

BIOBOR[®]EB

Ethanol Buster and Performance Enhancer

GASOLINE TREATMENT

BioborEB[®] is a specifically formulated additive for gasoline and ethanol fuel blends which helps combat the negative effects of ethanol in fuel tanks and engines, while increasing engine performance, efficiency and fuel stability.

Ethanol is extremely corrosive and can be detrimental to your engine if not properly blended with the gasoline in your fuel tank. Ethanol over time will separate from the gasoline in your fuel tank, move to the bottom of your fuel tank and mix with water that is contained in your fuel. This phase separation in fuel causes your engine to burn improperly blended fuel which can lead to engine damage, loss of engine efficiency and loss of power. If your boat, truck, stand-by power unit or fuel storage unit sits unused for any length of time, this phase separation of fuel will definitely occur. BioborEB[®] your fuel tank to prevent this problem.

BioborEB[®] also acts as a sludge detergent and dispersant, which cleans injectors and prevents corrosion leading to better combustion, fuel efficiency and an all-around better running, cleaner engine.

To sum it up, BioborEB[®] can give your engine better performance and more power, with better fuel economy. BioborEB[®] provides corrosion protection for injector chambers and intake valves and reduces engine maintenance costs. In addition, BioborEB[®] eliminates the worrisome problem of fuel phase separation.

BioborEB[®] is recommended to be used continuously at 1 ounce per 15 gallons of fuel (1:1920).

Please contact a Hammonds Fuel Additive Specialist today at (800) 582-4224 to learn more about BioborEB[®].

a **GREEN** company

Fuel Additives equal a cleaner engine, better mileage, and less harmful emissions.

BioborEB[®] combats the harmful effects of ethanol in gasoline

- Better **fuel economy** and **efficiency**
- **Reduces** maintenance costs
- **Cleans** and **disperses** sludge
- **Improves** engine **power** and **performance**
- **Prevents** fuel phase **separation**
- Provides **corrosion** protection
- **Increases** fuel **lubricity** and **stability**

Available in
16 and 32 oz
containers
