FS6000 Electronic Dartboard

Playing Instructions

Item #3648

CAUTION – ELECTRICALLY OPERATED PRODUCT

NOT RECOMMENDED FOR CHILDREN UNDER 6 YEARS OF AGE. AS WITH ALL ELECTRIC PRODUCTS, PRECAUTIONS SHOULD BE OBSERVED DURING HANDLING AND USE TO PREVENT ELECTRIC SHOCK.

INPUT: AC 120 VOLTS/60HZ OUTPUT: DC 9 VOLTS

WARNING:

**Darts is an adult sport.
It is dangerous for children
to play without supervision.**

Made In China

Franklin Sports Inc.

OR visit www.franklinsports.com

7in

Unpacking:

Unpack your new dartboard carefully, making sure all parts are included. The following components are included in this set:

- 1 Electronic Dartboard
- 6 Darts (unassembled)
- 6 Replacement Tips
- 1 Power Adapter
- Owner's Manual

Cricket Scoring Display:

This dartboard utilizes a dedicated cricket scoreboard within the scoring display that keeps track of each player's segment status when playing Cricket. When Cricket is selected, individual characters will be utilized to register marks. There are 3 separate lights within each number (15 through 20 and bulls eye). During play, one of the status lights will turn on (black will appear) as a segment is hit. If a double or triple of an active number is hit, 2 or 3 lights will turn on respectively. (Picture for reference only!)

Set Up/Mounting Instructions:

Choose a location to hang the dartboard where there is about 10 feet (3.05m) of open space in front of the board. The "toe-line" should be 7ft 9 1/4in (2.41m) from the face of the dartboard.

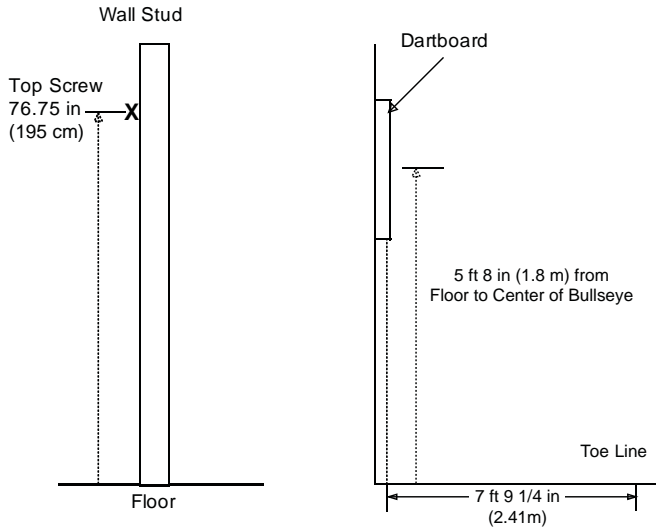

Locate a wall stud and place a mark 76.75in (195cm) from the floor. Insert a screw in the center of the wall stud at this height and hand the dartboard on this screw

If not mounting into studs, be sure to use drywall anchors or other securing hardware appropriate to the wall you are using.

If you want to mount the dartboard even more securely to the wall, you can fasten four screws (not included) through the holes located in the catch ring area (the area outside the scoring segments). This will secure the board to the wall.

Center of bullseye should be 5ft 8in (1.8m) from the ground.

Plug the A/C adapter into the wall outlet and into the jack at the bottom right of the dartboard and you're ready to play. INPUT- AC 120 VOLTS / 60 HZ OUTPUT: DC 9 VOLTS

Dartboard Functions:

POWER button - Located on the lower right corner of the dartboard (when doors are open). Be sure the AC Adapter is plugged into the jack on the right side of the dartboard. Press the POWER button to turn game on or off.

GAME GUARD button – Press to activate Game Guard Feature (see page 7 for instructions)

SOUND button – Press continually to set desired volume level or mute.

DOUBLE/MISS button - This button is used to activate the Double In/Double Out and Master Out options for the “01” games. This function is only active when selecting 301, 401, etc. games. The MISS feature is active during play of any game. Press button to register a “missed” dart. Player can press when dart lands outside target area so computer registers a thrown dart.

DART-OUT/SCORE button - The dart-out feature is active only during the “01” games (301, 401, etc.). When a player’s score falls below 160, he/she can press the DART OUT button to get a suggestion from the dartboard as to the 3 darts needed to finish the game. Note: doubles and triples are indicated with 2 and 3 dashes to the left of the number respectively. The SCORE feature allows player to access score not current on display.

BOUNCE OUT button - Decide before play if you want to count darts that do not remain in board ("bounce-outs") or not. If not, simply press the BOUNCE OUT button immediately after a bounce out occurs to deduct the score that registers.

