flip top incorporates a mechanism that allows the table to transition quickly to storage and minimization of space. Costa metal bases incorporate wire management capabilities.

FLIP TOP

FIXED TOP

BASE STYLE

FPA = Flip Top, Polished Aluminum Base  
 FBL = Flip Top, Black Powder Coat Base  
 FWI = Flip Top, White Powder Coat Base  
 FLG = Flip Top, Grey Powder Coat Base

FXPA = Fixed Top, Polished Aluminum Base

- ASV3 = Corded MHO-72" cord, Silver

## GRAIN DIRECTION

Rectangular

## GRAIN DIRECTION GANGING CONFIGURATIONS

Configuration 1

Configuration 2

Configuration 3

## TABLE GANGING

Costa tables are available with an optional ganging device used to connect multiple tables. The ganging device swivels out of the way when not in use.

Costa tables are pre-drilled and include inserts to accept ganging devices, but they must be ordered separately.

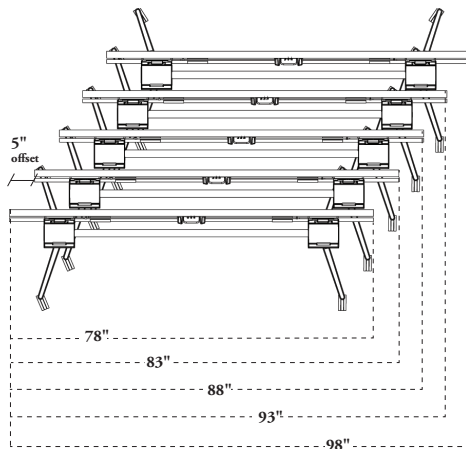

FLIP TOP,  
NESTING

To address the needs of the constantly changing multi-purpose conference area, Costa provides reconfigurability, modularity and flexibility of use. The simple, intuitive design enables the user to manage efficiently the everyday demands of setting up and reconfiguring a meeting room. The nesting feature and flip top options provide a quick transition to storage and minimization of space.

The nesting mechanism releases the flip top and allows it to tilt and lock into place. The locking feature latches the table top into the nesting position. Integral bumpers protect tables when in nested position.

**Nested Tables, Top View**  
(Dimensions based on 78" tabletop)

NOTE: 5" width offset per table

**Nested Tables, Side View**

NOTE: 8" depth offset per table

TABLE BASE DEPTH	
24" depth tables	x = 23.75
30" depth tables	x = 29.75
36" depth tables	x = 29.75

GROMMET  
LOCATIONS

Costa tables can be specified to include an aluminum grommet or one of several power / data units. The drawing below indicates the standard table top surface placement for the units. The units are always centered, as shown, with distance from edge determined by top shape.

Rectangular

WIRE  
MANAGEMENT

The Costa extruded metal horizontal support beam includes a plastic wire manager when a power/data unit or grommet is specified. The polished aluminum leg incorporates wire management capabilities by means of a removable vertical leg cover. The leg channel serves to conceal power/data cords; the opening at the base of the extruded leg allows plug passage to external power/data sources.

**ELECTRICAL SYSTEM**

Costa Tables are available in 3 electrical in-feed options: corded standard plug, hardwire with quick disconnect, or hardwire. Installation and use of electrical systems, the number of receptacles per circuit, and connections to the building power supply should be in compliance with all local and national electrical codes. Verify code requirements before ordering. Wire harnesses and snap connectors are not allowed in Chicago. Customer must furnish electrical wiring components in cases where the Costa electrical system does not meet code.

The ports offered in Costa Tables can plug directly into a floor or wall outlet. However, if you plan to daisy-chain the tables or don't have access to power for each of the tables you can order the electrical system based on Byrne 4-Trac in addition to the ports or grommets. All the components of this system are UL listed (UL 183) with the exception of the standard plug power in-feed that is UL recognized (UL 1286).

All flexible parts are metal conduit with the exception of the last section of the power in feed with plug.

Please check with the local authorities for compliance with the electrical requirements for your market and always use a certified electrician for the installation.

