SAMSUNG

Galaxy Note8

Do bigger things.

A phone sized for greater productivity, with a precision S Pen. Be more impactful. Be more efficient. Be more secure.

It's not just the size of the screen. It's the thinking behind it. The Samsung Galaxy Note8 is the ultimate multitasking device for those who want to do bigger things in work and in life.

Be more impactful.

Catch every detail. Get bright, sharp, true-to-life colors with the Mobile HDR Premium-certified Quad HD+ Super AMOLED display.[1] Enjoy an immersive viewing experience with a cinema-quality screen in the palm of your hands. And with a high screen-to-body ratio, you'll get a bigger view in a slimmer phone.

Shoot like a pro. Whether you're shooting in the dark or from a distance, photos are clear with less blur[2] on the world's first dual camera with Optical Image Stabilization with both lenses. Want even more control? Switch to Pro Mode for all the options you'd expect from a DSLR.

The power to get it done. Don't worry about how many apps you have open. The 10nm high-performance, energy-efficient application processor and 6GB RAM will keep you running at top speed.

Be more efficient.

The power of precision. With the smartest and most advanced S Pen yet, you can mark up photos and annotate PDFs with ease. You can even draw or take up to 100 pages of notes without unlocking your phone. And with Live Message, you can bring your communications to life by creating and sharing animated messages or simple diagrams that play back exactly as you wrote them.[3]

Translate with a touch. Use S Pen to seamlessly translate words or phrases. Just choose a language from the menu, hover over the on-screen text, and see the translation. Or click the speaker icon and hear it.

Get to work. Dock into the DeX Station for a rich, desktop-like experience. It features drag-and-drop functionality, multiple resizable windows, a new apps interface and an improved email experience. Requires a monitor, keyboard and mouse.[4]

Do two things at once. Get more done by using two apps at the same time. App Pair lets you launch two apps with a tap and use them side-by-side[3] on the large Infinity Display.

Stay connected. Keep your work life separate from your personal life. Dual Messenger lets you have multiple accounts on a single messaging app, and be logged into both at the same time.

Be more secure.

Defense-grade security. Used by 30 governments and voted the "most strong" mobile security platform by Gartner, Knox™ protects your data from the moment you turn it on. And Knox container solutions help keep your work information separate from your personal information, ensuring that what's yours, stays yours.[5]

Unlock with a look. Advanced iris scanning recognizes the unique patterns in your irises that are extremely difficult to replicate, making it a highly secure and reliable biometric technique.[6]

Keep it private. Leveraging the Samsung Knox security platform, Secure Folder creates a private, encrypted space on your device for an additional layer of security and privacy for your personal apps and data.[5]

Be more productive.

Conquer the elements. With an IP68 Rating, the Galaxy Note8 and S Pen are both water-and dust-resistant[7] so you can use them worry-free, even in the harshest environments.

Do more. Store more. In addition to a large base storage of 64GB, you can add up to 256GB of removable MicroSD storage,[8] for plenty of room to store files, photos and videos.

Less charging, more working. Charge without plugging in, and power up quickly with the optional Fast Wireless Charger.[9]

More power to you. Get more done with Galaxy Note8's 3300mAh battery designed for all-day usage, and then some.[10]
