UBNETUNIV-12	

*You will use the same amount of straps, pole caps, as the amount of poles you have on the enclosure of your trampoline.

Tip To Measure Your Frame Size:

Measure your frame from one outside edge vertically and horizontally to the other outside edge so you get the correct measurements.

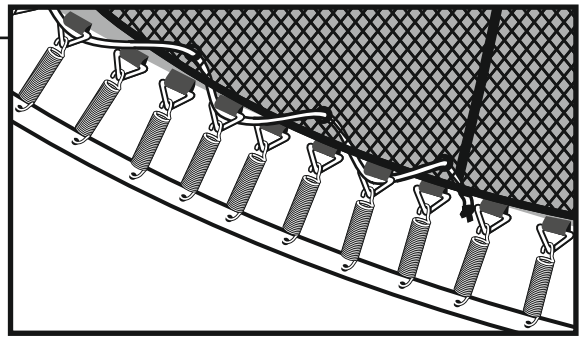

Steps to connect bottom of the net

Note: Make sure to align the net correctly, so that the entrance to the trampoline should be between two poles.

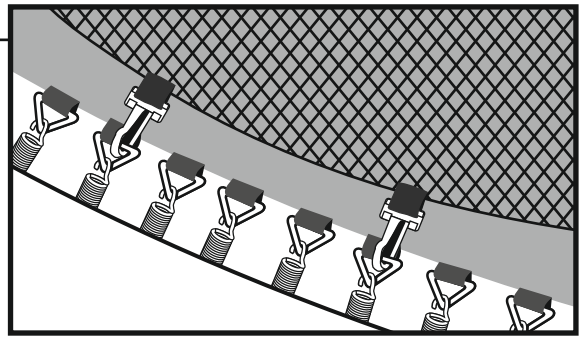

Step 1 Connecting net with rope

Connect the bottom of the net to the v-rings of the mat. Start by inserting one end of the rope to the beginning of the safety net entrance. Secure the rope by making a knot around the first V-ring so that the rope is now attached to the trampoline. Thread the rope through the net and through every second V-ring until the other end of the net entrance. Make another knot around the last V-ring at the other end of the rope.

Step 2 Connecting net with clips

Optional Step to connect the net with clips instead of ropes
You can skip step 1 and connect the net to the V-ring with the clips. We always recommend to use the ropes for extra stability.

Steps to connect top of the net

Step 1 Insert the Pole Cap

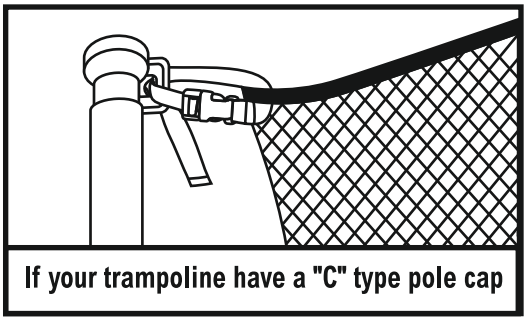

Note: This step is only required if you have straight or curved poles. Skip this step if you have arched poles.

Measure the diameter of your pole to determine what size pole caps you need to use. If your poles measure 1", place the size 1" pole caps on top of the trampoline poles. If the poles measure 1.5" then use the 1.5" pole caps. (You only need to use your size pole caps, you do not need to use all of them.)

Step 2 Adjust Strap

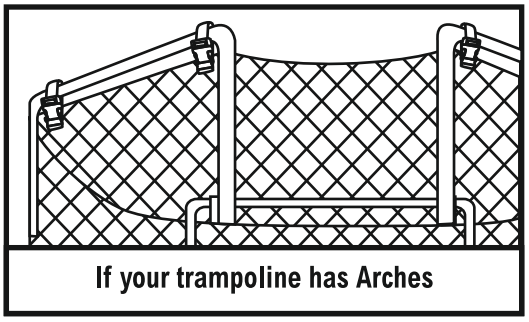

Insert a strap through a stitched hole on top of the net then pull the strap through the "C" shaped part of the pole cap. Continue by adjusting the buckle of the strap. Refer to fig. 1.

If your trampoline has arches, then look at the figure 2 to see how to adjust the straps around the poles of the arches.

