## FABRIC & WALLCOVERING COLLECTION

Maison Leleu and Lelièvre Paris, two century-old French interior design companies, have come together to create this exceptional collection. The assemblage is a range of contemporary fabrics and wallpapers based on iconic designs from Maison Leleu's archives. The collaboration includes unexpected motifs and patterns, such as Art Déco, wild fauna and flora, and 50s style, and features well-balanced textured fabrics in a broad palette of colors. The designs have been completely reworked by Lelièvre Paris's in-house creative studio in collaboration with Maison Leleu, and the collection consists of seven fabrics and five perfectly coordinated wallpapers.

The textiles and wallpapers are manufactured within Europe, and the collection is a unique and timeless addition to any home.
