

Tungsten Carbide Saw Tipping Products

Kennametal is a world-class manufacturer of cemented tungsten carbide and Stellite™ products used throughout the wood industry. Through our innovative solutions and services, we continually deliver productivity, reliability, and extended life in the most demanding environments.

Inch and Metric Sizes

Edger Tips

- Pre-tinned (brazing alloy)
- Pre-sharpened — only available pre-tinned
- Untinned — CTR* treated (ready to braze)
- Alternate top bevel (10–30°) — only available pre-tinned

Strobe Blanks

- Pre-tinned (brazing alloy)
- Untinned — CTR* treated (ready to braze)
- STB's and reamer blanks

Pre-Tinning Characteristics

- All tips are pre-tinned in-house using premium cadmium-free silver solder.
- Each tip must pass two separate 100% inspection procedures.
- Controlled quality of pre-tinning with perfected proprietary process.
- *CTR is our treatment that prepares the tip's surface for brazing, and ensures the highest bond strength possible.

Custom grades, styles, and sizes are available on request.