Digital Play button - Press to activate Digital Play feature where you can play against the computer. Press continually to cycle through the 5 different skill levels. See page 7 for detailed instructions.

PLAYER/PAGE button - This button is used at the start of each game to select the number of players you want to play the game. In addition, this button allows players to see other player scores of not on active display. This dartboard keeps track of scores for up to 8 players.

GAME button - Press to page through the on-screen game menu and select game.

SELECT button - Press to select various difficulty settings for games. Many games contain several difficulty options that can be accessed by pressing this button.

START/HOLD button - This multi-function button is used to:

- **START** the game when all options have been selected.
- **HOLD** to put dartboard in HOLD status between rounds to allow player to remove darts from the target area.

RESET button - Press to clear display and reset dartboard to opening sound.

Electronic Dartboard Operation:

Press the **POWER** switch to activate dartboard. A short musical introduction is played as the display goes through power-up test.

Press **GAME** button until desired game is displayed (see Game Menu on page 23).

Press **DOUBLE** button (optional) to select starting and/or ending on doubles or Master Out (used only in 301 - 901 games). This is explained in the game rules section.

Press **PLAYER** button to select the number of players (1, 2, ... 8). The default setting is 2 players.

Press **START/HOLD** button (red) to activate game and begin play.

Throw darts

- The dart indicator display is located above the numbers in the LED displays. The lights indicate the number of darts thrown in the round.

- When all 3 darts have been thrown, a voice command will indicate "Remove Darts" and the score will flash. The darts can now be removed without affecting the electronic scoring. When all darts are removed from the playing surface press the **START** button to go to next player. Voice command will indicate which player is up. Also, the player indicator lights will illuminate to show which player's turn it is.

Display Protective Film:

This electronic dartboard may have a clear film over the entire display area and over the button area to prevent scratching during shipping. It is recommended that you remove this film so display is easier to read. To remove, simply lift edge, peel off, and discard.

Game Guard Feature:

After the **START** button has been pressed and play has begun, the GAME GUARD feature can be activated. When the button is pressed, all of the keys will 'lock'. When Game Guard is active, a misguided dart hitting a button will not affecting your game. To deactivate the Game Guard, simply press the button again and the keys will unlock.

Caring for your Electronic Dartboard:

Never use metal tipped darts on this dartboard. Metal tipped darts will seriously damage the circuitry and electronic operation of this dartboard.

Do not use excessive force when throwing darts. Throwing darts too hard will cause frequent tip breakage and cause excess wear on the board.

Turn darts clockwise as you pull them from the board. This makes it easier to remove darts and extends the life of the tips.

Do not spill liquids on the dartboard. Do not use spray cleaners, or cleaners that contain ammonia or other harsh chemicals as they may cause damage.

Digital Play Feature:

This exciting feature allows solo player to play against the computer at one of five different levels of skill – only 1 player can compete against the Digital Play competitor. This adds a level of competition to normally routine practice sessions.

To activate the Digital Play opponent:

Select the Game you wish to play

Press **Digital Play** button

Select Digital Play opponent skill level by pressing the **Digital Play** button continually

Digital Play Levels

Level 1	(C1)	Professional
Level 2	(C2)	Expert
Level 3	(C3)	Advanced
Level 4	(C4)	Intermediate
Level 5	(C5)	Beginner

Press **START** to begin play

When play begins:

The 'human' player throws first. After 3 darts are thrown, go to the board to take darts out and press **START** to change to the next player (Digital Play). Watch as the Digital Play opponent's dart scores are registered on the display. After the Digital Play opponent completes his round, the board will **automatically reset** for the "human" player. Play continues until one player wins.

Good luck!

G14	Killer	G28	Gold Hunt

Game Rules

301:

This popular tournament and pub game is played by subtracting each dart from the starting number (301) until the player reaches exactly 0 (zero). If a player goes past zero it is considered a "Bust" and the score returns to where it was at the start of that round. For example, if a player needs a 32 to finish the game and he/she hits a 20, 8, and 10 (totals 38), the score goes back to 32 for the next round.

In playing the game, the double in / double out option can be chosen (double out is the most widely used option).

- Double In - A double must be hit before points are subtracted from the total. In other words, a player's scoring does not begin until a double is hit.
- Double Out - A double must be hit to end the game. This means that an even number is necessary to finish the game.
- Double In and Double Out - A double is required to start and end scoring

Dart-Out Feature (“01” games only):

This electronic dartboard has a special “**Dart Out**” feature. When a player requires less than 160 to reach zero, the estimate feature becomes active. The player can press the **DART OUT** button to view the darts necessary to throw to finish the game (reach zero exactly). Doubles and triples are indicated with 2 or 3 lines to the left of each number respectively.

