

# TERRO®

## Carpenter Ant & Termite Killer

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**GENERAL INFORMATION:** This product is long-lasting and keeps on killing for up to 4 months after you spray. Contact kill gives you immediate results when spraying insects directly, while residual activity kills insects when they return to treated areas. This product will not stain surfaces or fabrics. This product is intended to be used in and around residences and their immediate surroundings such as (but not limited to): apartments, attics, basements, bathrooms, cabins, campers, carports, decks, garages, gazebos, kitchens, patios, porches, storage areas, utility rooms and verandahs. Do not use in commercial food handling establishments, restaurants or other places where food is commercially prepared, processed, or served.

### OUTDOORS:

#### HOW TO SPRAY:

- 1 Point sprayer away from face. Turn sprayer to "on".
- 2 Hold sprayer on a slight downward angle, approximately 12 inches from surface to be sprayed.
- 3 Squeeze trigger to spray until surface is slightly moist.
- 4 Spray with wind if breeze is blowing.
- 5 Do not contaminate fish ponds or apply directly to water.

#### Application Restrictions for Outdoor Use

Do not water the treated area to the point of run-off. Do not make applications during rain. All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses: (1) Treatment to soil or vegetation around structures; (2) Applications to lawns, turf, and other vegetation; (3) Applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications only.

#### Carpenter Ants, Termites and Carpenter Bees:

For localized control only. Apply this product to voids or channels in damaged wood of a structure, or to cracks, crevices and spaces in and between wooden portions of a structure or between wood and the foundation, in locations vulnerable to attack such as crawl spaces. For termites, the purpose of such applications is to kill workers or winged forms which may be present in the treated areas at the time of application. Not recommended as sole protection against termites. For active infestations get a professional inspection. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement.

#### PESTS ON OUTSIDE SURFACES OF BUILDINGS:

Spray foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps.

#### Ants:

Spray freely around ant trails and hills. Spray around nests hidden under steps, brick-work, concrete, etc. Break apart accessible nests and spray freely on and around debris.

### INDOORS:

#### HOW TO SPRAY:

- 1 Hold container upright. Do not spray up into air.
  - 2 Apply to surfaces only as a spot and crack & crevice treatment.
  - 3 Turn sprayer nozzle to "on" position.
  - 4 Hold approximately 12 inches from surface to be sprayed.
  - 5 Squeeze trigger to spray until surface is slightly moist.
- Apply as a spot and crack & crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposed food should be covered or removed.

### ANT CONTROL BASICS:

- The majority of ant invasions have their source outside your home.
- Use this product on the outside of your house, as well as inside the house for best results. Spray ant trails and around all doors, windows and any small cracks or openings that pest ants could use to gain access into the house.

#### Carpenter Ants:

If the ants invading your home are large brown/black ants, they are probably Carpenter Ants. They will be found nesting in and around water-damaged wood. Areas where you find this ant include void spaces around tubs and sinks, near leaking gutters or eaves and around wood decks and patios.

When you spot ants, do not kill them immediately. Instead, follow them and many times they will lead you to the area where the nest is located. Spray this product directly into the infested wood. If possible, repair any water leaks that have created this ideal nesting site.

### STORAGE AND DISPOSAL

**STORAGE:** Store in a cool, dry area away from children. Protect from freezing. Store above 32 degrees F. If freezing occurs, allow product to thaw and shake well before using. Some product separation may occur on freezing which is reversible on shaking. Freezing does not adversely affect product performance.

**PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. Use product until container is empty. **If empty:** Offer for recycling if available or place in trash. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

#### IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following conditions, disclaimer of warranties and limitations of liability.

#### CONDITIONS:

The directions for use of this product are believed to be adequate and should be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Senoret Chemical Co., Inc. All such risks shall be assumed by the user or buyer.

#### DISCLAIMER OF WARRANTIES:

Senoret Chemical Co., Inc. makes no other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond the statements made on this label.

### PRECAUTIONARY STATEMENTS

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Contact with product may result in transient tingling and reddening of the skin. Avoid contact with skin or clothing.

**FIRST AID** Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

#### IF IN EYES:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

#### IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.

#### ENVIRONMENTAL HAZARDS:

This product is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

#### PHYSICAL OR CHEMICAL HAZARDS:

Do not apply this product in or on electrical equipment due to possibility of shock hazard.
