HARDWARE IDENTIFICATION CHART

This chart is provided to help identify the hardware used in the assembly process. Place the washers or the ends of the bolts or screws on the circles to check for the correct diameter. Use the small scale to check the length of the bolts and screws.

NOTICE: The length of all bolts and screws, except those with flat heads, is measured from below the head to the end of the bolt or screw. Flat head bolts and screws are measured from the top of the head to the end of the bolt or screw.

After unpacking the unit, open the hardware bag and make sure that you have all the following items. Some hardware may be already attached to the part.

	Part Number and Description	Qty
	11 Bolt, Button Head, Torx Socket (M10 x 1.5 x 55mm)	2
	12 Bolt, Button Head, Torx Socket (M10 x 1.5 x 25mm)	24
	13 Arc Washer (M10)	26

NOTE: Mounting Hardware NOT included. See page 10 for more information.

ASSEMBLY INSTRUCTIONS

Place all parts from the box in a cleared area and position them on the floor in front of you. Remove all packing materials from your area and place them back into the box. Do not dispose of the packing materials until assembly is completed. Read each step carefully before beginning. If you are missing a part, please go to staminaproducts.com under the Service section and order the part needed, e-mail us at customerservice@staminaproducts.com, or call us toll free at 1-800-375-7520 (in the U.S.). Our Customer Service Staff is available to assist you from 7:30 A.M. to 5:00 P.M. (Central Time) Monday through Thursday and 8:00 A.M. to 3:00 P.M. (Central Time) on Friday.

NOTE: DO NOT SECURELY TIGHTEN ALL BOLTS UNTIL STEP 5.

STEP 1

Refer to the illustration below. Bolt the **LEFT BASE(1)**, **RIGHT BASE(2)**, and **CROSS BAR(3)** together with **BUTTON HEAD BOLTS(M10x1.5x25mm)(12)** and **ARC WASHERS(M10)(13)**.

ASSEMBLY INSTRUCTIONS

STEP 2

Bolt the **LEFT UPRIGHT(4)**, **RIGHT UPRIGHT(5)**, and **CROSS BAR(3)** together with **BUTTON HEAD BOLTS(M10x1.5x25mm)(12)** and **ARC WASHERS(M10)(13)**.

STEP 3

Attach the **LEFT** and **RIGHT UPRIGHTS(4, 5)** to the **LEFT** and **RIGHT BASES(1, 2)** with **BUTTON HEAD BOLTS(M10x1.5x25mm)(12)** and **ARC WASHERS(M10)(13)**.

SET UP INSTRUCTIONS

Place the **STAMINA® Outdoor Power Tower** in the area where it will be used. Refer to the illustration below. It is recommended to secure the **STAMINA® Outdoor Power Tower** with bolts or anchors on a hard, level surface. Of course other fasteners could be used as well depending on the type of surface the tower is being used on.

CAUTION: Locate and read the **CAUTION LABEL(15)** and **CAUTION DECAL(16)** on the **STAMINA® Outdoor Power Tower**. Make sure that all users read the **CAUTION LABEL(15)** and **CAUTION DECAL(16)** before using the product.

NOTE: Four concrete anchors (mounting hardware not included) are needed to secure the **LEFT** and **RIGHT BASES(1, 2)** of the **STAMINA® Outdoor Power Tower**, two on each side.

STORAGE

1. To store the **STAMINA® Outdoor Power Tower**, simply keep it in a clean dry place.
2. Remove the nuts which secured the **STAMINA® Outdoor Power Tower** on the ground. Use two people to lift from the **CROSS BAR(3)** which on the **LEFT** and **RIGHT BASE(1, 2)** and the **PULL-UP BAR(8)** to move the **STAMINA® Outdoor Power Tower**.

MAINTENANCE

The safety and integrity designed into the **STAMINA® Outdoor Power Tower** can only be maintained when the **STAMINA® Outdoor Power Tower** is regularly examined for damage and wear. Special attention should be given to the following:

1. Verify that the **CAUTION LABEL(15)** and **CAUTION DECAL(16)** are in place and easy to read. Call Stamina Products immediately at **1-800-375-7520** for a replacement **CAUTION LABEL(15)** or **CAUTION DECAL(16)** if it is missing or damaged.
2. It is the sole responsibility of the user/owner to ensure that regular maintenance is performed.
3. Verify that all nuts and bolts are present and properly tightened. Replace missing nuts and bolts. Securely tighten loose nuts and bolts.
4. Worn or damaged components shall be replaced immediately or the **STAMINA® Outdoor Power Tower** removed from service until repair is made.
5. Only Stamina Products supplied components shall be used to maintain/repair the **STAMINA® Outdoor Power Tower**.
6. Keep your **STAMINA® Outdoor Power Tower** clean by wiping it off with an absorbent cloth after use. Periodically check tubes for water or rust and clean as needed.