Adjustable Difficulty Settings for 301 include 401, 501, 601, 701, 801, and 901. To change to these more difficult settings, simply press the SELECT button. Each option is played exactly as outlined for 301 with the exception of the starting total; 401 has starting total of 401 points; 501 has starting total of 501 points and so on up to 901.

CRICKET:

Cricket is a strategic game for accomplished players and beginners alike. Players throw for numbers best suited for them and can force opponents to throw for numbers not as suitable for them. The object of Cricket is to “close” all of the appropriate numbers before one’s opponent while racking up the highest number of points.

Only the numbers 15 through 20 and the inner/outer bullseye are used. Each player must hit a number 3 times to “open” that segment for scoring (Refer to Tournament Cricket Scoring section for explanation on how players’ marks are registered). A player is then awarded the number of points of the “open” segment each time he/she throws a dart that lands in that segment, provided their opponent has not closed that segment. Hitting the double ring counts as two hits, and the triple ring counts as 3 hits.

Numbers can be opened or closed in any order. A number is “closed” when the other player(s) hit the open segment 3 times. Once a number has been “closed”, any player for the remainder of the game can no longer score on it.

Winning - The side closing all the numbers first and accumulating the highest point total is the winner. If a player “closes” all numbers first but is behind in points, he/she must continue to score on the “open” numbers. If the player does not make up the point deficit before the opposing player(s) “closes” all the numbers, the opposing side wins. Play continues until all segments are closed - the winner is the player with the highest score.

NO-SCORE CRICKET: (Press SELECT button when Cricket is displayed)

Same rules as standard Cricket except there is no point scoring. The object of this version is to be the first to simply “close” all the appropriate numbers (15 through 20 and the bullseye).

SCRAM: (For 2 players only)

This game is a variation of Cricket. The game consists of two rounds. The players have a different objective in each round. In round 1, player 1 tries to “close” (score 3 hits in each segment - 15 to 20 and bullseye). During this time, player 2 attempts to rack up as many points in the segments that the other player has not yet closed. Once player 1 has closed all segments, round 1 is complete. In round 2, each player’s roles are reversed. Now, player 2 tries to close all the segments while player 1 goes for points.

The game is over when round 2 is complete (player 2 closes all segments). The player with the highest point total is the winner.

CUT-THROAT CRICKET:

Same basic rules as standard Cricket except once scoring begins, points are added to your opponent(s) total. The object of this game is to end up with the fewest points. This variation of Cricket offers a different psychology to the players. Rather than adding to your own score and helping your own cause as in standard Cricket, Cut-Throat offers the benefit of racking up points for your opponent(s), digging him in a deeper hole. Competitive players will love this variation!

ENGLISH CRICKET: (For 2 players only)

This game is another variation of Cricket that requires precision dart throwing. The game consists of two rounds. The players have a different objective in each round. During the first round, player 2 attempts to throw bullseyes – with the objective of needing 9 to complete round 1. Double bull (red center) counts as 2 scores. Any throw that does not hit bullseye is credited to player 1’s point total. For example, if player 2 throws a 20, a single bullseye, and a 7 during his/her turn, player 2 will have one bullseye subtracted from the 9 needed, and 27 points will be credited to player 1’s point total. Player 2 must exhibit accurate bullseye dart throwing!

Meanwhile, player 1 attempts to score as many points as possible during this first round. Doubles and triples count 2x and 3x their respective values. However, to score points, player 1 must score over 40 points in each turn (3 throws) to amass points against player 2. Only those points over 40 are counted toward the cumulative score. Player 1 must also exhibit precision dart throwing and avoid hitting any bullseyes during this first round because any hits scored by player 1 in the bullseye area will be subtracted from player 2's needed total of 9 bullseyes.

Once player 2 reaches the objective of getting 9 bullseyes, the roles are reversed for round two.

ADVANCED CRICKET:

This difficult version of cricket was developed for the advanced player. Players must close out the segments (20,19,18,17,16,15 and bullseye) **by using only triples and doubles!** In this challenging game, doubles segments count as 1x the number, and triple segments count as 2x the number. The bullseye scoring is the same as in standard cricket. The first player to close out the numbers with the most points is the winner.

SHOOTER:

This game tests the players ability to "group together" darts within a segment during each round of play. The computer will randomly select the segment the players must hit for each round and display the flashing number in the display.

Scoring is as follows:	Single segment	= 1 Point
	Double segment	= 2 Points
	Triple segment	= 3 Points
	Single Bullseye	= 4 Points

When the computer selects double Bullseye, the outer bull scores 2 points and the inner bull scores 4 points. The player with the most points at the end of the selected rounds is the winner.

