INSTRUCTIONS & EXERCISES

BITE AND BLOW:

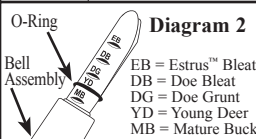

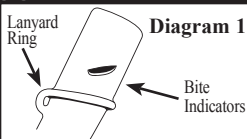

GRUNT- Your call is set for the Grunt. Simply blow soft, short one second notes.

BLEAT- Bite at the indicators (See Diagram 1) and blow short one second notes.

ADJUSTING THE CALL: The call is adjustable so you can set it for the grunt or bleat that you want to produce. Remove the barrel; gently hold the reed down with your thumb and slide the O-Ring into the desired position (See Diagram 2). Reassemble by inserting and seating the reed assembly in the barrel.

GRUNTS- Different types of grunts are made by adult bucks and does. The **Grunt** is a soft, short (about one second) call made by deer to announce their presence. It means, "I'm a deer and I'm over here."

BLEATS- Bleats are made by adult does to tell bucks that they are ready to breed. An Estrus™ Bleat should last for about one to two seconds. Adjust your call to the Estrus™ Bleat (EB) position (See Diagram 2). Call loudly and urgently into the call producing one or two Estrus™ Bleats. Pause five minutes and repeat. You can repeat this sequence every 30 minutes.
