SPACEMAKER

THE MARKET LEADER
IN THE DESIGN, MANUFACTURE AND MARKETING
OF DIY STEEL STORAGE SOLUTIONS

2017 DROP SHIP

Arrow is the market leader in the design, manufacture, sourcing, and marketing of DIY outdoor steel storage solutions. For over 50 years of operation, Arrow has built strong brand recognition and loyalty from high quality, longevity, and value. As a global leader in steel consumer storage, we have production / distribution facilities in North America – Breese, IL, Haskell, NJ, Fontana, CA, and Mississauga ON Canada. Arrow has international sales management representation throughout North America, Europe and South America.

Our customers include home improvement retailers, distributors, hardware dealers, mass merchants, and the e-commerce business segment. The Arrow product line includes a wide range of steel outdoor storage solutions, including accessories, to meet the small and large storage needs of the end-user. From storage sheds and utility buildings to deck/patio storage and marine storage to carports and accessories, we offer quality and innovation in the outdoor storage category.

We've got you covered.

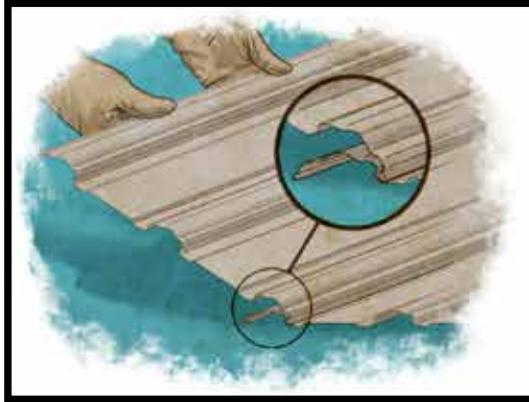

Arrow Storage Products is the leading designer, manufacturer and distributor of steel storage units delivered in kit form. Since it was established in 1962 as Arrow Group Industries, the company has sold more than 13 million sheds to customers around the world through its retail partners.

If you're looking for an affordable shed that is built strong, features an improved assembly system, and is an overall stronger and more reliable shed, consider the EZEE Shed®. The EZEE Shed's Snap-IT™ Quick Assembly features the Snap-IT™ Lock which connects the steel wall panels of your shed together by snapping into place. Once snapped, the two panels are locked in and create a layered wall effect that increases the strength of your unit.

Accessories

Earth Auger Kit
AK4

Concrete Anchor Kit
AK100

Made with strong vinyl-coated electro-galvanized steel, our patio cover/carport is perfect as an awning at the front or back of your house or trailer home. Protect your entrance, patio area, or vehicle from inclement weather and the baking sun. Our patio cover/carport is designed to attach to your home and can be assembled as a large DIY project, since all parts are pre-cut, pre-drilled, and clearly marked. With our premium 15 year warranty, this structure will withstand the test of time.

- **HDG steel® for strong corrosion resistance**
- **Color: Eggshell**

RAISED BED GARDEN

Raised bed gardens are great for better soil drainage. You use less water because it can be concentrated in a specific area. They make for easier soil amendment and less compacting of soil for better results. The soil is warmer than traditional gardening to provide for a longer planting season. They also offer easier pest, critter and weed control.

DIY assembly - no tools required.

Perfect for small spaces, yards, decks and patios.

- **Galvanized steel for strong corrosion resistance**
- **Color: Latte, Espresso**

Floor Frame Kits

To protect your stored items, you should consider having a floor above the base in your shed. If you are creating your own base, we recommend that you install a floor using an Arrow floor frame kit. If you are using our base kit, your floor is installed directly on the base kit and you do not need a separate floor kit (although you could consider it). An Arrow floor frame kit offers an easy way to construct a raised floor. This is especially useful if your base is dirt, gravel or grass. The Arrow floor frame kit is installed after your shed is completely assembled. The floor beams slot easily into the frame of your shed, providing an ideal framework for finishing with 5/8" exterior-grade plywood. Find the floor frame kit size for your shed.

Anchor Kits

Anchors must be permanently attached after assembly to keep you and your shed secure and safe. Choose the appropriate anchoring kit for your base as part of the preparation phase of shed construction. Arrow offers several permanent anchoring options, including concrete ones. (If you need to leave your building before it is completely assembled, you will need to temporarily anchor the corners of the shed to your base, and place weights, such as patio blocks or sandbags, on top of the floor frame.)

- **Galvanized steel for strong corrosion resistance**
- **Hardware included**
- **Color: Gray**