Adjustable Difficulty Settings for Shooter include 6 rounds, 7 rounds, ... 12 rounds.

Big Six:

This game pits player against player to challenge your opponent to hit the targets you select. Similar to the popular basketball game "HORSE", players must earn the chance of picking the next target for their opponent by scoring a hit on the current target first. Single 6 is the first target to shoot for at the start of the game. Before the game starts, players must agree on how many 'lives' will be used. Within the three throws, player 1 must hit a 6 to "save" their life. After the current target is hit, the next dart thrown will determine the opponents target. If player 1 fails to hit the current target within 3 darts, they will lose a 'life' and a chance to determine the next target for player 2. In this case, player 2 shoots for the single 6 – and if it is hit, he can throw for a segment for the next round.

Singles, doubles and triples are all separate targets for this game. The object of the game is to force your opponent into losing 'lives' by selecting difficult targets for your opponent to hit such as "Double Bullseye" or "triple 20" The last player with a 'life' left is the winner.

Adjustable Difficulty Settings for Big Six include 3 'lives', 4 'lives', ... 7 'lives'.

OVERS:

The object of this game is to simply score higher ("over") than your previous three dart total score. Before play begins, players choose the amount of 'lives' to be used. When a player fails to score "over" their previous three dart total, they will lose one 'life'. When a player "equals" the previous three dart total, a 'life' will also be lost. The LED display on the right will indicate remaining 'lives'. The last player with a 'life' remaining is the winner.

Adjustable Difficulty Settings for Overs include 3 'lives', 4 'lives', ... 7 'lives'.

UNDERS:

This game is the opposite of "Overs" Players must score less ("Under") than their previous three dart total. The game begins with 180 (highest total possible). When a player shoots higher than his previous three dart total, he will lose one 'life'. Each dart that hits outside the scoring area, including bounce outs will be penalized with 60 points added to your score. This will be added at the end of the round when the START/HOLD button is pressed. The last player with a 'life' remaining is the winner

Adjustable Difficulty Settings for Unders include 3 'lives', 4 'lives', ... 7 'lives'.

COUNT-UP:

The object of this game is to be the first player to reach the specified point total. Point total is specified when the game is selected. Each player attempts to score as many points as possible per round. Doubles and triples count 2 or 3 times the numerical value of each segment. For example a dart that lands in the triple 20 segment is scored as 60 points. The cumulative scores for each player will be displayed in the LED display as the game progresses.

Adjustable Difficulty Settings for Count-Up include 400, 500, 600, 700, 800, 900, and 999. To change to these more difficult settings, simply press the SELECT button. Each option is played exactly as outlined above with the exception of the total necessary to win the game. For example, in Count-Up 500, the first player to reach 500 points is the winner.

HIGH SCORE:

The rules for this competitive game are simple - Rack up the most points in three rounds (nine darts) to win. Doubles and triples count as 2x and 3x that segment's score respectively.

Adjustable Difficulty Settings for High Score include 4 rounds, 5 rounds, ... 14 rounds. Each option is played exactly as outlined above with the exception of the number of rounds in the game. For example, in High Score 7 rounds, the player with the most points after 7 rounds is the winner.

ROUND-THE-CLOCK:

Each player attempts to score in each number from 1 through 20 and bullseye in order. Each player throws 3 darts per turn. If a correct number is hit, he/she tries for the next number in sequence. The first player to reach 20 is the winner. The display will indicate which segment you are shooting for. A player must continue shooting for a segment until it is hit. The display will then indicate the next segment you should shoot for.

There are many difficulty settings available for this game. Each game has the same rules, the differences are detailed as follows:

- ROUND-THE-CLOCK 5 - Game starts at segment number 5
- ROUND-THE-CLOCK 10 - Game starts at segment number 10
- ROUND-THE-CLOCK 15 - Game starts at segment number 15

Since this game does not utilize point scoring, the double and triple rings count as single numbers.

ROUND-THE-CLOCK Double - Player must score a Double in each segment from 1 through 20 in order.

- **ROUND-THE-CLOCK Double 5** - Game starts at double segment 5
- **ROUND-THE-CLOCK Double 10** - Game starts at double segment 10
- **ROUND-THE-CLOCK Double 15** - Game starts at double segment 15

ROUND-THE-CLOCK Triple - Player must score a Triple in each segment from 1 through 20 in order.

- **ROUND-THE-CLOCK Triple 5** - Game starts at triple segment 5
- **ROUND-THE-CLOCK Triple 10** - Game starts at triple segment 10
- **ROUND-THE-CLOCK Triple 15** - Game starts at triple segment 15

KILLER:

This game will really show who your friends are. The game can be played with as few as two players, but the excitement and challenge builds with even more players. To start, each player must select his number by throwing a dart at the target area. The LED display will indicate "SEL" at this point. The number each player gets is his assigned number throughout the game. No two players can have the same number. Once each player has a number, the action starts.

