

The latest innovation from Beretta...

Nano

The Beretta Nano is the ultimate evolution of the micro compact carry pistol. Utilizing a removable, serialized sub-chassis the Nano pistol can be easily modified with replaceable grip frames and is simple to disassemble and maintain. Ease of use and concealment were key drivers in the development of the Nano. The Nano's extremely low profile, snag free design makes it easy to carry and draw from concealment. To accommodate right or left-handed use, the Nano's magazine release button can be easily reversed. The light, durable, frame employs modern thermoplastic technology through the use of fiberglass reinforced technopolymer. The Nano's sights are user adjustable with a 1.5mm hexwrench and your fingers. This allows anyone to adjust their sights without the assistance of a gunsmith. Modular structure, ergonomics and ease of use make the Beretta Nano the ideal firearm for concealed carry.
