

# OL' BETSY™

Model No. 224

## Friction Turkey Call

- The finest Pennsylvania slate
- Easiest surface to use
- Produces the purest turkey sounds
- Includes:  
Hickory Striker and conditioning pad

The Ol' Betsy™ is built with select Pennsylvania Slate. This slate combined with the acoustical cup and internal sounding board gives you a slate call that can do it all. The Hickory Striker only adds to the versatility of this call giving you yelps and cuts that reach way out or finishing calls for close calling. Congratulations on selecting a slate call you will be proud to hunt with.

**IMPORTANT:** Please read all instructions and exercises before using this product to ensure safe and proper use.

### INSTRUCTIONS

Hold your slate so that your striker hand rests firmly on the rim of your calling surface. The striker should be held as you would hold a pencil (See Diagram). The sound you produce will depend on:

- How tight you hold the striker
- The angle of your striker in relation to the calling surface
- How much pressure you apply
- The location of your striker on the calling surface

Place your striker perpendicular to the slate and then tilt your striker 45° away from your body. (See Diagram) Experiment with different striker angles and pressure against the calling surface to find what is best for you.

### EXERCISES

**PURR** - Slowly drag striker across the calling surface. Try dragging it in a straight line or an up side down "J" shape.

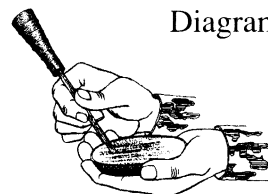

**YELP** - Quickly drag striker across the slate in a 1/2" to 1" oval shape. Repeat this movement for each yelp without removing the striker from the calling surface.

**CLUCK** - With light pressure, quickly move striker 1/8" to 1/4" across the calling surface.

**CUTTING** - With firm pressure, quickly move striker 1/8" to 1/4" across the calling surface and back without lifting the striker from the calling surface. Repeat the movement for each cut.

**CLEANING:** To resurface and clean your calling surface, rub the abrasive pad provided across the calling surface then lightly blow dust particles from the calling surface.