Your first objective is to establish yourself as a "Killer" by hitting the double segment of your number. Once your double is hit, you are a "Killer" for the rest of the game. Now, your objective is to "kill" your opponents by hitting their segment number until all their "lives" are lost. The last player to remain with lives is declared the winner. It is not uncommon for players to "team up" and go after the better player to knock him out of the game.

Adjustable Difficulty Settings for Killer include 7 lives, 8 lives, ... 14 lives. Each option is played exactly as outlined above with the exception of the number of lives each player has in the game. In addition, for those who really want a challenge, there are three additional difficulty settings: Doubles 3 lives, Doubles 5 lives, and Doubles 7 lives. In these games, you can only "Kill" opponents by scoring doubles in their number segment.

DOUBLE DOWN:

Each player starts the game with 40 points. The object is to score as many hits in the active segment of the current round. The first round, the player must throw for the 15 segment. If no 15's are hit, his score is cut in half. If some 15's are hit, each 15 (doubles and triples count) is added to the starting total. The next round players throw for the 16 segment and hits are added to the new cumulative point total. Again, if no hits are registered, the point total is cut in half.

Each player throws for the numbers as indicated in the chart below in order (the LED screen will indicate the active segment in which to throw). The player who completes the game with the most points is the winner.

15	16	D	17	18	T	19	20	B	TOTAL
Player 1									
Player 2									

DOUBLE DOWN 41:

This game follows similar rules as standard Double Down as described above with two exceptions. First, instead of going from 15 through 20 and bullseye, the sequence is reversed which will be indicated on the LED display. Second, an additional round is included toward the end in which players must attempt to score three hits that add up to 41 points (20, 20, 1; 19, 19, 3; D10, D10, 1; etc.). This "41" round adds an extra level of difficulty to the game. Remember, a player's score is cut in half if not successful, so the "41" round presents quite a challenge!

20	19	D	18	17	T	16	15	41	B	TOTAL
Player 1										
Player 2										

ALL FIVES - 51:

The entire board is in-play for this game (all segments are active). With each round (of 3 darts) each player has to score a total which is divisible by 5. Every "five" counts as one point. For example 10, 10, 5 = 25. Since 25 is divisible by 5 fives, this player scores 5 points (5 x 5 = 25).

If a player throws 3 darts that are not divisible by 5, no points are given. Also, the last dart of each round must land in a segment. If a player throws the third dart and it lands in the catch ring area (or misses the board completely), he earns no points even if the first two darts are divisible by 5. This prevents a player from “tanking” the third throw if his first two are good. The first player to total fifty-one (51) “fives” is the winner. The LED screen will keep track of the point totals.

Adjustable Difficulty Settings for All Fives include 51, 61, 71, 81, and 91. Each option is played exactly as outlined above with the exception of the number of points (or fives) it takes to win the game.

SHANGHAI - 1:

Each player must progress around the board from 1 through 20 in order. Players start at number 1 and throw 3 darts. The object is to score the most points possible in each round of 3 darts. Doubles and triples count toward your score. The player with the highest score after completing all twenty segments is the winner.

Adjustable Difficulty Settings for Shanghai include the following options:

- SHANGHAI 5 - Game starts at segment 5
- SHANGHAI 10 - Game starts at segment 10
- SHANGHAI 15 - Game starts at segment 15

In addition, we added Super Shanghai as a difficulty option. This game is played exactly as described above except various doubles and triples must be hit as specified by the LED display.

Adjustable Difficulty Settings for Super Shanghai include the following options:

- SUPER SHANGHAI 5 - Game starts at segment 5
- SUPER SHANGHAI 10 - Game starts at segment 10
- SUPER SHANGHAI 15 - Game starts at segment 15

GOLF:

This is a dartboard simulation of the game golf (but you don't need clubs to play). The object is to complete a round of 9 through 18 “holes” with the lowest score possible. The Championship “course” consists of all par 3 holes making par 27 for a nine hole round or 54 for a round of 18.

The segments 1 through 18 are used with each number representing a "hole." You must score 3 hits in each hole to move to the next hole. Obviously, double and triples affect your score as they allow you to finish a hole with fewer strokes. For example, throwing a triple on the first shot of a hole it is counted as an "eagle" and that player gets a completes that hole with 1 "stroke."

Note: The active player continues to throw darts until he "holes out" (scores 3 hits on the current hole). The voice announcer will indicate the player that is up - listen carefully to avoid shooting out of sequence. By the way, there are no "gimmes" in this game!

