Galaxy J7 V

Efficiency and productivity for every enterprise.

An affordable phablet for work.

With a large 5.5" screen and a fast processor, the Samsung Galaxy J7 offers exceptional value, along with enterprise features and functionality that can empower every workforce to work better.

Get more done quickly and easily.

Easy-to-See 5.5" HD display.¹ The large 5.5" HD display with multi-window capability lets you easily view documents, images and videos, as well as view two apps simultaneously.

Power to work quickly. With a high-performance Octa-Core application processor and 2GB RAM, your workforce will enjoy quick-launching apps and fast webpage browsing, for a responsive and snappy device experience.

3,300 mAh removable battery² with Power Saving Mode. All-day battery life means you can keep working without interruption. And with Power Saving Mode, you can further extend your battery life by reducing screen brightness and minimizing background activity.

Expandable storage up to 256GB.³ Expandable storage allows you to grow as quickly as your business does.

Premium styling at an affordable price.

Premium styling. The sleek brushed-metal design, 2.5D rounded glass and flush camera deliver premium design features in a value device.

8MP f/1.9 rear camera. Capture crystal-clear images, notes and documents even in low light.

5MP front-facing camera. Empower your team with the ability to view high-quality video calls and conferencing.

Knox™ enterprise security lets you work securely.

Samsung Knox defense-grade security platform.⁴ Knox protects your business-critical data and applications right out of the box. Secure Folder allows you to keep your personal apps, pictures and documents in a separate, encrypted container on your work phone, ensuring that what's yours, stays yours.

Knox Workspace⁴ protects business-critical apps and data. Knox Workspace works alongside Secure Folder as an additional container solution. An isolated work container provides a dedicated work environment, and Knox Workspace grants enhanced granular control to IT administrators, enabling policy management to ensure compliance with corporate IT policies.

Knox works with your existing infrastructure. Device compatibility with popular MDM, SSO and VPN solutions enables seamless deployment and integration of Knox into your IT department's existing infrastructure. And native support for Exchange Active Sync (EAS) enables a basic MDM solution with a familiar and efficient email experience.

Knox Customization allows you to create enterprise-specific experiences. With Knox Customization, your smartphone can become a purpose-built appliance for tailored user experiences.
