

Chain Safety Shield Spacing Jig Instructions

Please read all instructions before starting

Step 1. Place the Funnel on the peg with the shoulder of the Funnel resting into the slot of the Jig. Loop the Bead Chain around the other peg and rest the Bead Chain into the channels of the Funnel.

NOTE: Ruler shown for reference. Bead Chain will extend 8" from each end of the Chain Safety Shield.

Step 2. Place the Wheel on the peg, and insert the Bead Chain into the Wheel. Insert the other side of the Funnel on the peg.

Step 3. Slide the Chain Safety Shield through the Bead Chain, up to the edge of the Funnel.

Step 4. Remove the Shield and Funnel assembly from the Jig. Continue to push the Shield fully up into the Funnel. The holes in the Shield and Funnel should be aligned.

Step 5. The Bead Chain length extending from each end of the Safety Shield is now set to the correct spacing (8"). Follow the remaining steps in the Chain Safety Shield instructions to complete the assembly.