FOOTBALL:

Strap your helmet on for this game! The first thing necessary is to select each player's "playing field." This can be done by throwing a dart or by manually pressing a segment on the board by each player. This is entirely up to you, but whichever segment is selected becomes your starting point which carries through the bullseye and directly across to the other side of the bullseye (see diagram).

For example, if you select the 20 segment, you start on the double 20 (outer ring) and continue all the way through to the double 3. The "field" is made up of 11 individual segments and must be hit in order. So, keeping with the example above, you must throw darts in the following segments in this order:

Double 20 ... Outer Single 20 ... Triple 20 ... Inner Single 20 ... Outer Bullseye ... Inner Bullseye ... Outer Bullseye ... Inner Single 3 ... Triple 3 ... Outer Single 3 ... and finally a Double 3.

The First player to "score" is the winner. The LED display will keep track of your progress and indicate the segment you need to throw for next.

BASEBALL – 6 Innings:

This dartboard version of baseball takes a great deal of skill. As in the real game, a complete game consists of 9 innings. Each player throws 3 darts per "inning."

The field is laid out as shown in the diagram on the following page.

Segment	Result
Singles segments	"Single" - one base
Doubles segment	"Double" - two bases
Triples segment	"Triple" - Three bases
Bullseye	"Home Run" (can only be attempted on third dart of each round)

The object of the game is to score as many runs as possible each inning. The player with the most runs at the end of the game is the winner.

STEEPLECHASE:

The object of this game is to be the first player to finish the "race" by being the first to complete the "track." The track starts at the 20 segment and runs clockwise around the board to the 5 segment and ends with a bullseye. Sounds easy right? What has not yet been specified is that you must hit the inner single segment of each number to get through the course. This is the area between the bullseye and the triples ring. And, as with a real steeplechase, there are obstacles throughout the course to hurdle. The four hurdles are found at the following places:

- 1st fence Triple 13
- 2nd fence Triple 17
- 3rd fence Triple 8
- 4th fence Triple 5

The first player to complete the course and hit the bullseye wins the race.

BOWLING:

This dartboard adaptation of bowling is a real challenge! It is a difficult game in that you must be very accurate to rack up a decent score. Player one starts the game. You must select your "alley" by either throwing dart or manually pressing segment of choice. Once alley is selected, you have 2 remaining darts to throw in which to score points or "pins." Each specific segment in your "alley" is worth a given pin total:

Segment	Score
Double	9 pins
Outer Single	3 pins
Triple	10 pins
Inner Single	7 pins

There are several rules for this game as follows:

A perfect game score would be 200 in this version of bowling

You cannot hit the same singles segment twice within the same “frame” (round). The second hit will count as zero points. Hint: Try to hit each single to reach 10 points in the frame.

You can score 20 points per “frame” by hitting the triple segment twice.

Hitting the double segment with your second dart will only count as 10 points if you scored a double on your first throw. Otherwise you will score a total of 9 points by throwing a double with your second dart.

CAR RALLYING:

This game is similar to steeplechase except we let you set up your own “race track.” You can set up as many obstacles as you wish. The track must be 20 lengths long.

Before the game starts, the LED display will prompt you to select the course (“SEL”). Players should alternate selecting segments by pressing on the specific segment of your choice. Note: You will have to hit the exact segment you selected to move on during the race. If you choose inner single 20, that inner single area will need to be hit during the race. The LED display will indicate inner single with a line next to the bottom of the 1, an outer single is shown with a line next to the top portion of the 1.

Obstacles usually comprise hitting a difficult number before continuing on the racetrack. Again, the route can be made as difficult or easy as you wish and can go anywhere on the target area of the board.

After the track is selected, press START to begin the race. The first player to complete the course is the winner.

SHOVE A PENNY:

Only the numbers 15 through 20 and the bullseye are used. Singles are worth 1 point, doubles are worth 2, and triples are worth 3 points. Each player must throw for the numbers in order with the objective of scoring 3 points in each segment to move on to the next. If a player scores more than 3 points in any one number, the excess points are given to the next player. The first player to score 3 points in all segments (15 - 20 and bull) is the winner.

NINE-DART CENTURY:

The object of this game is to attempt to score 100 points, or come as close as possible, after 3 rounds (9 darts). Doubles and triples count as 2x and 3x their value respectively. Going over 100 points is considered a "bust" and causes you to lose unless all players go over. In that case, the player closest to 100 wins (player that scored the lowest amount over 100).

