A multidimensional cushioning masterpiece with controlled flexibility and responsiveness for the work day, the ZPrint Work is engineered for excellent foot-tracking and cushioning. Underfoot materials come in three different densities, a foot-mapped 3D foam midsole that cushions on impact and propels at takeoff, a grid perimeter for stability, and the third in contact with the ground for abrasion and slip resistance.

- Lightweight, seamless textile upper for remarkable comfort and support
- Low-cut design for maximum ankle mobility and quick stride transits

- Multi-density cushioning platform for stride control and quick response
- Foot-mapped 3D foam midsole with deep flex grooves for resilient cushioning, flexibility, and natural feel
- Dense outer rim compound for solid support and abrasion resistance
- Strategically sized rubber nodes on the sole for enhanced flexibility and slip resistance
- MemoryTech Massage footbed adapts to the contours of your foot for immediate cushioning
- Steel toe meets or exceeds ASTM F2413 safety standards