CONDITIONING GUIDELINES

How you begin your exercise program depends on your physical condition. If you have been inactive for several years or are severely overweight, start slowly and increase your workout time gradually. Increase your workout intensity gradually by monitoring your heart rate while you exercise.

Remember to follow these essentials:

- Have your doctor review your training and diet programs.
- Begin your training program slowly with realistic goals that have been set by you and your physician.
- Warm up before you exercise and cool down after you work out.
- Take your pulse periodically during your workout and strive to stay within a range of 60% (lower intensity) to 90% (higher intensity) of your maximum heart rate zone. Start at the lower intensity, and build up to higher intensity as you become more aerobically fit.
- If you feel dizzy or lightheaded you should slow down or stop exercising.

Initially you may only be able to exercise within your target zone for a few minutes; however, your aerobic capacity will improve over the next six to eight weeks. It is important to pace yourself while you exercise so you don't tire too quickly.

To determine if you are working out at the correct intensity, use a heart rate monitor or use the table below. For effective aerobic exercise, your heart rate should be maintained at a level between 60% and 90% of your maximum heart rate. If just starting an exercise program, work out at the low end of your target heart rate zone. As your aerobic capacity improves, gradually increase the intensity of your workout by increasing your heart rate.

Measure your heart rate periodically during your workout by stopping the exercise but continuing to move your legs or walk around. Place two or three fingers on your wrist and take a six second heartbeat count. Multiply the results by ten to find your heart rate. For example, if your six second heartbeat count is 14, your heart rate is 140 beats per minute. A six second count is used because your heart rate will drop rapidly when you stop exercising. Adjust the intensity of your exercise until your heart rate is at the proper level.

Target Heart Rate Zone Estimated by Age*

Age	Target Heart Rate Zone (55%-90% of Maximum Heart Rate)	Average Maximum Heart Rate 100%
20 years	110-180 beats per minute	200 beats per minute
25 years	107-175 beats per minute	195 beats per minute
30 years	105-171 beats per minute	190 beats per minute
35 years	102-166 beats per minute	185 beats per minute
40 years	99-162 beats per minute	180 beats per minute
45 years	97-157 beats per minute	175 beats per minute
50 years	94-153 beats per minute	170 beats per minute
55 years	91-148 beats per minute	165 beats per minute
60 years	88-144 beats per minute	160 beats per minute
65 years	85-139 beats per minute	155 beats per minute
70 years	83-135 beats per minute	150 beats per minute

* For cardiorespiratory training benefits, the American College of Sports Medicine recommends working out within a heart rate range of 55% to 90% of maximum heart rate. To predict the maximum heart rate, the following formula was used: $220 - \text{Age} = \text{predicted maximum heart rate}$

WARM-UP and COOL-DOWN

Warm-Up The purpose of warming up is to prepare your body for exercise and to minimize injuries. Warm up for two to five minutes before strength training or aerobic exercising. Perform activities that raise your heart rate and warm the working muscles. Activities may include brisk walking, jogging, jumping jacks, jump rope, and running in place.

Stretching Stretching while your muscles are warm after a proper warm-up and again after your strength or aerobic training session is very important. Muscles stretch more easily at these times because of their elevated temperature, which greatly reduces the risk of injury. Stretches should be held for 15 to 30 seconds. Do not bounce.

Suggested Stretching Exercises

Lower Body Stretch

Place feet shoulder-width apart and lean forward. Keep this position for 30 seconds using the body as a natural weight to stretch the backs of the legs. **DO NOT BOUNCE!** When the pull on the back of the legs lessens, gradually try a lower position.

Floor Stretch

While sitting on the floor, open the legs as wide as possible. Stretch the upper body toward the knee on the right leg by using your arms to pull your chest to your thighs. Hold this stretch 10 to 30 seconds. **DO NOT BOUNCE!** Do this stretch 10 times. Repeat the stretch with the left leg.

Bent Torso Pulls

While sitting on the floor, have legs apart, one leg straight and one knee bent. Pull the chest down to touch the thigh on the leg that is bent, and twist at the waist. Hold this position at least 10 seconds. Repeat 10 times on each side.

Bent Over Leg Stretch

Stand with feet shoulder-width apart and lean forward as illustrated. Using the arms, **gently** pull the upper body towards the right leg. Let the head hang down. **DO NOT BOUNCE!** Hold the position a minimum of 10 seconds. Repeat pulling the upper body to the left leg. Do this stretch several times slowly.

Remember to always check with your physician before starting any exercise program.

Cool-Down The purpose of cooling down is to return the body to its normal, or near normal, resting state at the end of each exercise session. A proper cool-down slowly lowers your heart rate and allows blood to return to the heart. Your cool-down should include the stretches listed above and should be completed after each strength training session.