GREEN VS. RED: (2 players only)

This game is a race around the board, where skill at hitting doubles and triples pays off with victory. Player 1 is "green" and player 2 is "red." Player 1 shoots for only doubles and triples that are green and works around the board clockwise. Player 2 starts at 20 and works around the board counter-clockwise, shooting for red segments (the temporary score display will indicate which segment to throw for). Note: a maximum of one double and one triple of the same number can be scored in a single round.

What's more, hitting the wrong number (of your opponent's color) subtracts that amount from your score - so be careful.

The player with the most points after completion of the game is the winner.

GOLD HUNTING:

The object of this game is to find "gold." You collect gold for each 50 points. Gold is only collected only if your score is exactly 50 or a multiple of 50 (100, 150, etc.) at any point during a round. However, since "gold" can make a person greedy, not only do you collect gold for every multiple of 50, you also steal 1 gold from all other players. Therefore, as you collect a gold, you take 1 gold from all other players who have gold.

CASINO A - FLUSH :

This game, inspired by casino play, tests your nerve and skill as you gamble points to defeat your opponent. The object of the game is to be the first player to reach the designated point total.

The end-game point total can be changed by pressing the SELECT button. Available options include; 260, 310, 360, 410, 460, 510, and 560. Press START button and you're ready to go.

The dartboard will indicate the number you must throw for. The default "bet" is 10 points. However, each player can increase his bet at the start of each round to 20, 30, 40, ... 90 points. Players usually wager high when a number appears they are confident in hitting. To change your bet (at start of a round) press the BOUNCE OUT button. Your new bet will be indicated in the display (for example, "b20" will appear to indicate a bet of 20 points). The bet will automatically revert to 10 points at the start of each round.

To "cash in" on your bet, you need to hit the indicated number segment. Hitting a single on the first throw is a "push" and does not score points. However throwing a double or triple of the correct segment on the first throw counts as 1x and 2x your bet respectively. Your next two darts in the round count as 1x, 2x, and 3x your bet for a single, double, or triple. The segment scoring display will light to indicate the number of successful hits you have registered. Failing to hit the active segment in a round costs you the value of the bet you selected at the start of the round.

The first player to reach the designated point total is the winner.

CASINO B - STRAIGHT :

This game, while similar to Casino A, has an added element of play. Again, the object of the game is to be the first player to reach the designated point total.

The end-game point total can be changed by pressing the SELECT button. Available options include; 260, 310, 360, 410, 460, 510, and 560. Press START button and you're ready to go.

The dartboard will indicate the number you must throw for. The default "bet" is 10 points. However, each player can increase his bet at the start of each round to 20, 30, 40, ... 90 points. Players usually wager high when a number appears they are confident in hitting. To change your bet (at start of a round) press the BOUNCE OUT button.

Your new bet will be indicated in the display (for example, "b20" will appear to indicate a bet of 20 points). The bet will automatically revert to 10 points at the start of each round.

To "cash in" on your bet, you need to hit the indicated number segment. Hitting a single on the first throw is a "push" and does not score points. However throwing a double or triple of the correct segment on the first throw counts as 1x and 2x your bet respectively. This is where the new element comes into play. Instead of throwing for the same segment during each round, your sequence is to span across the target area. For example, if the display indicated to throw for segment 1, you attempt to throw for segment 1, followed by a bullseye, followed by segment 19. The temporary score display will indicate segment to aim for after each throw.

Your next two darts in the round count as 1x, 2x, and 3x your bet for a single, double, or triple (bullseye segment has no triple area). The segment scoring display will light to indicate the number of successful hits you have registered. Failing to hit the active segment in a round costs you the value of the bet you selected at the start of the round.

The first player to reach the designated point total is the winner.

CASINO C - 3-STAR:

This version of Casino is very difficult, as you need to score at least 3 hits in the active segment during each round to score points. Again, the object of the game is to be the first player to reach the designated point total.

The end-game point total can be changed, as with the other versions, by pressing the SELECT button. Available options include; 260, 310, 360, 410, 460, 510, and 560. Press START button and you're ready to go.

Only the segments 15 through 20 and bullseye are active in this game. The segment scoring display will be lit at the start of each round. The default "bet" is 10 points. However, each player can increase his bet at the start of each round to 20, 30, 40, ... 90 points. Players usually wager high when a number appears they are confident in hitting.

To change your bet (at start of a round) press the **BOUNCE OUT** button. Your new bet will be indicated in the display (for example, "b20" will appear to indicate a bet of 20 points). The bet will automatically revert to 10 points at the start of each round.

To “cash in” on your bet, you need to hit an active segment (15 - 20 and bullseye) 3 times or score a triple “opens” the segment for scoring and that player receives 3 times the value of his bet. Doubles and triples count as 2 and 3 hits respectively. Failing to hit a segment 3 times forces that player to lose the value of his bet. Also, hits within segments are not carried over to the next round.

