

Benefits

- Proven methodologies leverage artificial intelligence for better and faster results
- Get ahead of the kill chain and prevent incidents before they happen
- Lightweight, low touch techniques utilize native scripts so data can be captured quickly and sent for analysis
- Designed to not impact operations in any way
- Consultants work quickly to contain incidents and restore operations — the end goal is prevention
- World-renowned experts have worked on some of the most high-profile breaches in the industry

It is increasingly important to protect against today's information security threats as the cost and frequency of breaches has grown. Everything from financial information to consumer, patient, business, and client information is at risk. Attacks are increasingly sophisticated and the sheer number of connected devices presents an unprecedented opportunity for cyber criminals.

Utilizing the power of artificial intelligence and machine learning, Cylance® is the only company that helps organizations *prevent* zero-day threats. Cylance provides a comprehensive portfolio of offerings that enable organizations to take a prevention-first approach to remediate issues that may be negatively impacting the environment. Cylance Consulting helps companies quickly contain incidents — not just respond to them.
