

ROAD KING DIAMOND FLEX™

RKD Flex
ROAD KING DIAMOND FLEX

The **NEW** Road King Diamond Flex combines the strength and durability of Polycrystalline Diamond (PCD), known throughout the industry to deliver maximum road milling performance, with the flexibility of Road King.

BENEFITS OF PCD:

- Enhanced machine performance.
- Reduced fuel consumption.
- Decreased change-outs downtime.
- Extended service and maintenance cycle vs. carbide tools.
- Consistent surface finish over the entire tool life.

BENEFITS OF ROAD KING:

- Road King Diamond Flex also includes the flexibility of a conventional tool. By combining the benefits of PCD with a rotating shank, you gain ultimate flexibility, no matter the road condition.
- Road King Diamond Flex is designed to minimize the impact of varying jobsite conditions. This new tooling minimizes downtime for tool changes, providing ultimate control to manage your operation.

**DESIGNED TO
MINIMIZE THE IMPACT
OF VARYING JOBSITE CONDITIONS**

RKD Flex
ROAD KING DIAMOND FLEX™

Road King Diamond Flex™

The benefits of PCD combined with the flexibility of fast and easy change-outs reduces overall cost of ownership.

RKD Flex

- Heavy-duty body-wear protection
- Interchangeable with current WC Tools
- Rotating and self-sharpening

PCD Applications

- Mainline Milling
- Larger Highway Projects
- Asphalt
- Versatility — Incidental Concrete, Underground Obstruction Contact

**COMPATIBLE WITH ALL
CURRENT STANDARD MOUNTS**
