

BOW HANGER

Model No. 6531

Bow Hunting Accessory

When bowhunting, movement is a killer. With the Primos® Bow Hanger you never have to turn your back to get to your bow. The Bow Hanger easily mounts into a tree with its self-starting, screw-in threads. It positions the bow 20 inches from the tree "at the ready", so you can reach out while still watching your quarry. Its swiveling hook is rubber-coated for quiet use and allows you to position your bow for a custom set-up. The pivot point is such that the bow will not swing away from you if you do not have the hanger in the tree perfectly level. Two rock solid accessory hooks allow you to use one tool for your bow, range finder, binoculars, and Rattlin' Horns™.

The Bow Hanger can also be used to hang all sorts of things around the camp site or at home.

IMPORTANT: Please read all instructions and warnings before using this product to ensure safe and proper use.

INSTRUCTIONS & EXERCISES

WARNING: DO NOT use as a step, climbing aid, or tool to pull yourself into your stand in any way. This product was not designed to support your weight. Do not use to hang or support loaded firearms, unsheathed blades, or exposed arrow tips.

Weight Limit: 20 lbs.

This Bow Hanger is designed to be placed over your shoulder, allowing your bow to hang in front of you "at the ready". Install Bow Hanger with threads all the way into the tree, beyond the bark. Make sure the threaded tip is completely and securely screwed into the wood. The hooks should be vertical (See Diagram).