The first player to reach the designated point total is the winner.

ELIMINATION:

The object of the game is to “Eliminate” your opponents. The rules are very simple. Each player must score higher total points with 3 darts than the opponent before them. Each player starts with 3 lives. If the player fails to score higher total points than the previous opponents score, they lose one life. Tie scores will also result in a lost life. The winner is the last player with lives remaining. Press the **SELECT** button before starting to play with 4 or 5 lives per player.

Horseshoes:

This 2 -player game uses only the 20 and 3 segments to represent the two horseshoe pits. Player 1 will shoot at the 20 segment and Player 2 will shoot at the 3 segment.

Scoring is cumulated per round. First player to score 15 points is the winner.

Scoring is as follows:

TRIPLE RING = Ringer 3 points
DOUBLE RING= Leaner 2 points
INNER SEGMENT (Small)= 1 point

Scores will only count for the player or team with the most points in that round. For example, if player 1 scores 3 points and player 2 scores 1 point, only player 1 will awarded 3 points for that round. Rounds continue until 15 points are scored.

Adjustable Difficulty Settings for Horseshoes include games from 15- 25 points. Press the **SELECT** button before starting the game for these variations.

BATTLEGROUND:

In this 2-player game, the dartboard is a battleground divided into two halves. The first player to hit all of the opposing segments (armies) wins the game. Segments do not have to be hit in order.

Player 1 is the "TOP" army and shoots darts at the bottom sections of the board.

Player 1 needs to hit bottom segments (6, 10, 15, 2, 17, 3, 19, 7, 16, 8)

Player 2 is the "BOTTOM" army and shoots for the top section of the dartboard

Player 2 needs to hit top segments (11, 14, 9, 12, 5, 20, 1, 18, 4, 13)

If a player shoots and hits their own side of the dartboard (army) they lose that army.

Adjustable difficulty settings are as follows:

BATTLEGROUND DOUBLES:

Players shoot for double segments only to eliminate opponent's armies

BATTLEGROUND TRIPLES:

Players shoot for triple segments only to eliminate opponent's armies

BATTLEGROUND with GENERALS:

This variation of the game includes one more obstacle to accomplish to win the game.

Players must capture the "general" after all segments (armies) have been hit to win the game.

One hit on the bullseye will capture the general. Hits to the bullseye will not count if all segments are not first closed.

BATTLEGROUND Scoreboard:

The top cricket scoring display on the dartboard shows player 1's army segments. Player 2's army segments are in the second row. Each time a segment is hit, the corresponding light will shut off. Follow the scoreboard below to keep track of which segments you need to hit to win.

Important Notes

Stuck Segment:

Occasionally, a dart will cause a segment to become wedged within the segment separator web. If this happens, all play will be suspended and the scoring display will indicate the segment number that is stuck.

To free the segment, simply remove the dart or broken tip from the segment. If the problem is still not solved, try wiggling the segment until it is loose. The game will then resume where it left off.

Cleaning Your Electronic Dartboard:

Your electronic dartboard will provide many hours of competition if cared for properly. Regular dusting of the cabinet is recommended using a damp cloth. A mild detergent can be used if necessary. The use of abrasive cleaners or cleaners that contain ammonia may cause damage and should not be used. Avoid spilling liquid onto the target area since it can result in permanent damage.

CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

NOTE: THE EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS B DIGITAL DEVICE; PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE IN A RESIDENTIAL INSTALLATION. THE EQUIPMENT GENERATES, USES AND CAN RADIATE RADIO FREQUENCY ENERGY AND, IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTIONS, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. HOWEVER, THERE IS NO GUARANTEE THAT INTERFERENCE WILL NOT OCCUR IN A PARTICULAR INSTALLATION. IF THIS EQUIPMENT DOES CAUSE HARMFUL INTERFERENCE TO RADIO OR TELEVISION RECEPTION WHICH CAN BE DETERMINED BY TURNING THE EQUIPMENT OFF AND ON, USER IS ENCOURAGED TO TRY TO CORRECT THE INTERFERENCE BY ONE OR MORE OF THE FOLLOWING MEASURES:

- REORIENT OR RELOCATE THE RECEIVING ANTENNA.
- INCREASE THE SEPARATION BETWEEN THE EQUIPMENT AND RECEIVER.
- CONNECT THE EQUIPMENT INTO AN OUTLET ON A CIRCUIT DIFFERENT FROM THAT TO WHICH THE RECEIVER IS CONNECTED.
- CONSULT THE DEALER OR AN EXPERIENCE RADIO/TV TECHNICIAN FOR HELP.
