## WALLCOVERING COLLECTION

Your tranquil oasis awaits. JWall's newest wallcoverings collection embraces the beauty of artisanal Japanese design.

The textures of this collection are directly inspired by tatami, a type of floor covering consisting of rectangular panels of woven rush, hand-crafted on a wooden loom. Japanese aesthetics are embraced with an innovative and technological twist to make the product unique and suitable for walls. Simple geometric shapes mixed with intricate designs are created using weft and warp, bringing dimension and tranquil beauty into any space. Explore the exquisite assortment.-
