

5). USING THE SCREW SPIKES FOR TRACTION ON ICE

- Use removable screw spike ONLY for traction on-ice
- Remove the 2 plastic post caps from parts G
- Insert steel screws from the inside of the cap as shown
- Caps with spikes should be removed during goal transit and whenever goal is not being used on ice

ITEM # 12388F4 - OFFICIAL STEEL GOAL

ASSEMBLY INSTRUCTIONS

1). PREPARATION FOR ASSEMBLY

- Lay out all parts
- Read instructions completely before starting assembly
- Assemble goal on smooth, flat surface
- Adult supervision recommended for assembly and use of goal

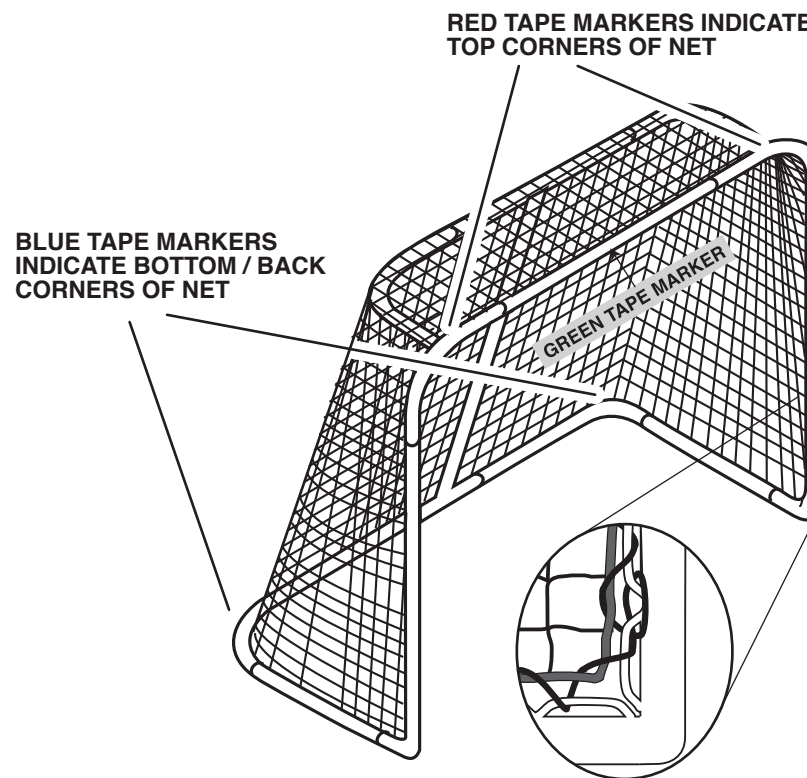

2). GOAL ASSEMBLY

- Assemble all posts as shown
- Welded net loops must face the correct direction for net attachment
- Be sure all pieces are completely inserted until locking buttons snap into place

3). POSITIONING NET ON GOAL

- Position net on goal frame with colored tape markers in the locations shown
- For ease of assembly, use protective plastic post sleeves to temporarily tie net in position

4). ATTACHING NET TO GOAL

- Use the 4 rope ties to attach net to the welded metal loops
- Begin by tying one of the ropes to the top center of net
- Weave the rope through the welded loops and the reinforced perimeter of the net
- Continuously pull the rope tightly as you attach the net perimeter to the welded loops
- When rope is finished, tie off with a secure knot, cut off excess, and begin a new rope
- Continue until entire perimeter of the net is secured to the goal
