

THE **TAC-40** ROD

H2O X XPRESS®

Lightweight, Multi-modulus graphite blank provides greater sensitivity and less fatigue

Helical core construction increases blank strength by reducing torque

Semi-micro Kigan SiC guides feature the toughest, hardest, and lightest insert made

Rubber painted Fuji ACS reel seats on casting models provide great feel and offer exposed blanks for increased sensitivity

Split grip, high density EVA handles reduce weight and provide a comfortable and durable grip

THE PERFECT MATCH **THE TAC-40 REEL**

- 10 ball bearing system
- One-piece machined aluminum frame
- Durable lightweight carbon sideplates
 - Smooth carbon fiber drag
- Oversized high strength alloy gears
- Ergonomic carbon fiber swept handle
 - Contoured EVA handle knobs
- Adjustable 6-pin centrifugal braking system
- Forged, anodized aluminum spool features a shallow design which is ideal for casting light lures and lighter line.

SPECS:

10 bearings, 6.2oz., 7.3:1 gear ratio, 30 inches per turn, 12lb max drag