**HOW TO ORDER**

1. Determine the required amps for the setup and decide if you are going to use one or two circuits. You need to use a certified electrician for circuit load estimates and install.
2. Select the Modular Power units for each of the tables. If you use 2 circuits order "Duplex Circuit 2", two per table and replace the "Circuit 1 duplex" that ships standard with the Modular Power on half of the total number of tables.
3. Select a power in-feed (plug, hardwire, rotating entry).

**4-TRAC SYSTEM**

The 4-Trac electrical system is rated for 20amp per circuit however, according to the National Electrical Code for continuous use, one should budget for 16amp per circuit. The total length of the circuit should not exceed 300" and 13 duplexes. However, some units such as projectors, desktop computers and monitors can draw more current and limit further the number of units you can plug in a circuit. Please consult with your local electrician to determine the best solution for your needs.

**POWER IN-FEED**

Power In-feed allows you to bring power from a floor or wall mounted power box. All of the 3 solutions below do not restrict the tables to connect in a certain sequence:

**POWER IN-FEED HARDWIRE**

This unit has 4-wires at one end and a modular connector at the other end.

The modular end connects to a duplex receptacle installed under the table top. This is a 20 amp, 2-circuit unit.

**ROTATING POWER IN-FEED WITH QUICK DISCONNECT**

This unit replaces a wall outlet to allow for quick disconnect from the wall. Can be used in place of the power in-feed hardwire if the code requires a hard wire connection to the building. This is a 20 amp, 2-circuit unit. Includes a 72" jumper, which connects to a duplex receptacle installed under the table top.

**POWER IN-FEED WITH PLUG**

This unit has a standard plug at one end and a modular connector at the other end. The modular end connects to a duplex receptacle installed under the table top. This is a 20 amp, 1-circuit unit; it will not fit in a 15 amp power outlet.

**4-WIRE H CONNECTOR**

This unit can be used when you need to bring power to a series of daisy chained tables somewhere else than at the ends of the chain. This acts as a T-splitter and connects to 3 jumpers (two from the tables and one from the power source). This is usually used in conjunction with one of the 3 power solutions listed above.

**JUMPER**

Is used to connect: table-table, table-corner-table, H-connector to rotating power in feed.

**MODULAR POWER**

Attaches under the table top and stays with the top when the table is moved, flipped or nested. The unit has a power duplex at each end. The standard configuration is Circuit 1 only. Using a single circuit allows for non-sequential configuration but reduces the number of tables that can be daisy chained. If you need to connect more tables that share a single power in-feed you need to alternate the tables to include Circuit 2 (e.g. 4 tables in a row will be configure as follows: Table 1 C1, Table 2 C2, Table 3 C1, Table 4 C2). To alternate circuits you can buy the standard Modular Power for the table size you need and then buy separate Circuit 2 duplexes (you need 2 per table) and replace these in the field. You would also need to keep track of the tables sequence to make sure you alternate Circuit 1 and 2 – the tables become sequential now.

---

## veneers

Costa tables are offered in 5 natural wood species; Ash, Cherry, Maple, Walnut or Oak veneer. All exposed wood surfaces utilize select Plain Sliced Ash, Oak, Cherry, Maple, Walnut veneers or premium Quarter Sliced Ash, Oak, Cherry, Maple, Walnut and Rift Cut Oak veneers. These veneers are carefully selected and slip matched to assure balance and consistency throughout the product.

---

## WOOD TOPS

Wood veneer tops feature a balanced 3-ply construction and are 1 5/16" thick. Tops are constructed of 45 lb particleboard, faced with veneer and backed with a polymer resin impregnated moisture resistant backer material. Tops are externally edge banded with 3/32" solid hardwood band on all sides. Standard square edge profile. Bottom of tops are pre-bored for base attachment locations and include threaded steel inserts to mount removable ganging hardware.

---

## LAMINATE TOPS

Laminate tops feature a balanced 3-ply construction and are 1 3/16" thick. Tops are constructed of 45 lb particleboard, faced with high pressure vertical grade laminate and backed with phenolic backer material. All laminate tops have a 3mm matching vinyl edgeband on all sides. Standard square edge profile. Bottom of tops are pre-bored for base attachment locations and include threaded steel inserts to mount removable ganging hardware.

