4. Make sure that the **FOAM PADS(36)** are holding your feet properly.
5. Make sure that there is enough room for the **InLine® Inversion Chair** to rotate completely.

THE ANGLE ADJUSTMENT BELT

This belt is used to control the inversion decline angle of the **inLine® Inversion Chair**. For a steeper decline angle, adjust the buckle higher to lengthen the belt. For a less steep angle, adjust the buckle lower to shorten the belt. Check the decline angle as you like before using the **inLine® Inversion Chair**.

FOAM PAD USE AND LEVER ADJUSTMENT

1. Place your feet under the **FOAM PADS(36)** with your ankles between the **FOAM PADS(36)**.
2. Press the **BUTTON(25)** down and pull the **LEVER(11)** toward you until your ankles are comfortably yet firmly held between the **FOAM PADS(36)**.
3. To release your feet or relax the grip, press the **BUTTON(25)** down and push the **LEVER(11)** forward.

OPERATIONAL INSTRUCTIONS

LEG HEIGHT ADJUSTMENT

Proper adjustment of the **LEG ADJUSTMENT FRAME(10)** is very important.

1. Loosen the **ADJUSTMENT KNOB(28)** on the **SWING BAR(9)**.
2. Pull the **ADJUSTMENT KNOB(28)** and slide the **LEG ADJUSTMENT FRAME(10)** to adjust.
3. Sit on the machine to make sure you feel comfortable with the **FOAM PADS(36)**.
4. Tighten the **ADJUSTMENT KNOB(28)** after adjustment.

THE SEAT BELT

CAUTION: Always use the **SEAT BELT(60)**. Make sure the **SEAT BELT(60)** is securely fastened before inverting.

Sit on the **SEAT(13)**, then buckle the **SEAT BELT(60)** snugly around your waist.

THE HANDRAILS

The **HANDRAILS(4)** are located on both sides of the **inLine® Inversion Chair**. The **HANDRAILS(4)** are to help you return from inversion to the upright position. Pull the **HANDRAILS(4)** and pull yourself to the upright position.

OPERATIONAL INSTRUCTIONS

USING THE InLine® Inversion Chair

1. Always use the **SEAT BELT(60)**. Make sure the **SEAT BELT(60)** is securely fastened before inverting.
2. Start by sitting on the machine and leaning back on the **BACK CUSHION(14)** with your hands at your side, or resting on your thighs.
3. Use the **HANDRAILS(4)** and both hands to rotate the **BACK CUSHION(14)** slowly backward until the inversion stopped by the **ANGLE ADJUSTMENT BELT(16)**.
4. It is recommended that the **InLine® Inversion Chair** be used for five or ten minutes each morning, and again each evening.
5. Grasp the **HANDRAILS(4)**, and pull yourself to the upright position.

SUGGESTIONS FOR USE

1. Always use the **SEAT BELT(60)**. Make sure the **SEAT BELT(60)** is securely fastened before inverting.
2. Begin slowly: invert only 15-20 degrees to begin with. Stay inverted only as long as you are comfortable. Return upright slowly. If you feel unstable grab the **HANDRAILS(4)** and pull yourself up slowly.
3. Make gradual changes: increase the angle only if it is comfortable. Increase the angle only a few degrees at a time. Increase the time of use 1-2 minutes up to ten over a period of weeks. Add stretching and light exercise only after you are comfortable with inversion.
4. Watch your body: come up slowly, dizziness after a session means you came up too fast. Wait a while after eating before using the **InLine® Inversion Chair**. If you get nauseous, do not fight it, grab the **HANDRAILS(4)** and come up as soon as you feel queasy.
5. Keep moving: movement while inverted encourages blood, lymph, and spinal fluid circulation and aids in alignment of bones and organs. Movement may be accomplished by either rhythmic traction or light exercise. Do not exercise strenuously while inverted. Limit partial inversion without movement to one or two minutes. Limit full inversion with no movement to only a few seconds.
6. Invert regularly: we recommend two or three times a day depending upon your current condition. Try to schedule it for the same times each day.

STORAGE

1. To store the **InLine® Inversion Chair**, simply keep it in a clean dry place.
2. Move the **InLine® Inversion Chair** by lifting the frame and moving slowly.

NOTE: Two people are required to move the **InLine® Inversion Chair**.

The safety and integrity designed into the **InLine® Inversion Chair** can only be maintained when the **InLine® Inversion Chair** is regularly examined for damage and wear. Special attention should be given to the following:

1. It is the sole responsibility of the user/owner to ensure that regular maintenance is performed.