If your trampoline have a "C" type pole cap

Fig. 1

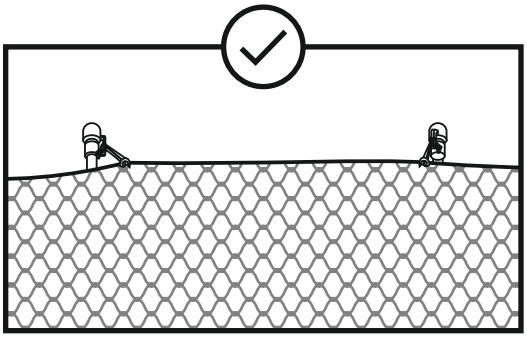

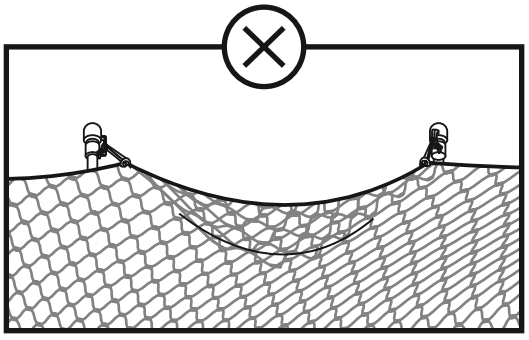

If your trampoline has Arches

Fig. 2

Step 3 Remove Sagging

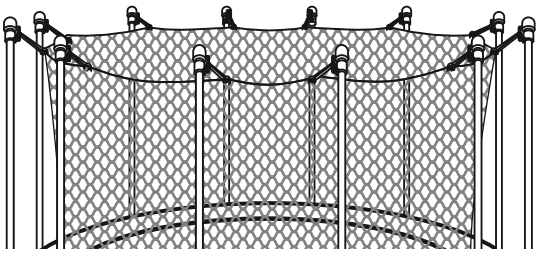

Continue to the next pole. Make sure to stretch the net as much as you can to avoid sagging.

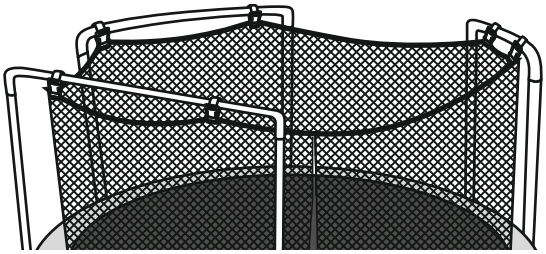

Step 4 Insert Strap to all poles

Repeat step to all poles as shown in fig.

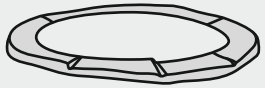

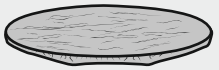

Poles

Arches

REPLACEMENT PARTS LIST

If you need to replace any part of your trampoline, you can look for the Upper Bounce parts list below for each item model name :

	JUMPING MATS  Example UBMAT-7.5 (Frame size) -42 (Amt of springs) -5.5 (Spring size)		SAFETY PADS  Example UBPAD-S (Super) -7.5(Frame size) -B(Blue) / P(Premium) / G(Green) / BG(Blue Green)	SAFETY NETS  Strap Type Net (Inside) Example UBNET-7.5(Frame size) -6(Amount of poles)-IS	 Strap Type Net (Outside) Example UBNET-7.5(Frame size) -6(Amt of poles)-OS	 Sleeves on Top - Net (Arch) Example UBNET-7 (Frame size) -3(Amt of arches)-AST	 For Curved Poles Example UBNET-8FG(Frame size) -6(Amount of poles)	WEATHER COVERS  Black Example UBWC-12(Frame size) -BK(Black)	Blue Example UBWC-14(Frame size) -BL(Blue)

Trampoline Spring Pull Tool (T-Hook)	UBHWD-TH
Upper bounce® Trampoline Jumping Skate	UB-TJB

Still have questions?

While we provide a large variety of trampolines, we also pride ourselves in the large selection of our trampoline replacement parts which are compatible with most trampolines regardless of their brand.

If you have difficulty finding the correct replacement part for your trampoline, Please give us a call : **1-888-965-3331**
or email us at : **support@upperbounce.com**

Our Customer Service Department staff are trained in the details of all trampolines and will help you find the right part to get you bouncing again.

We never forget our goal... **Get the Upper Bounce!**
