

HELMET TECHNOLOGIES

FUSION CONSTRUCTION

FUSION CONSTRUCTION fuses the outer shell with the inner headform, producing a more ventilated, durable, lightweight helmet.

TRUE FIT

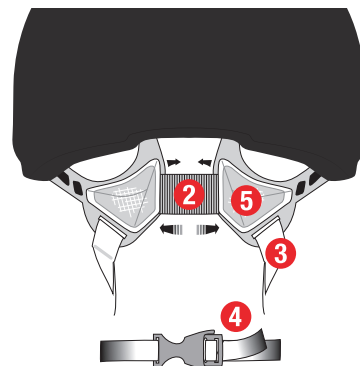

True Fit eliminates strap and hardware adjustments that are often confusing. True Fit is designed to fit properly every time with just one simple adjustment.

- 1 Rear safety lights—Click to turn on
- 2 Self-adjusting fit belt
- 3 Fixed straps for correct position
- 4 1-step adjustment point
- 5 Hi-impact reflectors

TRUE FIT – SAFETY LIGHTS

HALF NELSON

HALF NELSON

HALF NELSON ensures a correct fit for a comfortable ride.

MAX VENTILATION

Bell engineers each helmet to maximize ventilation channels that bring cool air in through the front, pass over the head and flush warm air out of the rear ports.
