OPERATING INSTRUCTIONS

1. Unscrew the back with slotted screwdriver, open the battery cover and insert battery with (+) positive side up. The LCD will now display the current room temperature and humidity.
2. Using the suction cups provided, attach the display unit to the outside of the terrarium.
3. If the LCD displays 32°F and 10%, temperature reading is equal to or lower than 32°F(0°C) and humidity reading is equal to or lower than 10%.
4. If need to switch between Fahrenheit and Celsius, please use thimble to press the C/F switch button on the back.

SAFETY INSTRUCTION AND MAINTENANCE

- 1.If temperature and humidity display is not clear, please replace the battery in time.
- 2.Regularly check if the suction cup is stable.
- 3.When the thermo-hygrometer is not used for a long time, please remove the battery.
4. Please wipe the probe with a clean dry cloth if there is any dust on it.
5. The probe is not waterproof. DO NOT spray or wash the probe with water directly. Splashing or immersion in water will cause the probe value to be inaccurate or damaged.

WARNING: Contains button cell battery. Hazardous if swallowed. If a button cell battery is ingested, immediately seek medical attention. Do not allow children to play with button cell batteries and keep button cell batteries out of your child's reach.
