Electronic Deadbolts and Levers with Home Connect

Kwikset

HomeConnect

CONNECTED SMART LOCKS

HOMEOWNER BENEFITS

Kwikset locks with Home Connect provide a smarter way to expand security and home automation systems to a complete line of wirelessly enabled door locks. Control the lock from anywhere using a smart phone, tablet, or internet connected device through the security/home automation system app.

HomeConnect™
CONNECTED SMART LOCKS

Remote Locking and Unlocking

Notifications of Lock's Activity

Access Control

Integration with Other Smart Devices in the Home

KEYLESS ENTRY

A key-free lifestyle means no more fumbling for keys, no more losing keys, no more lockouts. With customizable user codes, homeowners can enter their home with just a few simple pushes of a button. Homeowners also get more control over who has access to the home. Kwikset electronic locks can store multiple user codes and can be scheduled to allow access at pre-selected times and recurrences.

REMOTE ACCESS

Homeowners can access and manage their lock from anywhere for ultimate control over their security and peace of mind. With Kwikset electronic locks, homeowners can lock and unlock doors from anywhere with an internet connected device, receive notification alerts of lock activity, and check the status of the lock while away from home.

HOME MANAGEMENT

Kwikset locks with Home Connect technology speak to the security system or home automation controller, allowing homeowners to set-up scenes and trigger events. From arming/disarming the alarm, to lights turning off/on, and the thermometer adjusting to the right temperature, it all starts with the Kwikset lock.

BHMA CERTIFIED

ANSI/BHMA* Certification requires that products are tested and audited, leading to higher design specifications and manufacturing procedures for operation, key torque cycles, pull strength, impact resistance, and finish. All Kwikset electronic locks and smart locks are certified to meet or exceed ANSI/BHMA requirements.

* ANSI/BHMA is an independent industry organization that certifies builders hardware product

SMARTKEY SECURITY

SmartKey Security™ provides strong resistance against advanced forced entry techniques. It also allows you to re-key the lock yourself so all your Kwikset locks share one key.

DEALER BENEFITS

Selling on the benefits of incorporating access control

Safety & Security

Remote Access Control

Everyday Convenience

Connected Lifestyle

"While You Were Out"
Peace Of Mind

There are many drivers for why incorporating connected locksets into your customers total security solution will provide otherwise unseen benefits – it's up to you to understand what will motivate a particular homeowner. This understanding will lead to a mutually beneficial scenario for everyone – the customer has been given something of added value to their home life and your business has grown because of it. What does the connected lock mean to you?

INCREASE SYSTEM USAGE
The end consumer may not interact with their security panel on a daily basis, however what they will interact with is their entryway. By creating direct links from your lockset to your security panel, you are creating a lifestyle in which the system is being used on a regular basis.

INCREASE RMR
By building varying levels of custom packages (think Good, Better, Best scenarios) that deliver desirable system features and benefits via the products that are included, you can help drive movement towards increased RMR.

INCREASE CUSTOMER RETENTION
By delivering a lifestyle in which the end consumer is interacting with their smart devices on a daily basis and coming to rely on the routine benefits provided, they have now entered the mindset where life any other way is unimaginable, turning customer retention into an automatic transaction.
PROVIDE THE TOTAL SECURITY SOLUTION
Integrating a connected lockset is no longer just about access control. By creating connections, or scenes, from the lock to other devices in the home such as doorbells, video cameras, alarm panels, thermostats, lighting and more, you are providing a total home security solution that protects what matters most.

The Kwikset® HomeConnect® 620 combines cutting-edge Z-Wave technology and seamless smart home system integration to deliver a streamlined and secure smart locking experience to today's tech-savvy homeowners. Z-Wave 700 Long Range ensures a direct connection between your hub and lock, no matter where they're located in the home. The contemporary design complements homes with a modern décor.
