WALLCOVERING COLLECTION

A revolution beyond the boundaries of innovation and creativity: the Forma Collection by Jannelli & Volpi gives rise to a new idea of aesthetics and technique applied to walls and redefines the very concept of wallcovering. Thanks to new technologies, innovative materials, and industrial techniques, the Forma Collection offers surprising creative possibilities. These new wallcoverings allow you to play with textures, colors, and patterns, creating a true artwork on the walls. To bring back elegant and precious personalities to environments, simply choose from coverings with geometric designs, three-dimensional effects, light-reflecting materials, united by mixed and varied chromatic tones.
