DORSET COAST

FABRIC COLLECTION

The “Jurassic Coast,” a world heritage site in Dorset, England, is a 95 mile coastal stretch full of beautiful limestone chalk cliffs, eroded stone walls, and harbors molded by a millennium of drowned valleys that once welcomed countless trading opportunities. Each mile marked from battle sea fury, has its own story to tell. This magical place is packed full of inspiration and wonder, all of which has been translated into the latest Old World Weavers collection, Dorset Coast.

The Dorset Coast collection tells the story of a coastal and rural region of thatched cottages, hunting lodges and castles, filled with textiles that reflect the rich history of this ancient seafaring area. Dramatic prints such as Summerhouse Hill and Botany Bay are derived from French and English documents and portray their own story of wildlife, beauty, and strength.

Combe Martin, a coquillage tableau expressed as a hand embellished embroidery along with its companion, Hele Bay, speak to a life along the sea and all that lies below the surface of such robust waters. In a region that understands relaxed comfort and undergoes strong and often brutal coastal winds, styles such as Torrs, with its wool boucle texture, and Whitby, an ever so soft chenille woodgrain can feather the nest quite nicely providing sophisticated warmth.

Dorset Coast is a breathtaking collection that fills any imagination wishing to experience life at the edge of a country, and at the edge of the world.
