FLORA

FABRICS

Blossoming with life and color, the Flora Collection is inspired by French artist Pierre Bonnard's vivid, idiosyncratic paintings. Drawing upon Bonnard's unique use of color and intimate depictions of nature, Flora is a vibrant collection of prints and wovens that celebrates all things green and growing. With a youthful energy and painterly sensibility, Flora combines graphic small scale patterns and bold floral prints in an assortment of natural fibers and exuberant colors. Archive documents are re-imagined to create vintage-inspired prints with a casual point of view. Textured, transitional fabrics supplement the patterned offerings for a subtle look, and multicolored geometrics bring a bright pop of color. Let your interior bloom with the Flora Collection.

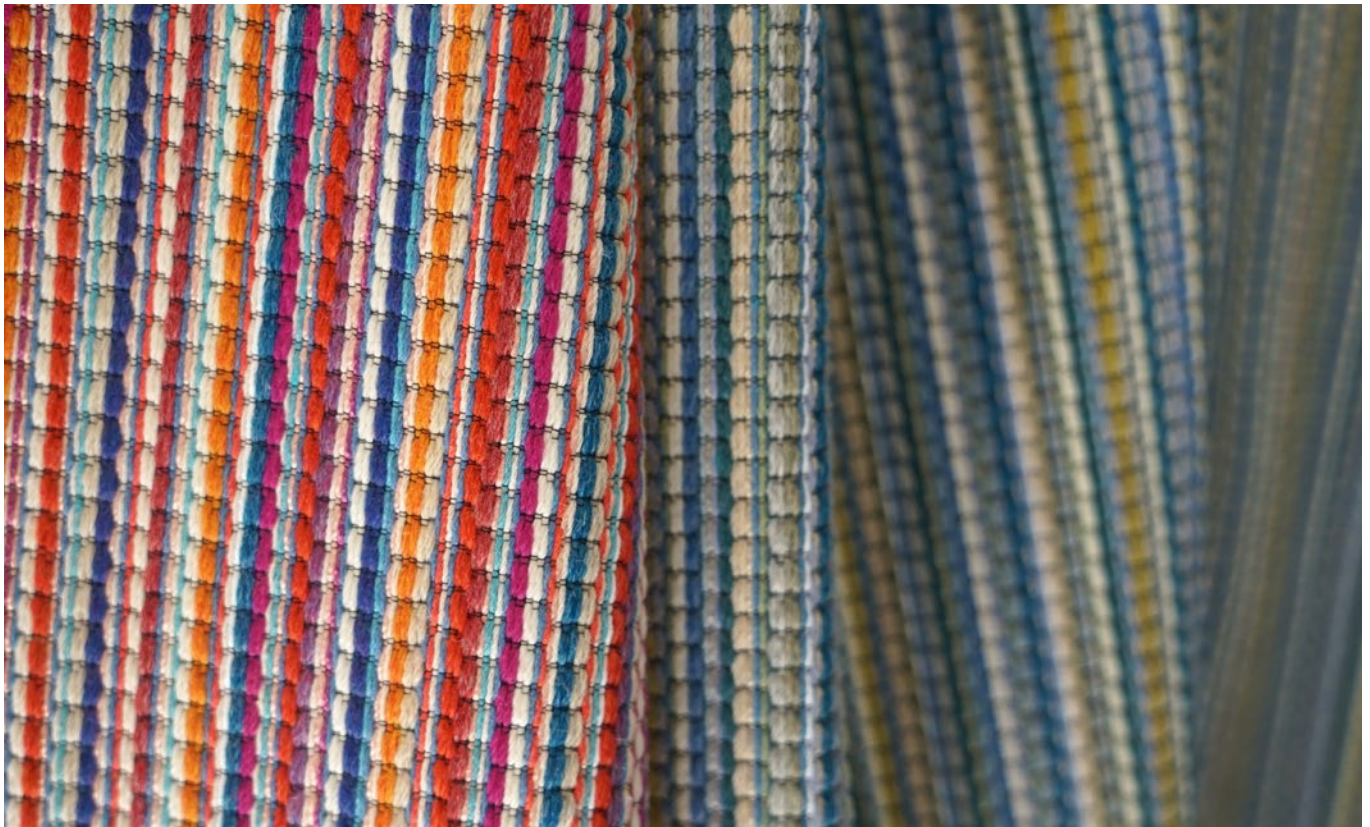

"The Window" – Pierre Bonnard