Wood grain laminates have been selected because they are good matches to some HBF standard wood finishes. Although these are good matches, they are not exact matches. HBF does not guarantee an exact wood finish match to the plastic laminates. Please check with a HBF sales representative for samples of both the wood and laminate for color comparison.

Wilsonart laminate tops feature a 0.030" thick, Type 335 high pressure vertical grade Wilsonart laminate. For complete Wilsonart technical specifications please refer to the Wilsonart website at <http://www.wilsonartcontract.com/Technical/>

Pionite laminate tops feature a 0.028" thick, Type F28 high pressure vertical grade Pionite Laminate. For complete Pionite technical specifications please refer to the Pionite website at [http://www.pionite.com/pionite/pages\\_pionite/pionite\\_specs.html](http://www.pionite.com/pionite/pages_pionite/pionite_specs.html)

---

## MODESTY PANELS

Modesty panels are optional and can be specified in wood or laminate; however, material and finish will match top. Modesty panels feature a balanced 3-ply construction and are 3/4" thick. Wood panels are constructed of 45 lb particleboard with veneer on both sides. All edges banded with veneer. Laminate panels are constructed of 45 lb high pressure vertical grade laminate on both sides. All edges finished with matching bands. Modesty panel connects to bottom of the worksurface with a hinged metal steel bracket which allows the panel to pivot and remain in a vertical position when the table is flipped up for nesting.

---

## BASES

All bases are available with a fixed or flip top. The flip top base includes a single handle that activates a plastic coated steel cable connected to a folding mechanism that allows the top to pivot 90-degrees to facilitate nesting. The mechanism locks the top in the horizontal and vertical position and the handle must be compressed to unlock. The lower horizontal foot is a polished aluminum casting. The vertical leg section and the horizontal beam that ties the two bases together are extruded aluminum with a polished anodized finish.

The inside of the vertical leg incorporates a removable vertical leg cover that snaps on the leg to manage wires. This channel serves to conceal power/data cords. An opening is located at the top and bottom of the cover to provide clearance for cords to pass out of the leg channel.

The aluminum horizontal support beam has channeled grooves that allow a plastic wire management channel to be easily snapped in for wire management.

The bases are offered in 3 1/8" diameter casters with standard locking.

The table ships KD and requires field installation.

**CORNER UNITS** Corner units are designed to be used in conjunction with rectangular tops. The 90 degree corners are attached in the field with metal steel brackets and threaded knobs that attach to the steel inserts on the bottom of the worksurface for easy removal without tools. Connection hardware included with corner unit.

**GROMMETS** Optional 3 5/8"D x 5"W rectangular grommet. Grommet bezel is inset flush to top of worksurface. Includes a hinged door that is on a dampening hinge for smooth open/close.

**POWER / DATA** Optional power / data unit is 4 7/16"D x 8 5/16"W, silver clear anodized aluminum finish. Unit includes a 6-ft, 15 amp standard plug-in power cord, (2) electrical outlets and (2) voice/data openings. Voice/data communication adapter kit included. Adapter kit allows for a variety of jacks to be field installed including RJ11, RJ45, USB, VGA, etc. Unit is field installed. UL Listed. Note: voice/data jacks not included.

**WOOD FINISH** All HBF tops feature an open pore, water based, UV cured low-emitting finish. The open pore finish accentuates the natural texture of the wood. All non-writing surfaces (modesty panels) receive an application of low-emitting, conversion varnish finish. Both processes enhance the beauty of the natural wood and ensure the depth, clarity, color consistency and durability throughout the life of the product.

**CLEANING WOOD** Dust with damp cloth. Remove fingerprints or soiling with mild solution; 3 parts water with small amount of mild dish detergent. Apply solution with spray bottle, wipe clean and dry with soft cloth. Note: Do not use furniture polishes containing oil, wax or silicone, which can produce an oily film or haze.

**CLEANING LAMINATE** To clean the surface, use a damp cloth or sponge and a mild soap or detergent. For complete Care and Maintenance instructions go to [www.wilsonartcontract.com](http://www.wilsonartcontract.com) or [www.pionite.com](http://www.pionite.com).
