

CENTERFIRE RIFLE HUNTING

Designed specifically for the whitetail deer hunter—delivering maximum performance at an affordable price.

- 1 Proprietary bonding process—Welds lead to a copper alloy jacket where the two act together during expansion for improved penetration and retained weight.
- 2 Copper alloy jacket—Contoured jacket taper engineered to work with bonding process.
- 3 Protected hollow point (PHP)—Aerodynamic profile of PHP bullet design promotes long range accuracy and initiates maximum expansion.
- 4 Bonding process—Keeps lead adhered to jacket after expansion.
- 5 Massive expansion—Result of engineered design features working together to provide dramatic upset/knockdown power.
